A most pleasing feature of the tailre' strike has been the solidarity displayed by the workers. In former years has often been possible for the boas ed to play off German against Jew and Jow against Gorman. This thee the workers have stood together, regardless of nationality, and have deserved the success they have won.

This is the season of the year when the New York "Evening Journal" feels unfe in counseling workingmen to organize into a labor party. JUDGE FOR YOURSELVES.

The organ of the S. L. P. and S. T. and L. A. publishes a statement, purporting to bear the algustures of a onsiderable number of men in the Sprague Mectrical Works, of East Orange, N. J., denying all the allegations about the conduct of the Alliance in the late strike there, as published ir The Worker of July 21. .

Our information was derived from what we believed and still believe to be credible sources. The reason why we cannot publish a rebuttal with s that of signatures appended was expluined in the original article. That reason is, as there stated, that the class of the strike nottlement and has power to punish any who openly dis- rises, helping to cut off his own thiobey the command. It is easy to get signatures to a statement of which the employers approve, but not so casy to get signatures to a statement injurious can present no further evidence without breach of faith.

The question has now become, there fore, a simple question of veracity between The Worker and the organ of all casential points our statement was correct. We cheerfully leave it to our only intrasify the workingmen's eppo readers to judge by the past conduct, of the two names, which better de serves belief. And we leave it to the usunds of plachinists, cigarmakers. and others who, although they know nothing directly of this case, have in other cases, bed personal experience of the peculiar policy of the S. T. and L. A. as led by Mr. Deleon and as exocuted partly by Mr. Hickey, to judge whether our statements were not birthly probable.

---Secretary of War Reot's proposition o make the militia in the several states a federal force would save the empitalists a lot of bother in time of labor tropbles. Instead of having to depend upon a number of governors fo mistance to break strikes, they would have but on individual to call upon. the pareident, who would have full command of the National Guard. This encentration of power fellows logical ly upon the concentration of the own ership of industry and the centralisa tion of political power ot Washington Should the Bortalists kappen to obtain control of any state, any opposition on their part to the use, of the military to shoot workingmen could be suffilled by the action of the president, provided he was not a Socialist also. This will probably turn out to he tree reasity for the movement started by Boot. Presently the workers will baye to stop feeling with long-winded, verbo dutions and petitions and get down to benferen. And their bushess in to capture the national government at Washington, and make the National Guard their creature, so it is now th creature of the present capitalist class government.

The Boston "Herald" remarks that "Mr. Carnegie would make a great hit with the union labor men of the country by giving them a million or so with which be fight the steel trust mag autes." The joke is a good one. But it is more than a joke. Everyous recognizes that it would be ridiculous to expect Curuegie to contribute to the steel: workers' strike fund. But why? No one knows better than Carnegis that the right is on the strikers' side. Why should be not spend some of his troublesome millions in helping to win their strike, so that they would have more leisure to use the libraries be has endowed? The reason is plain: Beestare he would be acting against his when interest and the interest of his carned profits and those of his fellow explciture. And then the nilletreuse are never tired of talking about the faults of nervants-how tony they are, how they lit, how they steal, and so ca, to the edd of the chapter: Very likely some of them are lany. Very likely some do ile and steal. They would be more or less than human if they did hot somehow take revenge for the irepositions of their mistresses. Change places, and in-a few years the former mistress would have all these vices. Put any person in the position of a slave, and it is eafe to buy mos will soon cultivate slavish vices in him. The responsibility for the faulte of pervants juntly repts on the aboulders of the master class who determine the conditions that make them good or bad.

In short, the relation of mistress and servant is a positively immeral one, resulting in injuntion, throit," and degradation to the servants. And those girls are members of the working class, our class. They are the daughters and states of werkingmen. And because they are week and defenseless, because they have neither the physical, the economic, nor the polittlest power that we the men of the working class, have to defend our interests, the duty falls upon its to aid them by all means in our power.

We wish all success to the newly lamebed appear of domestic servants. But our wishes go beyond our hopes, The conditions under which they work, their isolation from each other and from other workers, the large number of poor girls who must work in order to live and who have no training in united action—all those bilings make it very difficult to organise them offectively.

Whatever aid the unions of workingmen can give ought to be given cheerfully and vigorously and promptlyand no doubt & will be. But the workingmen must do more than this if they want to cave their daughters and sisters from such oppression. They must make up their minits to abolish the system which creates a rich class and poor class and offers the weakest and most belgiese of the poor as victime to the idle vanity and insolunce of the rich. They must use all the seams in their power for the overthrow of this mystem of class rule and for the establishment of real freedom, rest equality, real frateruity.

The greatest of these powers is the ballot, and the Borislist movement of fers the opportunity for its use. For the aske of the women of their class, if not for their own take, let the workingmen vote the flocialist ticket straight, and work for it the year roupid.

And the state of

SOCIALIST ECONUMICS.

Being an Attempt to Present the Main Principles of Scientific Socialism in Popular Language.

VI.-WHAT IS PROPITY

We have said that the amover to this, position would be drawn from the onsideration of a third peculiarity of the commodity labor-power. Before considering the matter in this light, owever, let us briefly examine two or three explanations of the origin of ner at advanced by the defenders of capi-First, there is the "wages of risk"

ing, out the great hazard incurred by the investor, who inust be recomshare of the product of labor. We might polirt out that while the capitalist risks only his wealth, the wage-worker risks his life, which is incomparably more valuable to him than augmoney; yet these economists de not think that the workingmen are enti-tied to "wages of risk." We might point out that the espitalist can, and generally does, entirely cover his risk by insuring his "plant," and that after paying all insurance premiums there still remains a surplus to the owner of easted. The bust- of insurance is, indeed-and rightly-count ed, along with cost of materials, wages paid, fuel, and the like, among the experson of operation. The word "per-fit" designates what is left after all these are paid. /We might point out that, what the capitalist risks is not even his own wealth, but wealth taken from others. But it is enough to say: Pirst, that this theory admits at the start that profit, is not profuced by those who receive it; and, according that since capital twelf is the accuunisted profits of the past, it is as at surd to tustify its existence by the risk theory as to expect a man to lift him self by his own boot straps.

Again, there is the 'reward of absili nence" theory. Its advocates inve-mathialand that profit is the recom-pense rightfully due to the capitalis: for the soft-denial in having invested his wealth in productive industry in-stead of spending it in rioteus living. The object lessons in capitalist "abstinence" given by our capitalist "smar set" have made this theory rather us popular. (It is edrious, by the way, to note that the same economists who say that profit is the reward of capitalist fragality, applied the lavish and vulgar extravagance of the same capital istis-became it sgives employment to the working people." It is necessary accumulated profit and that the mersaving of a thing canont make it grow, in brifer to show the fallacy of this explanation Finally, there is the theory of "wages

And a century ago, when th capitalist generally did manage his own bindmen, the theory seemed res-sonable enough. But the growth of the joint stick company has showed its ab urdity. J. Perpoint Morgan draws profit from a large number of steel mills banks, railroads, street railways, an many other concernt, in very lew of which he is even formally a manager Consucts, Drichem of Mariborough, probably could not locate the infromison which she draws her income. It, too, ranguage in the value of the product, and—here is the mountain return to the mountain as adregine of the product, and nere is the secret. It gives to the product an ad-ditional value greater than that of the labor-power consumed. For, observa, infor power is a living commodity, and this differs from coal and oction. The value of the labor-power that the man-

ufacturer bought was the average covi The value those men's labor added to the day's product was fur more than the cost of their living.

Thus, and thus only, can the origin of profit be explained. Profit is the nurplus of the product of labor over the value of the labor powers. or expanded. When the man who the work in, at the same time, ownit of the materials and tools of production, the whole product, of course, belongs to him. If is not then possible to adparate the value of the labor-power pand up from the surplus value produced. And there is no occurrent the materials of the produced of the produce cusion for separating them. In such case it is absurd to speak of the pr duct, which is the reward of labor, de profit or an wages. It is just as about as it would be to speak of the wing and logs of a heals east. The egg is: future chick. The wings and legs, developed from the timue of the egg. But in the egg there In yet no much differentiation primitive independent production there is ishor-power and the product of is bor, but there is, no wages or profit The words "wages" and resent abares of the product of labor under a social system which divides up that product, giving the value of the labor power to the worker and the sur plus value to the employer.

I should say here that I have now the word "profit" in a broad sense for the whole of surplus value—the whole share taken by the capitalist, whether in the form of profit properly so called, or in the form of interest, or of rent. Profit, you will observe, is a residu.
It is all that is left of the product o industry after the value of the labo flower consumed has been taken ou! als, because , each of these values, if annivand will be found lifewing to the surplus power created.) And in proportion as labor becomes male to tive, in proportion as the workingman is able to produce a larger surplus over his cost of living, this residue, the capitalist's since, grows greater. This the tendency with the improvement udern muchinery.
At this point we shall leave the dis

etission of economic theory for a while and turn to the historical side of the question. Next week we shall take on the subject: Labor, Past and Press

THE NECESSITY OF POLITICAL ACTION

It is a principle of military strategy that a general must always provide for the food supply of his army. Cutting off supplies is a favorite method of subjugating an enemy. The army of or gaulsed labor, therefore, must break up this control of the sources of their od supply which their enemy has acquired. There is said to be a propos There is said to be a proposition afout to combine at least three thousand five hundred retail 'grocery stores of Philadelphia into one corporation. It is proposed by those back of the unoveness to purchase the stock and shores at a-calsh average of \$2,000, making a, total investment of \$0,000,000 in addition to retain \$0.000,000 in addition to which \$500,000 would be pur up for a working capital. The idea further is to employ the owners as managers of the new stores. It is estimated that \$25,000 would be the annual average receipts of each store, which, upon a not profit basis of 10 per cent, would bring in a yearly return of \$7,500,000. This would be more than 100 per cent. of the annual return upon the full This report may be premature and

the combination as outlined in detail may not be carried out at present. But the plan is undoubledly in line with the general tendency in business. A single corporation, owning three thou-send stores would be able to purchase goods at lower rates than three thou and independent merchants. It could make its purchases more judictionly, avoiding the great wasts caused by the frequent laying in of an excessive stock of perishable goods. The ex-penses of delivery of goods would be greatly reduced by consolidation. A great deal of competitive advertising would be saved: And the expenses of bookkeeping and accounting visible be reduced confidentity. In many places where several small merchants in a neighborhood ere now barely making a living, one vell equipped store could, with a much a naller expense, supply all the enstancers Even If the Philadelphia report

The Greatest Strike in History, Involving the Strongest Feroes on Either Side to Be Fought on a Question of Wital Interest.

The fight between the steel workers nd the Steel Trust is on to a finish.

After fruitiess conferences held beween the Amnigumated Association officials and the refreentatives of the Trust in the effort to effect a settle-ment, President Shaffer has been confpelled to issue a general strike order slling out all Amaignmeted men em-ployed by the United States Steel Cor-

The strike will be the most momen one one in the lilatory of the America labor movement. The most complete by organized trust and une of the strongest labor organisations are pitted against each other in a strongla for the mastery. If the Trust wins, it will mean a

blow to organized labor which will be felt throughout the world.

If the Trust loses, it will mean a

great rictory for the becommically or-ganized working class, a triumph for the principle of the right of labor to organize to protect and advance its interrets.

The trust represents the larges ganization in existence. It is the capitalist class personified. Its directors ore the leading fluanciers and capitalists of America; its managers, the shrewdest that money can buy. It pos nessed a world-wide power. In indu-cuce extends wherever men gamble of the necessities of life, into every contry where labor is exploited to yield profits to a parasitical class. Its resources are unlimited. The bosses own the foundries and machine shows get fat profits for owning them instead of working in them, and claim the exclusive right to say who shall work, how long and how hard and under what conditions they shall work, and what pay they shall receive. The bussen' union says that, on principle, it will not arbitrate these questions with the men who do the

The men, through their organization, have used perfectly peaceful and lawful means to explain the situation to other men and induce them not to go in and take the strikers' places. This plan succeeded very wall, for the average workingmen is too honorable to willingly steal another's job. The bowes' union was in trouble. If other men did not work for them they could not get any profits. They had to do something. This is what they did.

They found a judge named Gage (h)s name might as well be Jeffreys or Tapey-or Dogberry, for that matterl, who was a great friend and formerly el for one of the bosses, named Parrell This Garer issued an intune tion FORBIDDING THE STRIKERS EVEN TO PERSUADE OTHER MEN NOT TO TAKE THEIR PLACES HE FORBADE THEM TO CONGRE-GATE in the neighborhood of the factory "OR IN ANY OTHER PLACE" for such purpose; he forbade them to "COUNSEL OR PERSUADE" anyone to "interfere" with the bosses' union by "perduasion or other means." He attached a penalty of \$5,000-FOUR YEARS WAGES FOR A SHIELED MAN-te the violation of this order.

Then this hifamous Judge clinched his order stin further by a device his own. The boses brought suit against the machinists' union for danages caused by the strike-not for any injury done by violence, but for the loss of profits that the men would otherwise have created for the bosnes. This judge was put on the bench by workingmen's votes, for most of the voters of Connecticut are workingingmen. They merely accepted the candidates whom the capitalist politicians put forward. Nevertheless, it is by workingmen's votes that this judge has authority to deprive workingmen of their rights.

I f workingmen, by passively accept ing the candidates whom capitalist politicians select, can give judges power to aid capitalists in crushing trade ualong, then the same workingmen, by, actively supporting candidates choses by their own class, can give new judges the power to aid the trade unions in fighting the capitalists. IN THE TRADE URIORS.

Our work is the conversion of trafe-unionists to Sweinigum, not to ally our selves as a party with trade unions, which are composed of men of all shades of opinion. It may not be an easy task to convert them; but, how-ever that may be, they represent the best of the working class, and if we-could not win convert from among could not win converts from among them the outlook for the spread of So-cinist ideas among the working class at all would be a black one. For, if we can an would be trade unionists, those out-side the unions are not worth appeal-ing to. As a matter of fact, we as-winning our way among them. But we must not weary in well-dedug, and then we shall reap if we faint not.—London

Jean Baptiste Hall, the president of the union, Comrade Alex-ander Morton, called for a vote of the members to associate whether they desired to listen to a talk upon "Les-sons to Be Drawn from the Strike," by Comrade George A. Sweatland, our last candidate for governor. The response was unanimously in the affirm ative. Comrade Sweatland spoke for about thirty minutes, explaining the nature of the class struggle between the workers and the capitalists, and pointing out that the very existence of the trade union movement was manifestation of this class struggle. He particularly urged the necessity of independent political action in counse tion with membership in the unions and advocated the Social Democratic Party as the medium in and through which the workers should strive for their emanchation. His remarks were received with the closest attention, in terrupted by occasional applaum, and when he had finished his address a vote of thanks was tendered. While we declare that the develop

ment of economic conditions tends to the overthrow of the capitalist system,

we recognize that the time and manner of the transition to Socialism also de

pend upon the stage of development reached by the proletariat. We, there-fore, consider it of the utmost import-ance for the Socialist Party to support

all active efforts of the working class to better its condition and to elect So-cialists to political offices, in order to facilitate the aftainment of this end.

and food.

The Socialist Party of America in un-, as a class in their afraggle against the tional convention assembled, reaffirms its adherence to the principles of In-ternational Socialism, and declares its aim to be the organization of the work-ing class, and those in sympathy with it, into a political party, with the ebject of conquering the powers of gov ernment and using them for the pur eransent and using them for the pur-pose of transforming the present sys-tem of private ownership of the means of production and distribution into col-lective ownership by the entire people.

Formerly the tools of production were simple and owned by the individ-ual worker. To-day the machine, which is but an improved and more do-veloped tool of production, is owned by the capitalists and not by the workers This ownership embles the capitalism to control the product and herp the workers dependent upon them,

Private ownership of the means of production and distribution is responsible for the ever increasing uncertainty of livelihood and the poverty and nicery of the working class, and it division society into two hostile classes the empitalists and wage-workers. The once powerful middle class is papdly disappearing in the mill of cor petition. The struggle is now between the expitalist class and the working class. The possession of the means of Profileod gives to the expitalists the control of the government, the press the pulpit, and the schools, and snahle them to reduce the workingmen to a tute of intellectual, physical and socia interiority, political subservience and Tirtual slavery.

The economic interests of the can fallst class dominate our entire-social system; the lives of the working class are recklassly sacrificed for profit, wars are fomented between nations, indis-criminate singular is encouraged and the destruction of whole races is sauc-tioned in order that the capitalists may extend their commercial donting abroad and enhance their sepremacy

But the same economic causes which developed capitalism are leading to My cintism, which will abolish both the capitalist class and the class of was workers. And the active-force in bringing about this new and higher of-der of society is the working class. All other classes, despite their apparent of actual conflicts, are alike interested in the upholding of the system of petvare ownership of the instruments of wealth production. The Democratic Republican, the houngeois public owa crossip parties, and all other partie which do not stand for the complet verthrow of the capitalist system of production, are sike political zopre-mentatives of the capitalist class.

NEW YORK, AUGUST 18, 1901.

Notwithstanding the continued vague | trades are unusually busy here and the silk about the possibility of arbitra- effect of this action would be tretalk about the possibility of arbitra-tion and rumors-that the Aunigumated Association will soon make overtures or a settlement, there is no reason to doubt that the stool strike has passed the stage of negotiations and that it will be a long and hard hight.

There are noquestionally terrible, odds against the new. The Steel Trust is an enormously rich corporation, with powerful financial backing and with great political influence. Its officers and stockholders have only their pros-pective profits to lose, while the stric-ers have put at stake their very means. pective profits to lose, while the strictors have put at stake their very means of livelibood. Such odds are always spanish the workingusen in every strike, and that is why it is desirable that the working class, instead of despending upon the methods of union-strain alone, should add the method of admitted should add the method of independent political action, which hall where the offing mill men were promises infinitely greater results with holding a meeting. Again, the same infinitely less rick.

But in the present struggle, in spite of the overwhelming power of their fire, the strikers seem, from the most for, the strikers seem, from the most trustworthy reports, to be resulted and h. poful. They count upon the scarcity of skilled men, upon the sentiment of, loyalty and the intelligent s if interest of their fellows in the trade, and upon the sympathy of the whole working class. On this they have a right to deput a but if they cause a right to deput a but if they cause a mon "maille." pead, but if they count upon "public supportly" in general, they will be disappointed, so far as the bulk of the middle class is concerned. Nothing could be more disgusting than the coldblooded miliference with which the comfortably situated megibers of so-ciety view this battle. It is growing clearer every day that the working pasple can depend only on their fellow workers for sympathy and aid.

The situation is developing slowly. While it is true that President Shaffer's strike call was not responded to on Monday by all that should have oberrod it-notably in the Western mills -yet, on the other hand, it is to be re-membered that many, especially at Pittsburg, suticipated the order and went out last week, that many nonwing a fine spirit, and that con-

"LAW AND ORDER" IS NOW AN EMPTY PHRASE.

Two recent incidents in the labor were strictly within their legal rights, world have stirred the capitalist press to comment. The comment is most it- | and order to the winds and, not satis-

of McKapepert to give special police protection to the Steel Trust in its battle with the workers, and his deciscites that his considered imported -caba an "suspirjous characters." Nothing could 66 better justified by

the facts as observed in a hundred strikes than this decision of Magor Black. It is a well-known fact that while strikes may last for weeks without any disorder, the appearance of armed forces is almost hiways the sigant for disturbance. The inference is easy to make. It is an equally wellbusien fact that the men whom corporations arm and insport to break strikes are almost invariably recruited from the "toughest" class and are dangerous to the peace of the community.

But Mayor Black's action has called down upon him the slurs, the sucers, the denunciations of capitalist papers of every port. They talk loudly of "law and order" and describe Mayor Black as a blatant demagogue who is wantonly sacrificing public duty to a desire for popularity.

The other incident was the kidnenping of eighteen leaders of the Spanish cigarmakers' union in Tampa, Florida by an organized mob of "respectable

business interests of the town." They be far off.

ted with bidnapping the leaders, forcibly closed the soup houses which sympublisers had established for the help of the strikers and langed a proclamation threatening violant treatment of nuv/"labor agitators" who should further thwart their greed for profits.

Few of the capitalist papers have commented editorially upon this tacilent. But some of the loudest howlers for "law and order" in McKeesportrigh law and order secured by terrorhave gone out of their way to excuse and indirectly to preise the respects ble lynchers of Tampa.

Now we do not care much about the loyalty of either proceeding. Charles Summer well said: "Anything for human rights is constitutional." As & matter of fact, Mayor Black's course has been outliedly lawful and the course of the Tampa business men entirely, lawless, and the conduct of the capttalist press in desouncing Mayor Black and praising the Tampa rioters only shows their hypocriny, their contempt for all law that does not guard capitalist profits.

For us, we condemn the Tampa respeciables, not so much because they have violated law as because they have prouged the working class; and we praise Mayor Black, regardless of the legality of his action, because he has been true to the working class.

In Tampa, and these respectables have | public conduct of any man; is it in the interest of our class? That is the only and patience of the workers. No dis- | test to applied to-day. The newspapers have gone into hys inries over the occasional visience offered to scabe imported by the bosses to take the places of striking machinists, steel workers, weavers, or other vorkers. But none of them see anything very dangerous to "law and or der" in the deliberate conspiracy in Tampa, Fig., by which some eighteen leading members of the Resistencia Olgarmakern' Union were kidnapped and spirited away, no one knows where, and a "proclamation" posted threatening all labor agitators with lynching. All this, being in the interosts of capital. can be passed over with a smile. Workingmen may learn a esson from the contrast.

THE CALL OF DUTY.

We are having a good deal of jubilation and mutual congratulation within our ranks, furt now, over the result of the Indianapolis Convention. This is all right and proper. We have good cause for gladness.

But let us not think that because this s a sesson of rejoicing it is also to be a holiday senson. Let us not think that because we have actiled the "unity question" we have done our work. The munet opposite is the fact. It was worth while to work for unity, simply because unity would equip us so much better for our legitimate work of fighting for Socialism. Unless we bear this thought in mind and carry it out in action, unity will not have been worth working for.

Moreover, unless the party does its full duty in the class struggle it will inevitably find itself involved in new internal strugglek. "Satan finds some mischief still for idle hands to do." The only way to maintain unity, to complete and justify the work of the Indianapolis Convention, and to cement the bends of commission there formed is for the whole party, from the National Executive Committee down to the smallest-local or subdivision, to put forth its whole energy in the work of organisation and propaganda.

There is plenty to be done. The N. R. C. should at once be supplied with funds, so that it may send out speakers and distribute literature. Many states and cities have campaigns on hand which call for vigorous action. - The party-press is daily being improved in quality, and it in the business of the party to extend its circulation. Never was there a better time to work for Sc cialism than now, with unity accomplighed and with an interest in the inbor question aroused by the great butties of trusts and unions.

The last excuse for inactivity is removed. The Socialist who still sulks in his tent or dawdles by the wayside is unworthy of the name.

"A New Sympathizer" asks us what the red fing typities. The red fing has long been recognized as typical of resoit and more especially of the revolu of the tolling masses. It is commonly asserted that the color red in taken to represent the idea of international brotherhood, as the red blood flows in the veins of men of every nation and of every race alike. Whether or not this was the original meaning it is perhaps difficult to my. But at least the red ting has now come to have a definite meaning-to typify the revolutionary movement of the workers of the world. regardless of creed or tace, against the exploiting class and for the estab lishment of universal brotherhood. That is, it is everywhere recognized as, the emblem of international Socialism

> Mayor Black of McKeesport, Pa., has shown himself to be a brave and honorable man, a man who feels his require sibility to his brothers of the working class and is not afraid to do his duty. His declaration that he would not

give special police protection to the Steel Trust in importing scales to crush McKeesport sets a standard of official conduct that every liquinitiat abould heartily and openly endorse. He declares-what is the simple truth, and what repeated experience has proves--that the scale imported in time of atrike are suspicious characters; and he save-he, as mayor of McKeesport, will treat them as such. The bold position thus taken puts Maper Black in pleas ing contrast with the Van Wycks, Albridges, Carter Barrisons, Tum L. Very likely Mayor Black does not know much about Socialism. Very Black he thinks it a dengerous thing, But he has acted as a Socialist-as a man who has learned class-conscious of the working class in its daily struggles.

A New York paper, commenting on an article by Mrs. Schuyler . Vau Rensellaor, says: "It undertakes to make out a case for remaining in New York during the summer, a thesis which, no matter how ably handled, . revolts the human understanding." But these capitalist aditors find nothing revolting to the human understanding in the concenie system which compels the majority of the people. not only to remain in the city through the wammer, but to live in suffocating dens called tenement houses. That is all right. The people who live in the tenements do not count. They are only, working people.

It is pleasant to know that young Mr. Rockefeller is to have a nice little home given him by his thoughtful pana. The house will be of granite and murisle, and modelled after a caethe in the North of England. It will be a modest affair, costing only \$1,000, 000. The stable will cost but \$250,000. Furnishings and equipments will probably not exceed the cost of the build ings, for young Mr. Rockefeller, following in the footsteps of his father, is a great believer in industry and frugality. The mausion will be set in the midst of a little plot of two thousand acres in Westebester County, " "The estate will contain a great game and fish preserve, an artificial lake, waterfalls, gardens, and many miles of fine roadway, and will form one of the largest estates along the Hudson," say the newspapers. How the men who do the work for the Standard Oil Company and all the thousand and one oth er industries it controls should rejoice in this evidence of their prosperity!

VHIL-THE LABOR MOVEMENT.

The French Revolution and all the reat transformation of political instiions that went with it failed utturly to bring relief to the toiling is of the people. The only result of that payolistian was to destroy the newer of absolute monarchs, of feudal lords, and of the established church, and to put all power into the hands of the rising capitalist class. The men who had formerly tolled and drudged for a living and maintained the nobles and pricets in leisure and luxury, contin-ted to toll and drudge for a living no better and to maintain the capitalists. in leisure and luxury. The great revo-lution was found to have been merely struggle between the young capital ist class and the feudal class, in which bore the burdens. That revolution was, however, a stan

an end to the personal servitude or subordination of the worker and esthus eventually making it plain that the subjection of the workers depends. not on legal forms, but on economic facts. It gave full scope to the devel pment of capitalist private property. In other words, it made possible defining of class lines between t producers and the posses clear realization of the problem incolved—the abolition of private propcrty in the means of production as the cause of the poverty of the workers. this realization of the social problem. But the process began very soon after the revolution and showed itself in

what we call the "labor movement The labor movement has anneared in two forms so very different that it is necessary to speak of them separately -pure and simple trade unionism and revolutionary Socialism. By "pure and simple" trade unionism we designate the policy of labor organizations which do not recombse a sharp class antagenism lietween the capitalists as a body and the workers as a body and which, therefore, do not at least fully recognize the solidarity of the whole working class; but which, on the contrary, admitting the right of the empitalist to appropriate a part of the product of labor, simply strive to inown product without at all attacking the foundation of the wage system; and which, further, depend entirely upon the strike, the boycott, the label, and similar purely economic weapons rejecting the idea that the working men, as a class, should use their politi cal power for the overthrow of capital-

The pure and simple form has pre-vailed in England and the Finited States until within the last few years, But it is now rapidly giving way in both countries to the Socialist move-ment, which had already grown up in ontinental Europe

In England, until recent times, the election of public officers has been in the hands of large property owners. By the acts of 1832, 1967, and 1884, the franchise has been extended so that it is now almost as general as in the

But before 1832 the working people tury, they began to awake to the sta very under which they suffered and to rebel against it, there was but one course of action for them to pursue. That was to organize themselves into unions without any political character, samply for the purpose of demanding from their employers an occasional inwease of wages or reduction of bours treated such organization as compleon became evident that such action would provoke armed insurrection, so, in 1827, the parliament repealed the compiracy laws, and gave the workers a right to forth uni-Thus it came about that English up.

ferium at the beginning had nothing to do with politics. But it might be experted that after the referm hill of 1833, which extended the infrage ISSE, which extended the sufrage somewhat, the unions would have carried the labor question into politics. This did not happen for two reasons: First, the reform 14B of 18B2 did not infranchile many of the wage work-outranchile many of the wage work-outranchile many of the wage work-outranchile many of the wage work-off they had to wait thirty-dwe years before any considerable proportion of them got the hallot; second, in the period between 18E2 and 1887; a great-deal of legislation, for the protection of in-ber wan passed by capitalist parties. In the revolutionary move-ments of 1830 and of 1848 the working the first. class took an active part. And the Paris Commune of 1871 was distinctly a revolt of labor. Of these historical events we may say something at a later time. For the present, it is enough to my that during the last thiry-five years the labor movement throwshout Europe has become identical with the political Socialist ment. The unions are practically all Socialist and the Socialists are all unionists or union sympathizers. And a comparison of the history of unionism the two continents during that per iod, taking into account the diffe circumstances, will show how much more effective is Socialist than pure and simple trade unionism

The development of capitalism in England and America has now brought about conditions similar to those of continental Europe. Our delegater freelively upheld the S. E. F. from the attacks made upon if by cartain delegates from the Socialist Labor Party, and, potwithstanding, the threats and boasts made by the representatives of that party, our delegates were seated as representing a chas-conscious, revolutionary florislist party, much to the filegust and displeasure of the S. L. P. delegaton.

In order to defray the expenses of the delegates a special tax equal to ten cents per member was levied by the N. E. C. and the amount collected for this purpose the balance of \$113.95 was placed to the credit of the general lation purposes.

On the eighth of August last, year the N. E. MEMBERSHIP OF M. E. C.

In accordance with the constitution of our party, the N. E. C. at its session held on December 20 last, called upon teh organizations in the various states Council, and the following comrades were reported as having been elected as mumbers of said council: Chas. L. Fox. Maine: P. V. Danahy, Vermon; John C. Chase, Massachusetts; Frank Van Dyck, Connecticut; Alexander Jonns, New York; J. Mahlon Barnes, Pontssylvania; R. T. Magrumber, Maryland: Max 'Hayes, Oble: Caleb' Lips omb Missouri; Geo. B. Leonard, Mis-caota; Chas. L. Wallace, Washington; the other states in which our party is organized did not report the election of a member to serve on the National Council, so that our National Council at present is composed of but eleven members. The chief duty the National Council had to perform was the electing of candidates for the N. E. C., as the term of the Provisional National ing candidates were elected by the Na-tional Council, all of whom agreed to members of such committee by the party membership: Morris Hillquit, Leonard D. Abbott, Henry Slobodin, Wan. Mailly, I. Phillips, and Henry Wank of the state of New York; S. M. Jones, Geo. Wrenn, Chas. M. Fonner Pavid Goldstein, Wm. Edilu, and Fred. Tepper of Massachusetts, and George A. Sweetland, Artistr B. Corpelitis, and Anton Frank of Connecticut. As the National Council was unable to complete its work of electing candidates who would accept on the E. C. until late in the month of May, it was deemed by them expedient and economical not to submit the names of the candidates for the N. E. C. to a referendum vote of the party membership, in view of the nearness of the approaching National Conven-

Ac-hott of New York: vacancy caused by the resignation of Morris Enplan was titled by Goo, Wrenn of Springfield and vacancy enned by resignation of Wm. P. Lonergan was filled by Gos. A. Sweetland of Bristol, Conn.

After the reah of work caused by the national campaign was over, the . H. C. had an opportunity of examfuing its accounts, and found that the purty was indebted to its printer and to againties to the extent of \$727.65. In order that this debt might be speedily paid, so as to allow the party he continue on its programive course with: A heing immered by debts of any kind, as assessment to the shours of often cents per member was levied spen all locals of our party, through which the amount of \$162.05 was raised and stillsed for the purpose for

which it was collected.

After seeing the good work accomplished by Comrade Vall in the cast era states, the N. E. C. was desirone procure the services of Comrade Geo D. Herron for an Razbern tour, in which they were successful. Meetings were arranged in eight of the larger cities of the states of Massachusetts, Connecticut, New Jersey, and Penn-nylvaula, all of which proved to be very successful and entinetants. Spe-cial contributions were made by the le-cals under whose anaptes these meet-ings were held, which amounted to \$60, out of which the expenses of the tour, which amounted to \$70.12, were paid, and the belance of \$9.87 was turned into the regular fund of the party. party.

DECK-AND AGITATION.

With the approaching of the present summer season the R. H. The commutes of Local Dayton report that his work there has set be seen at the next election by an in-creased vote for the candidates of the 8. D. P.

Your M. H. C. further reports they during the past year 15,000 due stamps have been ordered, and the greatest portion of them sold to our locals and state committees. There are about 2,000 due cards on hand at the present time. Ten thousand constitutions have also been bought, and all of them said to the locals and state committees. Tweety thousand application bimple have been printed and at present the N. H. C. has about 2,000 on hand.

Realising the incountry of nevting out-pintform in the Italian language, sev-eral thousand copies were printed and distributed. The thousand landers, "How to Organies Locale," 5,000 letter-bends, and 10,000 curolopes were used by the N. H. G. during the past year.

tional convention assembled, reaffirms its adharence to the principles of in-ternational Socialism, and declarer list aim to be the organization of the working class, and those in sympathy with it, into a political party, with the object of conquering the powers of gov-ernment and using them for the purpose of transforming the present system of private ownership of the means of production and distribution into collective ownership by the entire people

Furmerly the tools of produ were simple and owned by the individ nai worker. To-day the machine, which is but an improved and more developed tool of production, is owned by the capitalists and not by the workers This Sweership enables the capitalism to control the product and keep the workers dependent upon them.

Private ownership of the means of production and distribution is respon-sible for the ever increasing uncertainvides excisty into two hostile classes -the capitalists and wage-workers The once powerful middle class is rapidly disappearing in the mill of competition. The struggle is now between the capitalist class and the working control of the government, the press, the pulpit, and the schools, and enables them to reduce the workingmen to a state of intellectual, physical and social inferiority, political ambarryiance and

virtual slavery.

The economic interests of the capitalist class dominate our entire social system; the lives of the working class are recklessly merificed for profit, wars are fomented between nations, indis criminate slaughter is encouraged and the destruction of whole races is more tioned in order that the capitalists may extend their commercial dentition abroad and subance their supremacy

And the active force is beinging about this new and higher der of society is the working class. All other classes, despite their apparent or actual counties, are alike interested in the upholding of the system of paivate ownership of the instruments of wealth production. The Democratic, Republican, the hourgeois public ownership parties, and all other parties which do not stand for the complet verthrow of the capitalist system of production, are slike political representatives of the capitalist class.

collective powers of capitalism, by con-situting themselves into a political party, distinct from and opposed to all parties formed by the propertied

ment of economic conditions tends to the overthrow of the capitalist system, we recognize that the time and manner we recognize that the time and manner of the transition to Socialism also de pend upon the stage of development reached by the proleterist. We, there-fore, consider it of the utmost importfore, consider it is to support ance for the Socialist Party to support facilitate the attainment of this cod.

As such means we advocated .1. The public ownership of all means of transportation and communication and all other public utilities, as well and all other probe controlled by mon-opolies, trusts, and combines. No part of the revenue of such industries to be applied to the reduction of taxes on property of the aspituist class, but to be applied wholly in the increase of wages and shortening of the bours of labor of the employees, to the improvement of the service and diminishing the rates to the consumers.

the rates to the consumers.

2. The progressive reduction of the hours of inbor half the therease of wages in order to depresse the share of the capitalist and libration the share of the worker in the product of hibos.

3. Rate or national laurence of working people in one of nections, lack of employment, sickness and wagin old age; the funds for this purpose to be erdirected from the revenue of the capitalist class, and to be administered under the control of the working class. under the control of the working class

4. The manguration of a system of used for that purpose in order that the workers be secured the full product of

to the age, of eighteen years, and state and municipal aid for books, clothing, 6. Hqual civil and political rights for

men and women.

7. The initiative and referendum. proportional representation and the right, of recall of representatives by

their constituents.

But in advocating these measures as steps in the everthrow of capitalism and the establishment of the Go-operative Commonwealth, we warn public ownership movements as an affitempt of the capitalist class to secure governmental control of public utili ties for the purpose of obtaining greater security in the exploitation of other industries and not for the amelioration The workers can most effectively art , of the conditions of the working class

The newspapers are making the most of very alight disorders which have occurred at Monomen and Wellsville to prejudice the public mind against the strikers. mee to The -Worket.) McKEESPORT, Pa., August 18,-Nothere else in the country has the Steel Receport. It is doubtful if any city anywhere is so completely at the mercy of a single corporation as this one. Except at a time like this, when the workers show they also have romething to do with running the works, the trust dominates the industrial situation. The mills are the life business follows suit shortly There are a few coal mines in the vice inity, but the city draws comparatively little from them. The wages of the sall workers are the feeders of commerce and industry. The effect of a atrike which closes all the mills and atom the outflow of wages can there-fore be appreciated.

There is, I-learn, but one mill which

There is, I learn, but one mild which is not directly under the control of the trust; it is operated by an independent company which manufactures projectiles and employs few men. The Trust mills are as follows: The W. Dewess Wood plant of the American Sheet Stref Company, employing about 1,200 men. Manufactures sheet atmid and mon. Manufactures short atrel and putent planish from which takes the place of locomotive jackets and the famous Russian Iron. Only place in the world where this patent plantsh tron is made. It was started in 1931 pany, and then covered one acre and employed thirty-five men. It now covers nine acres and its capitaliza-tion runs up in the millions. The strike has been on longer here than anywhere en man were discharged recently for lelonging to be union. This grievance was barely adjusted when the men came out after the Trust refused to sign the scale. This is the plant which the Trust has threatened to remove

The National Tube Works in the The sentiment of the men, as observed by the special correspondent of The Worker, is growing more and more radical, independent political results and standard and the National galvanising works at Version is twink talked of with general approach to find the National galvanising works at Version is twink talked of with general approach to the national galvanising works at Version is twink talked of with general approach to the matter party are responsible for this misconception, but that it exest tube works in the world, employ through the men's unexpected action in joining the strike has caused con The adoption of the union scale for this plant will mean much to the:

this plant will mean much to the it workmen concerned.

The United States plant of the American Tim Plate Company, better known as "Demmier," employs about 400 men. The plant is one of the amailest in the country. Tributary to these plants are workmen in other.

Of course the stronger the Trust became entrenched in McKaesport the atronger became the sentiment against it. At first capital was encouraged to invest by the offering of special fuducements, taking the usual form of low valuation and taxation. Naturally the capitalists took full advantage of these partileges and prospeed, fluday, the Trust mills are paying taxes on an assessed valuation of only 4 per cent of their real value, while like workingman who owns a house pays on three-fourths of its value. But the Trust is not entified with this; it continually wants more, forever demanding new grants of streets and mere tavore of the same sort. And it musually gets what it wants, though not with.

Notwithstanding the strong anti-trust feeling there does not seem to be any definite idea as to what should be done with the trusts generally, and this one in particular. The people seem to be fighting blindly a power which they know is dragging them to destruction. There is no cohesiveness in their resistance to the irresistible though that draws them to treat and storce that draws them to itself and that sucks up their vitality. There is no exaggoration in saying that the pes-pia of McKeesport are struggling in the tentucies of an octopus of their own making. There are very few who appear to know how to overcome the octopus. Mayor Black is certain-ly not a Socialist. He has evidently taken his present stand principally be-tause of his detestation for the Trust and his sympathy for the workingmen. And the workingmen are with him,

there's no doubt of that. . What is needed in McKeesnort is of treation of the right kind. At no time previous have the workingmen mani-lested such a spirit of solidarity or such a desire to read and learn as now. it will not be hard to have then before there can be permanent relief. Private ownership of trusts, of all industry must be sholished and owner-ship by the people must take its place. They must learn that without a central motive their voting for anti-trustickets will result in nothing. When they learned what Socialism is, that is is not the horrible scheme the oppo-nents to Socialism would have them believe, they will vote for Socialist workingmen upon the Bocialist Party

workingmen upon the Bocialist Parry ticket, and for none other.

I have spoken before of the sentiment existing here in favor of independent voting. It manifested itself last sight at a big mass meeting in the opera house. Every allusion made by the speakers to independent political action and to the necessity of electing workingmen to office was loudly cheered. If that sentiment is carefully nurtured and well directed the working class of McKeesport will soon be vuring for Socialism.

Many have confused me with the agintors, or entire juriske breakers," of the Socialist La hor Party, which has sarned just dis repute through its tactics toward the deade unloss, in and out of trouble. To make matters worse, many workers degre have believed that the Socialist Labor Party was the ally of the trade largest plant and includes as auxiliary plants, the National rolling mill, the National rolling mill, the National Steel gankation, the Socialist Party, was ganisation, the Socialist Party, was supposed to occupy the position that the Socialist Labor Party dges. I do with the latter party are responsible for this misconception, but that it ex-mes I can bear testimony. This has compelled me to explain our position

mak from no other source than the So qialist Labor Party itself. Last night attended by about 300 people, a large-mamber of them boys. The subject un-der discussion was "What can be won-by a strike," a title which explains, itself when the S. L. P. attitude is conmown as "Demmin, is one to an allow the plant is one to these plants are workness in other crafts who are also idle. There are various conjectures as to the size of the weekly pay roll at these mills, but it is probably close to \$300,000.

Of course the stronger the Trust became entrenched in McKaesport the came entrenched in McKaesport the heams the sentiment apprint the R. L. P. bosees. of of the Amalgamated Association for Holp in the Battle with Stool Trust.

To Members of Organized Labor. Brethren:—As you are undonbiedly ation are now waging a war against organized labor by making the Amni-gamated Association the subject on which to begin operations. At our but convention it was unanimously di rided to ank the United States Steel Corporation, when settling their an nual scales with the Amalgamated Association, that they sign or recorifine the scale of the A. A. in all their milis. When the matter was broach ed, the request was peremptorily to funed. After the holding of several conferences the demand of our ergani-action was modified so as to take in only the units of three of their coa etituent companies, ris.: The American Sheet Steel Company, American Tin Plate Company, and the American Steel Hoop Company, where local lodges had been formed, and where the men were very destrous of being union men, and are now out on strike

In the conferences which were held by representatives of the United States Steel Company and of the A. A., the representatives of the United States Steel Company's only arguments were that they did not desire the Amrigam-ated Association to become too power ful, a We urge that the boycotts of the muce of power. Later conferences were held, with the heads of the United States Steel Company, who submitted a proposition that we only sign for the mills signed last year, with the exception of the sheet milis in Salthurg and Scotdale, which were signed for the year previously. Their, proposition was rejected, as it meant that the Amaigamated Association would mere is have to remain in a quiescept state, while they were expanding and adding to their non-union possessions.

They are waging a fight for the extensionation of the Annichmented Association and of the rights of week-ingmen to combine, a principle which they have demonstrated to the people of the United States that they desire for themselves, and so persistently refuse to grant us. This blow is not alone time-ted at the Amaignment Ansociation, but at organized labor in general, and should they succeed to defecting the A. A. It will effect even organized body in the United States.

in view of the widespread talk about "practical Socialism in New Zoaland" which Heary D. Lloyd and others have indulged in of late, Comrade La Monte's account of social conditions there will be interesting. As the "Ap-peal to Reason," which has sung the praises of New Zealand quite freely, assigned his sojourning there as a sufficient reason for not carrying out its original plan of sending a special presupondent to investigate, we presume that his report will command the attention even of those who have been wont to look to the other side of the world for a model Socialist move

On this point Comrade LaMoute writes: "As far as I can make out-the radical movement here (what Lloyd calls the 'Eevolution of 1896') was a class struggle between the small farmclass struggle between the small tarners and the big land-owners. The small farmers at first needed, the support of the city workers; hence the labor pregram, compulsory arbitration, and the greaf consideration still shown by the covernment to trade unions.

"But the city worker is relatively of infinitesimally small importance in this grazing and agricultural colony; and now that Dick Seddon, the Liberst Bryan and Croker in one, has a me Bryan and Croker in one, has a ne-jority so big as to be unwieldly, i louk to see the city worker given the "mur-ble heart?". In fact, the also-densest is the artification law which. There is no Socialistic-that is, no class-conscious-feeling bere; and, in deed, the proletarians are probably not a majority here, as yet, so that agita-tion would be difficult. We must await the economic development. The count ter is new, with a cruder, rawer, more

"But yet, with all the work of developing a new country to be done-forest for bush, as they call it; to be felled, fields to be cleared of stuniss, and roads and railroads to be built there are large numbers of workless men (not tramps, but decent working-'rring their 'swag' (all their property, usually little more than a pair blankets) on their backs, and looki for work. This is astounding when you consider that there are only some three-quarters of a million people thaif the population of New Jerseys spread over an area much more than double that of the state of New York.

The government labor department ces not do half the things Lloyd's colt said it did. It confines itself alpost exclusively to furnishing men to the railway department for construc-tion work; and if a sien is not an ex-perienced pick-an-shovel hand, and often if he is not married, the departuent will do nothing for him. The or dinary man out of a job has to go to the private employment agencies here an elsewhere.

WHY DO WE SUPPORT THE STEEL STRIKE? We have been naked two questions | over again. We do wish to see the

in regard to our position on the steel strike, both of which deserve reply. No doubt the majority of the Socialists of the country would answer the quesijons just as we shall, without waiting for our opinion. But it is worth while, to take their im here, that our post- the trust, but because we wish the detion may be understood by workingmen outside the party.

One correspondent asks us: "Are we justified in upholding the tactics of practical opposition to trust development? Are we right in encouraging strikes, on a large or small scale, secing that it retards the progress of the main tide of practical socialistic growth by opposing the march of concentration of capital?"

The other reminds us that President tive supporter of the Republican party and that the pariority of the manhers of the Amalgamated Association vote the Republican ticket, and asks: "Ho can we support these men in a strike when, at the ballot-box, they oppose us and support Morgan's party?"

Let us take the questions in order. It is true that we, as Socialists, welcome the trustification of capital, because it prepares the way for the socialization of capital. But we do not love the trust for its own sake. The trust is inevitable. It is folly, there--fore, to attempt to prevent trustification, as Bryan would have us do. The trust may be a worse master

than the thousand independent capitalists who preceded the trust. It may he or may not be. But sooner or later the trust comes, in spite of all Populistic protest. And the sooner the trust comes and completes its work of organizing industry, the sooner will the working people make up their minds to make it a public trust and the more easily they can do it.

That is why we oppose the sati-tree But does it follow that we should wish the trust success in its huttle

The trust is not a good thing in itself -except for the capitalists in the trust. For the other people it is a bad thing in itself. It will become a good thing for the whole people only when it becomes the property of the whole peu-

And who are to carry on the battle to make it the property of the whole people? Who but the working class? No others can or will. -

It is therefore necessary to have a strong, organized, aggressive, self-reliant, working class, in order that the work of the trust, now so injurious to shore outside, may be turned into a benefit for all. And it is the duty of the Socialist to do all in his power to strengthen the working class, to organine it, to make it aggressive, to inspire it with resolution, so that it may the sooner carry out its mission of dethroning the capitalists and setting up the Co-operative Commonwealth.

Never think that the trust areter will spontaneously grow into Social ism, without the efforts of the worklog class. It must be conquered beadalah masidha bilanda nower.

succeed in any fight against the trust, an the Bryanites do, for that would be to put us back and begin the process

fight, for every much partial victory of the workers brings us nearer to the final victory, the telumph of Socialism,

To sum up: We oppose the antitrust agitation, not because we love velopment hasteried instead of delayed. We support the present striks against the trust, not because we wish to see the trust destroyed, but because strengthened for its victory over capi-

And now for the second question: It is probably true that the majority of the members of the Amaigamated Asociation have voted against us and for the party of their masters. Some of them have learned better since last election; but perhaps the majority will ven do it once or twice more,

That is wrong on their part. It is very foolish for them to vote for either of the eld parties which support the capitalist asstom they suffer under. We are very serry they do it. We hope they will rapidly come to see the folly of it. We shall do our part in the work of convincing them that the only way for them really to emancipate themselves is to vote themselves into possession of the mills their labor

But that has nothing to do with the duration of our daty to help them in

The Socialist Party has, after long and careful discussion, endorsed the principle of trade unionism and declared first Bocialists, as individuals, ought to foin the unions of their crafts and, as a body, ought to support their fellow workers in all their struggles.

Did we adopt these resolutions in order to "entch" trade union votes? Did we intend to may to the trade unionists, "We will help you in your strikes on condition that you help us at the ballot-hox?" If that had been bed as Tammany.

But that was not our motive. . We have declared in favor of trade union on because we honostly believe that it is a good thing, for the working class. We declare in faror of into pendent political action on the Sociallet platform because we honestly believe that is a good thing for the working class.

These strikers are our fellow worldingmen. The fact that most of them have voted against our party does not in the least absolve us from our duty to stand by them in their battle. It is their duty to use both the trade maion method and the political method to secure emancipation. Our duty is the same. If they have not done the whole of their duty, all the more need that we do the whole of ours, --- ".

Not only for the immediate benefit it may give, but also because it is a part of the class struggle that is to bring il. Socialism, we support this strike. We extend to the strikers our warmest sympathy and our heartlest rongratulations on the resolute spirit they have shown. We bid them, too hold." We wish them all success not for their sake alone, but for our sake, for the sake of the working class -not for the present alone, but for the future, too.

WHAT WILL YOU DO WITH YOUR CITY!

The concentration of the population nto large cities goes stendily on. In 1190 there were 28 sities of 100,000 or nore people; now there are 38. Then there were 58 between 50,000 and 100,u00; now, there are 78, Then there were 134 between 25,000 and 50,000; new there are 161. In 1950 only 12.5 per cent, of the people lived in cities; in 1860 the proportion rose to 16.1 put est.; in 1870, to 20.9 per cent.; in 1480, to 22 d per cent.: in 1800, to 20.2 per cent : and according to the census of 1000, no less than 38.1 per cent. practically one-third of the population. lival in cities of 5.000 people or more.

In the face of such a steady progress ns this, extending over half a century, the advice of the comfortable philanthropists, that the poor people should ienve their tenement dans and go, to the country, becomes supremely ridicaous. It is probable that many individunls make a mistake in going to the cities or in leaving them, as the case may be. But it is simply inconcelvable that the whole population, during fifty consecutive years, should have steadily followed this concentration upless economic forces impelled them to it. We are becoming a nation of city, dwillers, and we shall become more so as the years go by, unless econamic conditions are greatly changed: The-forces which have driven us into the cities keep us in the cities, and we must make the best of it.

Along with this growth of cities has come a parallel growth in the importance of municipal questions. Not only are a larger proportion of the working people in the cities now than ten or thirty or fifty years ago, but they are worse housed than those who were then in the cities. The increase of consumption and the frightful infailt death-rate in the tenement districts arbsmong the fruits of this unavoidable concentration.

It is easy for those who live on Fifth Avenue and spend their summers at-Newport to advise the working people to so to the country. It is impossible for the working people to follow their advice. And the comfortable philanthropists, . If . thay . realised what . It means, would not wish the workers to take such advice. Fifth Avenue lives on the misery of the East Side. Its contly garments are paid for by those who go in rags on Hester street; its sumptuous tables are spread by those who me hungry on Eldridge of Forsyth; Its stately mansions could not exist with out the dismal tenements of Cherry Hill: even its fresh air injulies the pertilential vapors that breed disks or wherever the working people find

SCIENCE AND IDEALS.

A writer in "Advance" begins his article on "Social Ideals" with the words: "I know it is not strictly fedentific' to have ideals, but I frankly confess that I cannot help it."

No doubt that is what Artemu Ward used to call "a goak." But up fortunately there are not a few among vis who really believe that "it is not scientific to have ideals." According to their temperament and their surroundings, they decide, therefore, eith r to alripre science or to deny their ideals.

As a matter of fact, this is a most absurd position to take. The study of science ought to lead anyone to recognise the power of ideals and their perfectly legitlmate place in social move ments. It ought also, of course, to show anyone the limitations and the tangers of idealism

What is an ideal? It is the nicture which we form in our minds of a state to be attained, an end to be reached -or, at least, to be striven for-an ob ject to which our efforts are to be directed: The vary-fact of conscious offort, of intention, implies the holding of ideals. Our animal ancestors had the power of forming ideals in but a very slight degree, if at all. As a savage, man's ideals were crude and vague. All through the ages, just in proportion-as he learned to under thand the world around him and the world within-that is, fost in propor tion as science has grown-his ideals have become luftier and more definite and have exerted a more powerful in buence on his conduct., In one application of it, that is simply to say that society is steadily becoming self-con-

There is always, as Spencer remarks "a soul of truth in things erromeous." There is a kernel of truth-or, at least half-truth-in the doctrine we have had so violently preached at us, that "it a unscientific to have ideals." If we forget that each of us is but a part of his class and a part of society, if we forget that man is but a part of the porld in which he lives, if we forget that man's conscious life is but a part of his being and his ethical and intellectual life but a small part of bis conncious existence, if we forget that men's brains are effected by their are the product of their experienceif, therefore, we fancy that we can make the world over on any plan evolved sut of our inner consciousness. regardiess of sectal and other matural fonditions and tendencies-then, as enrectly, we are not acting in accord with the teachings of science. A MIND RESIDENCE.

In another column we publish a letter from Comrade Kerrigan of Texas. calling for action upon - Comrade tional Houselist Conference, somewhat upon the keneral plan of the reform conferences held at Buffalo and Do-

His idea appeals to us as an excetlent one. A. great need of our move ment is some institution which will make possible a closer personal ceribeetion among the comrades of different parts of the country. Especially do we feel the uned in the United States. because the country is so large and the conditions—geographical, racial, secial, political, and industrial—are so widely different in the various sections. So cialists from New England, from the Central states, from the South, from the Bocky Mountains, from the Pacific Coast, should have some means of meeting, exchanging ideas on questions of import to the party, giving each other the benefit of their varying experience, and-as is often necessary learning to know each other and disshusing their minds of prejudices and mbunderstandings.

The peed is satisfied to a very slight extent by conding out organizors for tours through the whole country. It to our country, indeed, that great as is the value of agitation work done, the greatest benefit derived from such lours is in this exchange of personal influence. But this is not enough.

'Our national conventions are always overloaded with work so that there is little time fer personal intercourse Moreover, they are called upon to take definite action, and cannot discuss the various questions in the free and full way that is desirable. Still more than this is needed. "It is to be hoped that the National

Executive Committee will be able to arrange for such a series of national conferences, to begin next summer They should be entirely unofficial and yet distinctly Socialist gatherings, the objects being two-fold: The forming of a closer acquaintance among the Bocialists of the land, and the serious discussion of such questions as may be penpying the minds of the comrades. For instance, there is the question of 'immediate demands." This question has been discussed in the party press but in a desuitory and superficial way. It was discussed very earnestly at the convention, but, of necessity, hantily and turompletely. There is not much to be said before those taking the two or more sides of the question will thoroughly understand each other. Suppose this were taken as one of the toples for such a Borialist Conference The arrangements committee could so lect two or three of the blest advocates on each side, who should prepare careful statements of their poition. They would have months for preparation. Their papers would assuredly be listened to with the greatest attention and there would then be opportunity for questions, for comaccimony and the mutual misunder standing which commonly accompanconvention debate under the influence of haste and the parentalty of prompt

action. The economic position of the farmers, the position to be taken toward. them by the party, and the methods of gitation to be used among them, furnish another question which could prefitably be discussed at such a confer ence. The negro question is another and many others will suggest them setves at once or will arise from time

THE CHOICE DEFORM THE POPULISTS.

We reprint elsewhere a brief o nent on the Indianapolis Convention by the "Southern Mercuag," a Populist paper, published at Dallas, Texas, and edited by Milton Parks The "Mercury" seems to be of the opinion that our convention did nothing that the Populists would not endorse and declares that, "upon this ground, Populists and Socialists can ad togethe and work together." We imspect that the "Mercatry" has falled to grasp the situation, that It does not appreciate the revolutionary spirit which domi-

nated the Indianapolis Convention. But if the "Morestry" speaks with authority if it he true that, upon the ground taken at Indianapolis, Populists and Socialists can set togeth and work together, there remains nothing for the Populists to do but to enguli themselves as members of the Socialist Party. Surety nothing can be gained by maintaining two party organizations, if they have a commou and in view. All that can be accounplished by such separate organization ts a waste of energy, a division of the vote, and the maintaining of old preju-

Perhaps the "Morcury", will ask: "But why should we join you?, Why should not joth us, instead." And the answer is that the Populet Party is -as the "Moreory" must by this time know-doomed to die sooner er later. Better glie a voluntary death now, by merging Itself in a strong and growling movement, then go on to a lingering and painful cut. The Populists themselves are discussing, 'ha the colunns of the "Moreury" and other papers of their party, whether it is worth while to keep up their organization. The viscy fact that such a question an he raised among them prover the party to be near its fall. . No one hears a Socialist discussing the advisability of keeping up the Socialist Party.

The fact is, Populism-never an alto gother healthy infant, but yet strong and precocious-received its deathblow seven years ago in the fusion process. It never recovered from that shock and it never will. The efforts of leaders some of them able and honest, undoubtedly-have, from time to time, galvanised it into the appearance of life, and may do so again. But it is only an appearance. The life is not there. The moral enthusiasm of the People's Party of 1800 has never revived. That spirit of resolution, of devotion, and of hope—the characteristic of a living movement-has passed into the Socialist movement, there to abide so long as the Socialist Party remains true to its rule of "No compromise."

The Populists are evidently not agreed among themselves, Their platform of 1900 is a compromise between opposite tendencies within their ranks. And the loss of votes was the legitimate result of that compromise.

The question is one for each Populat to decide for himshif. Bither he is a there is no reason why he should stay outside the Bryan Democracy. If he his he belongs in the Socialist Party, in the party that is not afraid to call itself by its true name, in the party which is free from all records of fueion, in the party which is growing instead of waning, because there and there alone he can do the best work for the range.

SOCIALIST * ECONOMICS.

Boing all Attempt to Present the Main Principles of Scientific Socialism in Popular Language.

IE. WHAT IS REVOLUTION.

When we tell our follow-workers hat there is no hope for these but in-recouling, many of our houses are frightened." They jump to the conclu-sion that we advocate the use of turch and bomb. And our "respectable" byponents, who know better, do their ot to foster this missanderstanding in us. It is amusing to note that smon the people who denounce Socialism cause it is revolutionary are many who proudly trace their own ancestry back to the heroes of '76 and boast of their nown revolutionary blood: It seems that, in the estimation of these gentlemen, revolution is a very beautiful thing in the past and a very terrible thing fr the present. More correctly we might say that they approve of the revolution which has put them in power and dread a revolution that would dislodge

Since these people have so long had the ear of the American people and have succeeded in establishing such a deep-scated prejudice against revolution, it is necessary for in to devote some space to explaining the meaning

has or should have absolutely nothing to do with the one of force or violence. Some of the great revolutions of his-tory have proceeded without the use of violent methods. And, on the other hand, some of the most violent and turbulent movements have been, not revolutionary, but distinctly reactionarr in their character. The bloodiest pages of the world's history are non those which record-the risings of oppressed classes against their oppressors, not those which record the move-ments which heralded the future. They are the pages that tell how the oppressors crushed those risings of their med clabses against their in evitable fall.

In the second place, there is absolute ly no contradiction between the idea of evolution and revolution. If the word evolution means anything at all It signifies the accessary and irresisti-hie process by which everything in the world—material and intellectual—is de-veloped. And if the word revolution means anything at all it signifies one of the great steps in that evolution, one of the processes by which avolu-tion goes on, one of the great crises to which the quieter evolutionary pro-cesses from time to time lead up. The people who cry: "Let us have evolu-tion, not revolution," are generally rople who have but the most super-rial understanding of either word. The opposite of revolution, let it be people who have but the ficial understanding of el

understood, it not evolution but retion. The character that distinguishes any social movement as revolutionary is not its suddenness and violence, but its inevitableness and its co ness. Every reactionary tendency, every resistance, to the natural course of social development, is doomed to fallure.' And for this reason it is that reactionary movements are as com-monly violent and bloody. Let us give few examples; One of the most violent and turbulent

movements of history was the Peacants' Revolt of the chriy sixteenth century in Germany. Yet this movement was especially a reactionary one. The principle upon which all social institu-tions in the Middle Ages were founded wasowsership of land. Only those who ewned land had any part in the gor-ernment of the state; to them all obsitince, all bonor was due. But during the sentury preceding the Peasants Bevolt certain new elements had ap-peared in society. For various rearoos, which cannot be explained bure for lack of space, tile greater police had grasped all power in the German empire, excluding the smaller proprietors-knights and pessants silke. old feudal idea of reciprocal rights and of commercialism. Austrat changes the pensants rose in revolt. They burned the castles of the good; They burned the casties of the great lords, killed many of the lords when down with a barbarity which ou the savagery of their own revolt. And for what was it that these peasants rebelled? Was if in furtherands of the turn to the condition of earlier tip They demanded a re-establishment of the old principle of feedal laudlordism, of the principle which based all right, all authority, all hones, on the owner-ship of land under the founds form.

The Peasants' Revolt failed because it The Francist Revolt falled because it was fact a revolutionary but a reactionary movement. Much as we must sympathise with the opposed pea-onts, drives to desperation by the hardships incident to the change from

If it could have succeeded, it would only have postponed for a little time the necessary could of the capitalist system, a singe through which society had to pase in its evolution.

In the most century came a great political movement in Burlend. The government of blaste of we up to the indicate of the sevent-sort century in the hands of prooficilly absolute measurement of the great landed propriators. The Partian Sevention, which begin in 1846, decaptured the bing in 1846, decaptured the bing in 1846, and established the Protectorate of Oliver Oronavell, was seemitably a gavelt of the rieing summercial and manufacturing clare against semi-facilities. In the same, way the convenience which, in 1789 and the following years, everthrew found monarchy in France and throughout western Ec-rope, was a truly revolutionary move-ment. Like the Puritan Revolution in England, the French Revolution or pressed the determination of the capi talist class, which was already the economically dominant class, that it should be likewise the politically domi-

agut cines.

The Paris Commune of 1871, again was a truly revolutionary syunt. The violume, the cruelty, the brutality, in 1871, was on the side of the reaction-lain, who crushed the Commune. And conditions had so changed between 1789 and 1871, that the party which hi 1789 was revolutionary was in 1871 re-actionary. A new class had appeared in society—the proletariat, and the old foudal class had disappeared. The class which in 1780 rebelled against foudal rule had by the success of the great revolution made itself the ruling does. Bull of the onthusiasm of revolt gained power than it changed its coat and loudly condemned revolution as the deadly enemy of civilization. . So in 1871 it played the part which feudal nobles would willingly have played eighty years earlier. It was now the turn of the working people to re-volt, to pusseh revolution, to fight for the overthrow of existing society, to help to esher in the new age. Reaction triumphed in 1871—for the

time. But the revolution was not rushed, as revolution never can be permanently crushed. The Cou sands. But their spirit still lives, not in thousands, but in millions of proletarian branch. The Commune was that heralded the coming day. Ob cured for a time by must and clouds R is again burning forth in yet great cr brightness. The whole horizon is now red with the dawn. The Social Revolution, so long dreamed of, so long dreaded by masters, so long hoped for by the oppressed, is fast approaching its crisis. Whether that crisis is to be nasters-the doomed masters-have it in their power to decide. For us, we go steadily on, glad of peace if we may have it, ready for battle if it is forced apop us, exuiting in the confidence of ctory assured.

CONVENTION COMMENT.

louthern Mercury (Populist.) The Socialist convention at India melic her done exactly what the "Moreury" hoped it would do. A meeting is going on, and some one has made an

appreciated point. The situation in McKeesport is noth ing less than remarkable. Before the strike came on, organization was prac-tically dead. It had been so since 1894, two years after the Homestead affair, when a strike was lost. Since then the Amalgamated Association had small footbold in McKeesport, and other crafts were disorganized. For seven years the steel workers have serm years the seed workers have been at the mercy of their employers, and while the latter have grown money bloated, the men have had to work harder and hardes. Improved markinery has been infroduced and increased the product of the mills, but wages, have not increased in proporthe scale in the Allis-Chalmers works at Chicago. These men, who took the places of striking machinists, have-been living in the factory and the comtion, is most instances have remained stationary. Improved machinery has meant-increased speed, and while in union mills the workers have enforced some advantages, here the employers have gotten the full benefits. But the men of McKeesnort have tybelled at men of McKeesport have rebelled at last. They would be fit only for wage playes if they had always remained

> To-day organization is the rage in all crifts. The Amalgamated Association is growing rapidly, and every member highle is being taken into member-sity. The unskilled laborers are orcanizing into locals of the American Federation of Labor. The carpenters' union is expanding, and the barbers, bartenders, and painters are forming union, and aCentral Labor Union is on the way. All this comes about through the unexpected response made by the men in the National Tube Works, the Boston and Demmier plants to the general strike order of plants to the general strike order of the Association officials. Nothing its rance bewildering in this whole affair to the local residents than the unani-nity will which the order was obeyed. They did not expect it: the local un-implete and a much appropriate in plant. junists are as much surprised as pleasdave meant to the trust officials and

They, who were so complacently roking in wealth from the exertions of the workers; comfortably inventing new schemes and rules by which pro-duction could be increased and the innor cent lowered, apparently, nevel hor cent lowered, apparently, never peckoned upon any change occurring to cit short their postimes. To them, the workers were either too ignorant, no spipld, too much engrossed with 'getting enough to satisfy the landlord and kiep regular the visits to the butcher and baker, or occasionally lay up a mite in the savings banks, to dream of change, much less records as they of change, much less revolt as they have done now. But one who knows tenturies of submission to the ruling classes, yet slowly but surely the germ of submission is being supplant-ed by one of intelligent supraction and ravolt. We know that the working classes are not brutes, but men and women with hearts that feel, hodies that can suffer and have suffered, and with brains, thanks to education, that

are beginning to think.

Knowing this, we can explain the McKeesport riddle. 'And in its solution we can see plainly the doom of the capitalist system, with its wrong and woe, its overwork and underpay, its starvation and strikes and its devas-tating effects that distort all humanity.

. . .

There is an amusing feature about the strike here white I cannot help touching upon. It is amusing and pathetic both. It concerns the newspaper correspondents. The poor fellows are in rather a cerry strait. It comes about in this way. When it became about in this way. When it became about are call once figure in this contact and when lifayor Binch's position became noised around the country, reporters flocked in here from different cities. They came with their imaginations already strred with the scene of carriage they were about to witness, and their imaginations have been

working overflitt ever when. They are the busind pushe in townstrying to get news. There has been no carnage, no bloodeled, no embinging, no intendented. The petitive have done their work quietly and effectively. Not even a petity drunk is registered at the police station against the strikers since the struggle began. The hittiers since the struggle began. The hittiers have referred to be made and the hittiers are disappointed and unhappy.

A DAY AT MONESSEN.

Trust Dwns the Yown-Union and Mon Union Doudltions Compared.

(Special correspondence to The Worter.)
MONESSEN, Pa. Aug. 20.—Monesmen is four years old with about 2,500
inhabitants, twenty-five zoiles above innationals, twenty-ness zones above McKeesport on the P. & L. & railroad. Sensational reports in the daily press brought me here this morning. A few hours investigation convinced me that the Trust has possession of the local government, Ech., stock, and barrel. Monograph and the hopough and the

Monesaen in a borough and the burgers is the highest official, as the mayors are injection. The present in-cumbent is one Harry Rhinehart, a Republican and business man. Since the strike began he has become notorious for his activity for the Treet, and his for his activity for the Trast, and his open animosity who the workmen. He has declared openly that he would do all in his power twices the mills running, and he has need overy effort in that direction. Now the workingmen are cursing each other for electing him burgous for four pears.

Next-to the burgess in authority is the chief of palion, a fitting representative of the select council of seven mentare of the select council of seven men-

tive of the select council of seven mem-bers, which elected him. There is also a night patrolman and during the just few weeks there are a number of deputies attired in plain clothes hanging around. From burgess down, all are amirched with the same trust pitch, A more unmyory crowd could not inve been gotten together to meet the pre-ent occasion. I said all, but there is one councilmin who is without sus

ed to vote fer men who would fight them while in trouble they certainly unde a successful choice.

Sixty men are out at the tin place mill, and three bundred at the steel mill, both trust proporties. A founity and wire mill also bere are indefendent concerns. The men at the inter-place say they are ready to quit, but they have isot, been asked to. Both the trust mills have been unorganised the trest mile have been unorganised until recently. The men were afrain to organise, for every now and again some one suspected of being a union man was discharged. But when the strike order clime in July the men in both places obeyed it, and demanded the union scale.

Moncesen provides a good opporting mills governed by the union seals and those which are not. Noder the non-union scale solieva get \$1.80 a 7cm less than in union mills, deireliss \$1.80 a ton less, and unterers on an average of 87 less a week, with other departments in proportion. A crew in union mills is limited to 240 pair on a furn. while a similar crew is other mills turns out an average of 500 pair. The company does not weigh must the night before or morning of pay day, and the men are thus prevented from and the men are thus prevented from comparison with their own figures. Weights should be posed every day, as in union mile. The men have to significant the company gives, them. Is it any wonder the Trust objects to union interference with their business?

A refined method of robbing the workers is furnished in the "house."

workers, is furnished in the "bouns" system. The Trust holds 10 per cont. of all wages until October of each year, when a portion is paid back. Again late in December another portion to paid, but the Trust always retains union., Any ope who quits or is file-charged forfeits the "bonns." At precut the company: is supposed to have \$50,000 in its poissonium which the men should have gorelyed in wages. There are men now, working in the tin-roll who would quit were it not for that bonus. And all the time the company turn into a means of i ntimidation against their employees. The cost of maintaining this system is taken cut of the men's bonus when paid—an a l-

He is the leafer at Monessent and has displayed excellent judgment in the present struggle. He will make a good Socialist very coon.

The chief occupation of the burgers and his subordinates these days is autority the strikers and trying to cause noying the strikets and trying to cause an outbreak. The strike pickets are dogged and elisperated to an almost unbearable degree. The burgess has come so far as to take men into the mill himself. Tenferday he served Heinderson with the copy of an ordinance, a clause of which provides against any person "obstructing the public thereoughfares in any manner." This is taken as a warning against picketing the milling.

fing developments in the steel strike. There is renewed talk of settlement but there is as yet little to indicate that the trust is inclined to grant more than at the start. .

What is, from the standpoint of the capitalist newspapers, the reast sessational feature of the week, and from er standpoint, the most instructive, is our standpoint, the most instructive, is the cuntrasted actions of the mayors of Weihville and McKeesport. As told by our correspondent, the mayor of Weihville, in his eagerness to help the Trust, has sworn in and armouthe jar-ported scales; the mayor of McKeue-port, in sympathy with the working port, in symptom class, to which he belongs, has sworn in strikers as deputies. What makes the contrast instructive is, that in Wellaville considerable 'disorder 'results, while in McKeesport there is no bint of violence or lawlessness.

Four miles further up the river is East Liverpoor the center of the nottery industry, and a strungly of the pottery industry, and a stronger or-ganized city. At one point on the trol-ley route between the two places one catches a view of the Ohio valley-which can hardly be nurpassed for ex-quisite beauty. Across the winding river is West Virginia, where the un-dulating hills, covered with green folings, blend into the blue distance. If a medicing to turn from the contemsning to turn from the contem plation of such a scene to the consideration of the conditions which obtain among the human beings who labo

The Wellaville about mill of the
American Sheet Steel Company em-ploys, in ordinary times, from 480 to on, of whom 155 were skilled and eligible to membership in the Amal-gamated Association. To-day a total of 55 men are trying to run the plant plant has been established twenty four years, and became, with the other works of the company, a part of the steel trust early this year. It was port, and his son-in-law, Persifer with is now the district manager.

F. Smith is now the district manager.
During the twenty-four years of its
existence efforts were made by the
Annipamated Association to unionisthe plant, but only failure resulted.
Up to three years ago the mill was list: ed as an "open mill." where both union and non-union men could work. Three years ago, however, a union was formed with forty two members, some of whom were immediately discharged. A wike was ordered and was lost. Since hen the mill has been on the binch-st as a "blacksheep" plant. It was a cardinal rule with W. De

his mills should never enter the trust, the other that they should never he under the jurisdiction of a union. The company was forced into the trust and one clause was broken. The strikers ever that the other clause will be

manager, has always been opposed to organized later. He is known as an arbitrary and stubborn man. He it was who represented the trust at the first conference held between the Amalgamated Association and the Steel Trust. His conduct at that conference was so unsatisfactory and irritating that the Amalgamated officials became disgusted and distrustrial. Of all men, he was the one who abould not have represented the trust if it desired a settlement of the pending question and it was probably because the trust did not desire such a settlement that Mr. Smith was selected. At that conference he claimed that the Association onference held between the Amelence he claimed that the Association was coercing the Welleville mill men to join the union, which they did nor

Shaffer notified the Trust that the Association would not ploid any further conferences until the Wellsville men were reinstated in the mill. The company riplied that the men would be given positions as soon as more were open, as new men had been given the discharged men's places. That was not satisfactory.

When negotiations ceased and the strike order came on July 35 all but twelve men belonged to the Associa-

open meeting of the mili .employeen, and, though strong efforts were used to get the union men to attend, only four did so. At this meeting Smith "joilled" the men, giving each, a quarter's worth of cigars, mingling his blandishments with threats to move the mill. Of the four union men, two yielded to the manager's wiles.

That is the history of the prelimin-

*MINDLE-GLASS SYMPATRY.

It did not take long after the struggle had begun to discover in what di-rection the sympathics of the local business men lay. It is the same direction their sympathies have always taken, except when the strength of working class organization has coved them either into slience or forced then to side with labor. The same direction in which the sympathies of all exploiters of labor, large or small, have always tended—with the capitalist class To-day, among all the business-men in Wellsville, the strikers have great diffi-culty in panding a real friend.

As soon as the strike started, th business men, who have lived off the wages of the milimen, called open meetings to denounce the strike and to arouse public opinion to the danger of baying the mill moved out of town. They have conxed the men to reture to work, and latered with them to abow the injury and wrongfulness of unions. And, isstiy, they have refused eredit to strikers who have traded with them for years, and always paid their bills. Only two business houses in town have not done this. So muce for the identity of interests of the middie class and the working class.

But the blackest record of all lies to

the discredit of the town authorities.

GAPITALISTS' USE OF POLITICAL POWER.

For a week or so after the strike begad the strikers were unmolested and all went well. Then imported men be-gan to come in. The strikers met them at the trains and by persuasion and ar gument tried to get the non-unionists not to go to work. Sometimes they suc-ceeded—when they failed the non-unionists were allowed to pass in peace. Bur their success was embarrassing to the trust officials. Detectives employ-ed by the Pittsburg and Cleveland Hallroad, a branch of the Penasyle vania system, appeared and warned the strikers from gathering at the deput. This forced the men to meet

One day there arrived in Wellsville a clerk from the New York office of the American Sheet Steel Company. He is a relative of Mayor Dennis, and he sta-tioned himself at the latter's bome. This became widely known, and one day a head of strike sympathiners from a series and with them not to return to work. Mr. Phillips stopped the good work by appearing with a revolver and threatening to shoot the missionaries. The latter dispersed without wichating the law in any manner. Then, under instructions from the local trust officials, the two Phillips swore out warrants for seventeen of the strikers on a charge of riot, naming these best known to them by reputation. One of these was District Organizer Evans, who was asleep when the "riot" occurred. The "riotore" were brought before Mayor Dumils on August 15. They waived the bearing to another court, as they had had good resima already to distruct him. They were placed under a \$500 bend each and their trial will come up at Liebon on Beptenber 20. During this hearing the mayor, in a passion, ordered the court room cleared because the strikers present apphanded that lawyer for mah-

"ORGANIZED SCABBERY."

The Machine Trades and Professions Association Is One of Its Forms.

Disaked Under the Deceptive Phrase of "Mormony of Depital and Labor," o Systematic Attack on Labor Organisatiods is Under Way-Radical and Aggressive Policy of Unionism Headed to Most the Danger.

We referred last week to the longing of the Rochester "Post-Express" for a "new labors organization, whose plat-for should be: "Freedom of Contract: No Dictation; the Right to Work." Which, as we remarked, being interpreted, means: "Servilly to the Capitalist; No Independent Thinking; the Duty of Starving for the Masters" Profit." What the "Post-Express" wants is an American Federation of Scalus, to tight and cripple the trade unions in the interest of the possessing class.

The class line is now too clearly drawn and both expitalists and workingmen are too class-conscious for such a plan to succeed in more than a very limited degree. But something of the sort is being tried and workingmen who care anything for the rights and welfare of their class should be on their guard. The special correspon-dance of the New York "Evening Post" gives an account of an organization formed in Columbus, Ohio, under the title of "the Machine Trades and Pro-fessions Association." Boms extracts may interest the renders of The Worker:

"The skilled mechanics and the man ufacturers of Commins, are banded to gether under the solemn promise that there whall be no lockouts and no strikes at the plants which they cotred or at which they work. They are pledged to submit every difference, which cannot be settled by informat, friendly discussion to arbitrator resentatives of the two classes, and t abide by the decision. 'The member ship of the organization, which is known as the Machine Trades and Pro fessions Association, includes as hor orary members the superintendents orary members the superintendents of all the important manufacturing plants of Columbus, and, as active members two hundred men whose bands ac-skilled in the actual work of manufac-turing of maintaining machinery of various sorts. We are not informed by what meth ods the agreement to arbitrate all difficulties is made binding upon the mea-whether by the witholding of a par-of their wages, to be forfeited in case of non-compliance, or by some other means. As for the other side, it is easy to see that no such agreement can be made binding upon the employers. It is quite feasible, by a forfest of back rages, for instance, to compel workingmen to give thirty days' notice o their intention to quit-which is amply sufficient to forestall a strike. But ob-viously no agreement can present a manufatturer from shutting down 'for repairs' or 'for lack of orders'—the pretexts which are commonly given er a lockowt.

INSTRUCTIVE

STATISTICS

Drawn from Recent Reports of the inter-state Commerce Commission.

Profits of Rollway Capitalists vs. Lives of Railway Workers-Concentration of Ownership, and Increase of Exploitation-Some Appalling Figures-What's to Be Done? -

The comparison of the report of the Inter-state Commerce Commission for the year ending June 30, 1991, on the railway statistics of the country, with the corresponding reports for 1898 and 1899 is most instructive. The first thing that strikes the care-

ful reader is the evidence of the con-centration of wealth. Comparing the report for 1818 with that for 1901, we find that, although the railway properry had been increased by 6,950 miles of track, my 5 490.1 of track, my 5.428 lecomotives, by 124,-604 cars, and by other equipment in proportion, yet THE NUMBER OF CORPORATIONS OWNING THIS VASTLY INCREASED PROPERTY NOT ONLY HAD NOT INCREASED, BUT HAD POSITIVELY DIMINISH ED. In 1898 there were 2,047 com-panies; in 1991, with an immense in-crease of property, there were only 2,023 companies.

INUREASED PATC

BE EXPLOSESTION Even more significant is a compari on of the increase in the number of employees with the increase in the amount of dividends paid out of the product of their labor. Between 1808 and 1880 the number of employees increased 6 per cent., but the amount of dividends increased 15 per cent. Bedividends increased 15 per cent. Be-tween 1900 and 1901 the number of enployees increases 10 per-sent.; but the amount of dividends increased 26 per cent. In 1868 the overage employee contributed \$110 to the payment of dividends; in 1890 he contributed \$119;

in 1901 be contributed \$137.

This, of course, represents only a small part of the exploitation, of the workers.' The amount paid out in injewest, rentain, exerbitant salaries, to high univers, and pickings and steal-pigs," taken together, is much greater than that puld is dividends. But the same proportion would hold for all Forms of rapitalist appropriation of the "THE AMOUNT TURNED OVER BY BACH EMPLOYER INTO THE Nection of Nov. A FRIGHTFUL DEATH LIST.

A third point of interest in the fir uses of employees killed and injured at their work, Those figures are truly appalling, AND THEY GROW WORRE AND WORRE FROM YEAR

In 1866, there were 1,966 employee killed and 31,761 injured. In 1800, the figures rose to 2,210 killed and 34,923 injured. In, 1801 they reached the faghtful, total of 2,550 killed and 30,-

48 injured.

A part of this increase is, of course, secounted for by the increase in the total number of persons amployed. But after making allowance for this, we attli find that the ratio of the number killed and infured to the number em-

In other words, while the chance of death to the employee was considerably in-cepased, the chance of death to the pas-anger was positively reduced.

THE REASON OF IT.

The reason for this surprising con-tract in early sees. It is a compara-tively costly beatness for it railway fampany to hill passengers; but con-pleyees may be standard with prac-tical impusity. THE LAW HOLDS THE COMMANY, AS A COMMON CARLIER STRICTLY REPRODUCT CARRIER, STRICTLY RESPONSE BLE FOR THE SAFETY OF PAS RENGERA AND EVEN OF PRESENT REIPT EXCENTION COMPANY, AU AN EMPLIONER AL-MOST ENTIRELY FREE OF RE-INVESTIGATE PART THE LITTER EMPLOYEES. The law declares a the employee, by the "free con-

It holds the em-ployee responsible, net only for any "contributory negligence" of his ewa, but also for any "hegligence of a fel-low servant." It makes no such raid low servant." It makes no such raise in the case of a passenger or shipper. The practise of the courts makes these rules of law still more partial as against the employee, by the case with which "contributory negligence" and "negligence of a fellow servant" are formers. Add to this that the employee. proven. Add to this, that the employee is generally a poor man, who can ill afford to sue a powerful corporation, and it will be seen why the rallway

companies go on killing and maining their employees, while taking all pos-sible precautions to protect the lives of passengers and the goods of ship-The reduction of the fatality ratio for passengers shows what the com-panies CAN do to protect life and

WHAT SOCIALISTS WOULD BO NOW. And pending the establishment of Socialism, there are measures hearing upon the facts above out forth, which Socialist legislators, state or national, would support, Socialist executive officlais enforce, and Socialist indres

maintain. We need spention three: First, the Socialist Party advocates the parsage and enforcement of LAWS TO COMPEL EMPLOYEES OF ALL TO COMPEL EMPLOYEES OF ALL RORTS TO TAKE ALL POSSIBLE MEASURES FOR THE PROTECTION OF THEIR EMPLOYEES. FROM ACCIDENT AND SIGNMESS. This is especially increasing in the railroad industry. All railroad men know what a long fight it has taken to get certain very inadequate laws passed requiring the companies to equip their trains with certain devices for the water, a switchmen and trainment. safety of switchmen and trainmen They know also that even these inadequate, laws are not strictly enforced. And they know that the railroad companies maintain a lobby at Washington to fight such legislation.

It is no wonder that such laws are not enforced. A large part of the members of congress and of the execu-tive and judicial officers of the government are themselves capitalists. The rest are mostly lawyers, often former corporation attorneys. The two old corporation attorpëys. The two old parties are dominated by capitalist interests and, perhaps, especially by railroad interests. Those parties derailroad interests. Those parties de-pend for their campaign funds on the very men who have a pecuniary inter-est in defeating labor legislation.

So long as the workers continue to support these parties it is not likely that any effective legislation will be carried through for their benefit. When they begin to elect workingmen on a labor platform to make and enforce the laws, then workingmen's lives will be gin to count for more than capitalist profits in the eyes of government.

EMPLOYERS' LIABILITY.

Second, Pending the establishment of Socialism, the Socialist Party advo the STRICTEST EMPLOYERS gress could fight for a national om players' listility law which would make every capitalist financially re-sponsible for accidents occurring to working people in his employ. Such a haw as that, rightly framed and en-forced, would bring down the railway workers' death list very quickly. It would touch the espitalistic bank ac

counts—their only conscience.

Hut we shall not have such a law until the workers elect Socialists to enact It.

WERKINGHER'S PERSONS.

Third, The Socialist Party declare that workingmen who are injured or that workingmen who are injured or lose their health in the performance of productive labor are meet deserving of penalons than those who have only served to destroy life and property in war. The Socialist Party, therefore, pending the establishment of Social-ism, declares in favor of PENSIONS POR AGED BICK AND DISABLED WORRINGMEN AND THE WIDOWS AND ORPHANS OF THOSE WHO HAVE LOST THEIR LIVES IN THE INDUSTRIAL BATTLE:

Insumach as railroading is an espe cially profitable occupation for capitalists and an especially hazardous one for the workers, it would be enti-nently proper to levy a special tax on the railroads to create a pension fund for the beneat of railway workers. But no Republican or Democratic congress will consider such a plan as that.

Let the workingmen vote for the party of their class. Then and then only will the laws be framed in the interest of their class. Till then the street of workingmen may profit will achecked.

Spread of Socialist Thought in the Trade Uniona. Too late for us to tell the whole story

In this paper, we receive the news of two most important actions of trade union bodies, showing how rapidly and how widely Socialist thought is now spreading in the ranks. of organized labor.

The State Trades and Labor Council of Montana met.a week ago, and one of its most important sets was the creation of a standing committee whose duty it is to further the political and economic education of the workers of the state. The program which is laid down to guide them in the choice of literature to be distributed is Socialis-tic in the strictest sense.

Last Sunday the United Labor League, the central body of organized labor in Philadelphia, received the report of a committee appointed at the time of the gigantic teolicy franchise grabs: Our comrade, Fred Long, wrote the report—and that is sufficient appur-ance that it was a sound and uncompromising statement of the Socialist position. Not a Republican, not a Democrat, not a "reformer" ventured to raise his voice against the position taken, for all recognized however unwilling some might be—that it was i

in the Taff Vale Rallway case comes as s very nakind rejoinder to the resolution of the parliamentary committee of the Trades Union Congress, to wh against the abrogation of the powers of the House of Lords as a court of appeal. In the case in question, the saviginal decision in the action brought against the A. S. R. S. by the rathray company was given by Mr. Justice Farwell, who granted an injunction against the union. The encicty-appeal-ed against this decision, which was unanimously reversed by the court of appeal. Now the House of Lords has reversed the decision of the court of appeal and upheld the decision of Justice Farwell. Perhaps the parling tary committee will not have quite so much cause to thank God for a House of Lords after all, and may feel inclined to go back on its fore tion. The decision, as it stands, is cer-tainly a serious matter for trade unons, as their funds will now be limble to be attached for any act of their offi cers performed in, the execution of their duty, for which anyone may choose to proceed against them. It is not surprising that such a decision has been arrived at, the wonder in that some attempt has not been made long before this to make the union disancially responsible for the hets of its officers; and it is difficult to see , out the unions are to escape from the re-sponsibility now that R has been thrust uppon them. We certainly enuned take Mr. Bell's optimistic view of the u.a. ter, and should my that it in the hors of trade unions to agitate for fresh legislation, either to free them found so bertous a responsibility, or to give them a superior claims to that which they at present exampy "In the mena-time, the decision of the House of Lords should induce circumspacts".

AS TO CHRTAIN DUTING OF NEW

Every meeting of our General Committee in this city brings complaints that he this or that district arrange on through by the fault of this or that comrade. Sometimes the Organiser is charged with neglecting to send speakers; sometimes the speakers are charged with failure to keep their engage ments or to come on time; sometime the district committee is charged with neglecting to get out the platform, bas paraphernalia of a successful meeting It is reporally almost impossible among the charges, and country charges, to uz the responsibility. Bu it is time that this sort of thing cam to an end. If our work is to be sue confully carried out each comrad must resolve, not only to do his duty. but to do more than his duty, if need be-and each must keep his good reso In the first pince, notification of the

neeting must be made in time. If the Organizer is to supply speakers be must be definitely notified of time and place by the proper officers of the dis advance. Our speakers are compara tively few; most of them, are busy workingmen; most of them, too, are called our to perform other duties for the party-to attend meetings of their districts of various committees his Their engagements are generally made break engagements aircady made in order to fill new ones.

Second, the district must see to it that a sufficiently large committee of willing and faithful commides is iq. charge of the meetings. Their duty is to notify the Organizer to send speakera, to notify the police, to get the piatform and banner out in time, to protide a chairman, and always to have leaffets for distribution and copies of The Worker for sale at the meeting.

Third, the speakers must keep their nements. Each speaker can easily let the Organiser know how often and on what nights of the week he may be called on. Then, when called he to obey-that failure to do so is a breach of faith of which any Socialise or any man should be ashamed. . If there is, as sometimes happens, a really good excuse for failure. The City Executive should not besitate to drop from the list of sucakers any who abuse their couft dence 'in this matter, and to report such action, with the reason for it, to the party. We want to know on whom we may depend.

All this is the almule duty of the various persons concerned. But somethan the letter of the law prescribes

If, for good or bad reasons, the speak try fail to appear on time, that does of excuse the district for letting the meeting go. SCIUTION OF THE LABOR PROBLEM?

We have received from a readi active and experienced trade unionist. by the way-the following letter, which re think worthy of more prominence than a place in the correspondence colunus would give it and with every word of which we heartily agree, Here

"The recent action of some of the McKeesport steel workers' locals, in recommending that the strikers and from the banks, in order to hamper the Street Trust in securing cash for its stock exchange operations, is com-mented upon in the capitalist press. A resolution alleged to have been passed by the convention of the A. F. of L. in 1943 is quoted, recommonding that the trade unions organise as joint-stock corporations, limited, 'the charters for uses unions to be confined to the fund tion of an employment agency at first, as the essential resson for their exist-euce.' According to the writer, John gan in the present steel workers' strike rotten coceanuts at one another, can only be met by arraying organized. I monkey show. SOCIALIST ECONOMICS.

Boing an Attempt to Present the Main Principles of Scientifin Socialism in Popular Language:

E.-THE COMING REVOLUTION.

We have said, in the preceding articia, that revolution is not rightly to be defined as a violent and bloody movement, since some revolutions have been peaceful and many violent movements have not been revolutionary. We have further set forth that revolution, far from being opposed to evolution, is simply one of the evolutionary pro-cesses. Revolution may be defined as a notial transformation which involves a radical change in the seconds basis upon which society rests. And, in the last analysis—since blatory is made up of the records of the class struck

or the records of the class struggle-under its successive terms—it may be defined as a change in the essential re-lations of cordsi classes.

When the primitive form of society, in which all upre "cjual and were bound together by the the of actual or maginary lengths more man in the imaginary kinship, gave way to the form that prevailed in ancient Greece.

the attacks of the northern barbarians i there rose upon its ruins a society which a part of the people were fro dal lords and the others .were serfi bound to the soil. A third general transformation of society secured when the fendal system broke down and gave place to a form of society in all men were nominally free,

SOCIALISM AND TUBERCULOSIS.

Bigh Authorities Say That Candillows of Poverty, Ferned Upon the Workers Under Capitalism, Are the Brust-'not Obstacle in Battle Against Consumption.

The following article was written for London "Justice" by Comrade L. E. Readligtey, who is recognised in Rugland and elsewhere as an authority upon hygiene in general and in particu-iar upon the now much discussed question of tuberculosis. His remarks

are worthy of consideration: "During the last week of July, 1896, the International Secielist and Workere' Congress met in the Quoen's Hall, London. During the last week of July, London. During the limit week of July, 1901, the International Congress on Thierculosis met in Queen's Hall, London, Many of the delegates who abtended the first congress we're self-taught men, the majority had bed to earn their living by some eart of, manual labor. The second congress was attended by many of the most highly taught and celebrated scientists of the world. These leading physicians and bacteriologists had sat themselves the 'task of discussing the best means of preventing the sproad of tuberculosis; or, in common pariance, of consumption. It is a subject that might very well figure on the agenda of a Socialist en economic rather than a medical question. But it was not inscribed on the agenda of the Socialist congress of 1956; nevertheless, we did incidently solve the problem at our congress. The solve the problem at our congress. The accessions have debated most insermedly, but they have solved nothing at all. Indeed, they were very careful to state that they could not solve the difficulty. Professot Eoch related that the German central committee for the establishment of sensories for the care of consumptives had about 5,500 balls, would be the about 5,500 balls. would treat about 20,000 patients per annum and cure some 20 per cent, even of those who had the becilit. From this be concluded that human beings could set contract tuberculous from animals. It this theory be confirmed, then the only way phthisis is contracted is by breath way philiffe is contracted to by breath-ing the dessicated spetum of con-amptive patients which files about in the dust and to brought to the tungs by the breath. Where there is planty of room, air, and good numing care can be taken to remove the apritum, so that it shall not infect anyone clary and among the well-to-do clarees the spread of the disease is thus checked. As time goes on, the plot thickens, as the dime novelists say. On Mon-day last the sheriff of Columbians County, one Neragon, a Republican, appeared in Welleville, accompanied by deputy. He came at the request of Mayer Demis, and immediately pre-ceeded to nasket that gentleman in the fask of strike-breaking. He made a sistake right off, however. He done tized a man pamed Warren to bein bim. Warren is a member of the Brotherhood of Railroad Trainmen and was deputized before he realized what was wanted of him. When he did he announced that 'he had something announced that "he had something else to do besides protecting scale to and from the milt." Mr. Warren has not his job as deputy.

But with the calling in of the sheriff, Mayor Dennis had not completed his work against the strikurs. His latest act has aroused more feeling than any previous one, and added to his already shameful notoriety. On Tuesday hat he swore in thirty-one of the non-un-louists working at the mill as deputies. which invents them with the power of carrying weapons. Demis gives as his reason for this that he swore in the men "so that they could protect the frust property, and themselves." "10. The right to work."

The right of others to work for him is a right of which the capitalist is very solicitous. Labor will no longer be satisfied with the mere "right to work." It also demands the full preduct of its work.

BEGGING THE QUESTION.

The "Journal's" very statement of the problem presupposes the nature of its solution. "How Shall Labor and its solution. Capital Be Reconciled" is given as the subject of this symposium on the labor question. The true answer is, they never ran be. There can be no "remitdy," as the "Journal" styles it, for this war between capital and labor. There can only be an outcome of this war and that outcome must be the overthrow of the system of private ownership of capownership and co-operative operation of all capital and land.

of all capital and land.
In opening the discussion Bishop Potter states that to him the gravest, question seems to be that of showing workingmen and employers that their interests are mutual. Truly, a hard question! The capitalist class lives as a parasite on the working class. Can the interests of the parasite and his victim, the lien and his prey, the rebber and the robbed, the slaves and the masters, be identical? Never. wage slave is beginning to give up the plan of supporting the interests of his master in the hope of receiving his bounty when the masters prospered, and has taken up the finer idea of overthrowing the master and gaining his own freedom, in order that the results of his life and labor may be his own.
The fact that those who denominate thousselves the "better classes," and in the next breath declare that "this is a country without classes," are continu-ally endeavoring to obscure the class struggie, and are opposed to one class in succesty arraying itself against an-

talist class and the system it represents lies the only hope of freedom for the It is too late now for arbitration, conciliation, or compromise. The class war is on, to be fought to a finish. In the "Journal" of Monday, August 20, appears the first article of this significant symposium. It is from the pen of Ernest H. Crosby. Mr. Crosby's satirical and stinging indictment of our present industrial system is as interest present industrial system is as interesting as his proposed "remedies" and "reforms" are superficial, impossible, and heffectual. refireads.
This solution is as impossible to carry out, taking existing conditions as a

besis, as it would be ineffectual if it could possibly be put into practice. He falls into the error of thinking that monopoly is the artificial creation of new, whereas, under the existing com-litions law is the creation of monopoly. The germ of monopoly is carried in competition, and under from com petition the monopoly which arise from the survival of the arise from the survival of the lassi-cunning and unserrupulous would use-its power to again create special privi-lege through law, and so-called "arti-ficial" monopoly would again be natur-ally developed by its power. Mr. Crosby's free competition would Mr. Crosby's rree competition would simply mean "freedom" for the power-ful, the greedy, and the unscrupulous to rob their follows and reduce them once more be a condition of abject wage slavery. The idea that freedom could be found in a state of "free" industrial strife. I've and unlimited com-petition and "the Devil take the hind-most," is a misconception whose persistence is surprising. If, by any method, hociety could be reduced to a state of "free competition," all the enormous saving and gain to humanity which comes with co-operation and combination would be lost. The time has passed when the Socialist had to demonstrate the superiority of co-operation to competition. That has been proved by "the logic of events," and the task now left to the Socialist is to expose the iniquity of private owner-ship in the means of production and distribution. Man will never be really free until he has mastered natural forces and evercome those which are injurious to him, and that he can only

HOT TO BE GIVER. The absurdity of expecting the capitalist class, which has control of government, to bring about free land, etc., is obvious. It is asking the capitalist to commit economic suicide. How any man with the memory of the massacres of Homestrad, Lattimer, and Cour d'Alenes in his mind can think that freedom will be handed down as the gracious gift of the beneficed rapitalist is incomprehensible. Freedom and the possession of the full product of their labor must be won by the

working class fighting for their rights. Mr. Crosby says: "The real power has passed from our state houses and city halls, and is now centered in the counting room and chamber of com-merce." Therefore no laws can be made effective against capital except by the organisation of the workers into their own party, the Rocialist Party capturing the power of government for the working class.

But Mr. Crosby is very sorry to ob-

merre that there is such a thing as a class struggle and ways Capital and Labor ought to be allies. "Consistency, then art a fewel?"

Mr. Crosby, if you do not foster in-riligent class-consciousness now, you question comes to a crista. If you tion, obscure the class struggle now, only to have it flare up later in a rio-lent whirlwind of class hatred, to make a bonfire of civilisation.

To the easily under consideration, Mr. Groeby also gives a touching warning to the capitalists that if they do not stop their depredations the people will rise up in their might and adopt So-cialism. Later he makes a weak ap-peal to the capitalist for fair play. An appeal for fair play from those who order out the militia and hire Pinker-tens, under cover of the five, to mur-der defenseless workingment his well appeal to the fiends of hell. The trust mills are closed down and closed down tight, and it is the avowed intention of organized labor that they remain so until a settlement is react-ed. And the old Socialists are now beginning to see years of hard work re-warded in a splendid awakening of the working class. These faithful Socialist pioneers have been hammering many among the trade unionists for a thrie, and as many of them are un ion men themselves they have become influential, and are listened to with reanect and interest. .But spart from this, there seems to

be a clearer recognition of the class atruggle among the workers here than any place I have yet visited. There spenis to be a class-conscious e in the fight against the trust that is more apparent than elsewhere. The most impressive thing about the local situation is the radical attitude of the workers in other trades. They are dened that the strike shall be won unionism they are fitted to fortify the strikers in the strongest kind of way. But what is more impressive still is the radicalism of the organized work ers on the subject of politics. Judging by what I have seen and heard to-day I feel justified in saying that the Wheeling district is seething with Socialtem. On all sides can be heard expressions of dissatisfaction with the old parties and favorable opinious upon the Socialist Party. STEEL MEN VS. STEAL MEN.

The Great Battle Is Still Being Waged Bitterly and Vigorously by Both Sides.

THE MEN WILL EVENTUALLY BE FORCED TO TAKE POLITICAL ACTION.

At this time there is no news to show I are Republicans, the mayor is a Dema point where an immediate decision can be hoped for. "This is no time to arbitrate" seems to be the position of the trust, and the men are still undismayed. Since a week ago we should say that the men had made gains; but it remains to be seen whether or not they can hold their ground. Some day, and that in the no distant future, the men will get to wrok on political lines in a party of their own, and when that time comes they will have it in their power to victoriously say "This is no

time to arbitrate." The strikers should be warned against trust methods and lies. various places during the past week the bosses have had men distributing leadets among the strikers, which contained extracts from New York trust papers, such as the New York "Bus" and "Times." The strikers should know that whatever the "Times" and "Sun" have to say about the strike is simply Mr. J. Pierpont Morgan's side of it, and should treat any advice from that quarter accordingly. The "Times had an editorial not long since congrat-ulating Mr. Morgan on having said nothing about the atrike for publication, and contrasting his "reserve with Mr. Shaffer's "loquarity,". The strikers should understand, that any-thing that comes from the "Times" is as much, Morgan's as the steel that comes from the milis, though he does not write the editorials of the "Times" any more than he makes the steel. He has hired men' to do both, who only differ in the respect that one is an in-tallectual prositiute who licks boots for his livelihood while the other is an conest man who works for his living.

Below we give a view of the scene of war as seen by our special corre-apondent in the field.

CAMBRIDGE, OHIO. August 31 .-There are nearly one thousand steel workers on strike in Cambridge, and during the two months since they quit work, there has been nothing occurred that would lay the city open to attack from the imaginations of aspiring re-

porters., By the time this appears

Cambridge has the reputation of heing one of the best union towns in the state of Ohio, and from what I have seen during my short visit, the reputation is deserved. I'am informthat there is not a trade in which the workers are not organized, and the effects of this are visible every-where, not the least of these being the chnoxionsly active so-called improve ment Society, of which I shall spick more fully later, the strikers have either the outspoken or silent support of the business people. The strength of the local trade unions is undoubted

A high fence plant, and a hotel, with full equipment for feeding and boarding scale, stands inside. Up to within the past few days, the strikers maintained, head quarters in the city, but now they have tends four miles, opering the distance between the two miles and, adjacent territory. I visited the camps to-day, and set many of the strikers, who are among the most friendly I have met on

among the most friendly I have met on this trip.

There were no hammocks or cots upon which the watchess could sleep. The hare-hard ground, with a box for a pillow, was their resting place. In one corner was their resting place. In one corner was a cupboard containing various cooking and household utensils. I arrived at this particular tent just in cooking and household utensin. Cambridge is a growing city, and new industries are constantly enter ing. What will be an important addi-tion to the city is an enormous glass factory, which is being erected by the glass trust. It will be the largest in the country, and many small plants will be wiped out when it begins operations. The history of the glass trust's coming to Cambridge is an interesting one, inasmuch as it also involves an account of the methods of the "Improve

ment Society" before mentioned.

This organizations is run by eight "leading business men," who really ran the city also. It was started by an enterprising and patriotic gentleman who had evolved an easy way to get rich. He bought 150 acres of land jus on the city limits and then, with the aid of several other schemers be launched the "Improvement Society." which had for its object the "advance ment of Cambridge by inducing capital to invest, etc., etc., First thing necessary to success was to get the dear-workingmen interested, and this as usual was not hard to do. The labor organizations bought stock in the new ociety, their officials being actually guileless enough to go around solicit-ing for purchasers of stock. It appears that the workingmen here are unusu ally thirtry and a large number invest ed their savings. Result: The gentle-man who originated the scheme has sold his land to the society for \$20,000, while the glam trust has received a bonus of \$30,000 and a factory site free in order to locate here. The society now ewas the land opposite the glass factory, and this has been divided up into lots, upon which the workings owning stock are 'asked to bu bounce, the lots to be bought from the ociety. Besides this the improvement company is about to build houses it which the glass workers are expected to live, the glass trust baving kindly consented, to see that the rent is stopped off in the office. A very pretty

scheme all around. Moreover, the managers of the "Improvement Society" have been fight-ing the strike from the beginning and they are using every influence to weak en the men and prejudice their cause They claim that if the strike is not set tied soon the town will be ruined, cap tal will go alsewhere, the "Improve-ment Society" will go bankrupt AND THE WORKINGMEN WILL LOSE THEHR STOCK. The labor organisa tions are placed in the predicament of having invested money in an organiza-tion which is now being used to defeat this important strike

CANAL DOVER, Aug. 30.-The strik ers of Canal Dover are the first upon whom injunctions have been levied since the steel strike begun. The injunction is no more warranted than were the previous ones issued since they came into fashion as means to break strikes, or thwart the purposes of labor, unions. Their existence unwarranted, their coming unsolicited, they are unwelcome except to those, who are the enemies of the strikers. The strikers themselves are somewhat

lost as to what to do next.

There was a larger crowd than mount at Association headquarters this morning, when the United States deputy marshal, accompanied by a deputy and the imperintendent of one of the trust nullin, appeared to serve the write upon the violators of capitalist law. During the night, the pickets that have been doing duty for weeks were called 's and, deserting their tents, they had marks of many days and nights spent outdoors. Their hands and faces are sunburnt and haggard, their eyes bloodshot with sleepless watching, and their clothes dirt stained with roughing

The injunction was granted by Jun-tice Wing in the United States District Court at Cleveland. It covers the two local lodges, their officers and meni-bers, some of whom are mentioned by name, the remainder being grouped under clauses which include every one associated with the lodges and officers. It is a regular, up-to-date affair, broad in its stope, effective in its purpose. Briefly stated, it prohit-tio interference in any manner with the operation of the mills, or with any

In all the strike field, no locality had had a harder struggle than this one It has been a battle in which real generaiship developed on the strikers' side and made them victorious over all tao-ites of the trust. The picket system was without a parallel. It extended from Canal Dover to Dennison, and consisted of camps stationed at important points. Here the men watched night and day, having regular guards, and being supplied with food from the nearest town. Communication was ef-fected by use of a bleycle corps kept constantly on the route between the

camps. By this means, the numerous attempts of the trust to bring men into any of the places have been thwarted. Monessen has its Rhinehart, Wellse, ville its Dennis and Canat Dover its Bold. They are three of a kind. The only difference between them is that one is worse than the other. Ithinehark ence was exerted, and Bold only broke out within the past week. And it is Bold who is the indirect cause of the

njunction being issued. Bold is a lawyer by profession and he was elected mayor of Canal Dover où an independent ticket, the ticket of the "best" citizens. He held himself. sloof from interference in the strike until last Monday, occupying the postsenting everybody and ends by champloning the capitalist class. Last Monwith them. Just how much that interview was worth to Mr. Hold is not publicly known, but the strikers know now what it held is store for them.

Monday forenoon the train frow Pittsburg brought in a negro who was to be cook and barber inside the sheet: mill for men expected to work there. Before entering the depot the train always stops to switch near a crossing which is only a few yards from the mill gates, and when it did so this time the negro jumped off. He was met by Jurdens, the mill superinten dent; Utterbach, a mill watch: The strikers halled them and asked to speak to the cook. Bold seized him and attempted to take him Bold picked up a club and ordered the strikers to disperse. Then without proyocation he struck one of the strikdoce the strike began. Finally, the cook consented to leave town, and he

A few hours after this occurred the United States marshal appeared with the injunctions.

On Tuesday morning the canitalist press dispatches published that "Caust Dover was under mob rule," and that the strikers were fast becoming lawless in their attacks upon strangers. I' witnessed the incident which gave ex-cuse for these reports and can say that there was not a blow struck by any

striker That night after these reports of moh law were published reports were rife that the milita was about to be called in: these were not realised, but the injunctions were sworn out within twenty-four hours afterwards.

I have said the struggle here has had only been at work a short time after a protracted idleness which ex-tended over nine months of last year. tended over sine months of last year. This had brought many down to bed rock in finances, and they have been put to it to live throughout the strike. I think this fight has meant more in suffering and hardehip to the men of Canal Dover than to any other in the whole strike field. They are heroes in every sense of the word, and they are as firm and steadfast now as when they first come out. It was probably because the trust believed the main were too poor to stand out long that such increant efforts have been made to start the inlin, but their expecta-

GET TO WORK.

Comrades, the campaign is on, and you must so to work. The Secial Democratic Party in New York City has a occatic Party in Now York Usty and we better opportunity to make gains this year than any Soviatist party has ever before had in America. ...We have a larger membership, we have a harmonious organization, we have the ear and sympathy of many of the trade unions. we have the good will of thousands who only partially understand Social-lum, and are for the dust time ready to listen and resid—in abort and long, we have everything in our favor.

Let every comrade attend every meeting of his branch from now on. Let.every branch organizer see to it that delimquest and non-attending comrades are looked up. If they have been sick or out of work and cannot pay their dues, remit the dues, but not to it that they are brought to dolors no active work during the campaign

If any agitation meetings are held in any branch's territory, indoors or out, every comrade abould attend. Let each party member undertake some personal work, in addition to that of his branch, such as distributing literature mong the men with whom he works, or in his trade union, or to his nextlost neighbors.

Branches should undertake to cover

certain localities with literature where possible. If they have headquarters they should finat a campaign baunernot a coatly or farry one, but one showing the party emblem and names of candidates in hold betters, easily

When some comrade in a branch meeting proposes some new method of propagands, don't dismiss it, saying we can't do that; consider it carefully, andsee if it is possible to carry it out; in-stead of finding meaons why things cannot be done, find ways and means

to do them.
De not allow this year's opportunity to slip by without doing your best. Go to your branch meeting and get to work at once, not to let up until we get the co-operative commonwealth.

CAPITALIST LOVE FOR THE MEGRO. The Latrobe Steel and Coupler Company had conceived the time-worn and pany had conserved the immewors and always troublesome and unsuccessful idea of importing negroes from the South in replace their striking week-men. Three hundred and states negrees were brought from Strmingham, Ala,, by wain and side-tracked at Lie Als., my weak and side-tracted at Lac Crange to await the pleasure of their prospective employers. The motifod employed by the Entrobe company to induce these pageoes to come North was unspecifiely infamous. The com-pany's agent at Birmingham had cirris-lated a handhild mendianity magnitude. pany's agent at Strainingham and circulated a handbill specifically promising wages of \$5 per day and good bemse to whomever would come to Molecke Park, and positively asserting THAT THERE WAS NO STRIKE WHAT-EVER; a deliberate and inframework falsehood on the part of those who day kide their faces from the pu

Company.

MINOLE CLASS LOVE FOR THE BEGRO. No sooner were these poor, deluided numen beings sidetracked in the heef-ing sun, in their stuffy cars at La ing sun, in their stuffy cars at La Grange, than the "respectable, inhomen reidents of that meurican rilinge presented." (Josephintzi ware made to Marshall heis. The inter visited the train at \$1.20 ofters and ordered the conductor in move the train out of the town. The meroes pleaded for a delay, but the marshal was firm, and shortly before noon the train drew out. When field (Preck, two miles north of La Grange, was reached, the train came to a stop. Those in charge decide not to move further on until orders had been recoved from the efficient had been recoved from the effi-

She hastemed to the village itv-oryman, who at her solicitation plackd a horse and vehicle at her disposal. These equipped she want resolution a horse and white at her disposal. Thus equipped she went rapidly about, gathering provisions from the abous and readends until the yehicle would hold no more. Then she turned has horse's head toward the negroes at Sait Greek, who were iff uncoinclose that an angel in the powerhial sarb of woman was feeting toward them withfood for their worn and sickly wives and babes. The infamous handbill which had betrayed the negroes into coming North was seen by lifter How all a copy being shown her by a negro who had refused to sait his copy for the 85 offered by the company's representatives. These handbills were ample ground for damage, saits and the Latrobe company know 4t well. That is trobe company knew it well. That is why their brising "attorneys" went among the hungry colored people and brought them up. Five dollars seems g good sum, when you are hungry and your women and children are hungry.

The "respectable" Grange people who were ready to follow Marshai Rau in hounding the hungry magness from the village were equally ready, at the tsuch of her noble personality, to follow Miss Howell to their relief. To conclude the insident, as an on the effect of a personality simulation, we print the report of this Melrose Park incident as it appeared in the Chicago, "Record-Hayaid." Not knowing the face, it appears a very pleasant incident, thoroughly enjoyed by the negroes; but, reading between the lines, it is a chronicle of the sc tions of men, wealthy and respected, whose ethics would shame the high-wayman out of business. THE DRUMMER'S AWAKENING. A MODERN FABLE.

BY W. L. DAWALD, ARLENGTON, W. J.

Once there was a drummer. Not of the kind that bests the catgut, however. This drammar didn't indules in the frothy giass, and hadn't sefficient abdominal protuberance to qualify for a band. He therefore did his drumming with his knuckles upon edic doors. If it availed, and he was ad-mitted to the fanor sanctuary, he joilied the buyer for an order It was his boast that his quest wa-

that the coveted order usually camwith the purport to make himself scarce, which, needless to say, was not exactly what he pined for. Still be was a strenuous hustler; gave a pretty good song and dance, and when up against it knew the magic power of Uncle Sain's soap, when liberally spplied to the inner lining of the buyer' do enough bostness (and people) to pre-rent his conscionce from troubling him fifty per week, so he thought he had no blok coming.

Now this drummer had a friend—a locialist. He, too, was a knight of the read. At evening while waiting for his train, it was his custom to locate at a busy street corner; mount the restreen formed by his baggage, and rapound the occurres of Socialism to the praning losthess. All the dough he triumed from his traveling expense ac-count he spent for Socialist literature. He would just up at cheap hotel, and dine on pork, all in order tobuy a few pamphists more, and except when treating a contomer smoked Pittabura togies. From which it will be seen b

was made of the real stuff.

Of course he talked floctalism to his friends. He talked it so much in fact that those who were unpersuaded came to look upon his as a --crank--(we omit the adjective.)

When they met on the street one would kay:
"Saw Billy last night. Gave me a

book, 'Why I am a Socialist.' And the other would reply:
"Did you tell him became he was
looming idiot?"

Then they would swap, ha, ha's, and fall to talling one another how hot it was last week, or forget Billy and his book in some similar subject of more

Importance.
So it was with the drummer! He often expressed in what he considered suitable language, but which had better be left unrepeated, his contempt for the Socialist theories, and all the literature given him he stuffed into his

grip for use as shaving paper.

The Socialist mostly confined his talks with the drummer to the subject of trusts. He tried to convince him that owing to the elimination of competition by the irredutable march of the combine, salesmen would soon be un necessary factors in the industrial

"You and I," he would say, "will find ourselves with no more profitable occupation than holding down park beach!
as when that comes."

in reply the drummer entreated him to "cut it out," at the same time add-ing an opinion that he "was full of 'in whistles." that he "talked, in bunches" or something equally polits. One may take liberties with friends, however, But in spite of his criticisms the drummer never knew what the Socialist was saying. His thoughts were al-ways too full of schemes for increas-ing his employer's pile of the yellow dust to admit of very attentive listening. He was looking for a raise. Bomething practical," he said, and land no time for such things. The Republican ticket was good enough for him; he guessed (and it was strictly a guess, for he never thought of apply-ing his restoring faculty to the matter). He always had voted it, and what was the use of changing? He was fur-ther confirmed in this choice of party by the fact that every campaign a Republican banner was bung from the third story window of his firm's build-ing to the window of another house opposite. From this he concluded the his beas supported that party, and vot-ing the same ticket seemed to establish a sort of equality between them!

One day the drummer sat reading his newspaper over his dinner. After ascertaining the standing of the busi-ball teams, he had turned, to the stock ways read the Wall Street nown, for sometimes when he could spare the long green he took a fiver on margine. Of course he never escaped without a shearing, but it permitted him to posses as a real stock speculator, and that was surely worth the price. It gave him such a delicious facing of super-iority to talk with the unsophisticaled of the dologe on " (thance," and how he could have efeaned; up so many thousand dollars velvet if he had only

The drummer felt as if something had dropped, for among the companies name!

Could it be that he was to be sum marily dismissed? He, a twenty-six hundred a year man who had been with the company for fourteen years? No, of course, it was a mistaka. How could they get along without salesmen, anyway?—They had printed it wrong, or it was a bull on the part of the re-porter. A joke parkapa! Ha! hal hal But a d—n unpleasant ode. The United Labor League of Philadelphia Declares for Socialism.

The Corrupt Republican Quaker City Has Its "Reform" Meromont, Honded by Holy John Wanamaker, but They San't Fool All the Workingmon

PRONUNCIAMENTO ADOPTED BY THE COUNCIL,

In Socialism growing? As well ask, in the world moving. The following adpress was unanimously adopted by the participation in politics for corrupt purposes by every element these corresponds to the purposes of the purposes was unanimously adopted by the ted Labor League of Philadelphia August 26. Adopted unpninously. know that does not mean that every delegate was in favor of it, nor does it mean that every delegate will work in the political field to carry its lectarations into effect—right now. But times, the progress of Borialism, d no man can believe that the day is distant when the workingmen of America, with the trade unionisty in he van, will almost to a man be work ng and voting for Socialism-yes, Messen Capitalists, and fighting for it, If you try to role us of the franchise the fruits of our victories by the ice. And we'll win, too, Memri.

The Labor League's unanimous de ciaration for Socialism came in the e which was appointed at the tim clared against the trolley franchise distribution. Frederick W. Long, of Typographical Union So. 2, was the au-thor of the pronunciamento, which is

"The whole history of street railway development in Philadelphia is a record of progressive consolidation, ending in the present control of the streets by practically a single corporation, and, whitever may be the immediate result of the recent franchise theft, the quick alsooption of all Philadelphia franalmosphon, or all Philairsphia translines into one corporate power is a certainty beyond disputs. The principle of competition is dead, and belief is it as a relief from the present evils of monopoly is a delusion that must be removed from the minds of the working class. Private corporations are formed in make money ast of their enformed to make money out of their em-playees and the public, and belief that

SOCIALISM IS COMING! UP AND BE DOING!

All of us have read the reports in th

espitalist papers about the strike wi the newspaper writers and reporters of the Columbus "Fress-Post;" how the printers and stereotypers struck ough sympathy, and how the strike was won. But the whole capitalist press, with its continual how about trade unionists not living up to encreexpiralist contracts, had not a word to my about the cause of the strike. The following true report of the securrence to taken from the "Typographical lournal" of August 15:

"th July 12 the members of News-paper Writers, Union No. 2 employed by the Columbus "Press-Post" were locked out, despite the fact that a contract between No. 2 and the Press Port' existed, and that in taking the action which it did the PAPER GROSSIX VIOLATED ITS COVE-NANT WITH THE UNION. Strikes remind the of the story of Flyyphus who, the student of history will remember as having in-suited the gods, was doomed to etsr-ual punishment by being made to lug a huge stone up a hill and whels he had reached the top to have it ally away many times; are we doomed to see it go down again in this conflict? ECONOMICS.

XI.-SUMMARY AND CONCLUSION. In concluding this series it seems

come detail in the course of the series.
The limitations of space will not allow more than a bare recapitulation.
In the drat article we tried to answer the question: What is Science? We sought to show that science does not consist in the use of long and unusual words, afthough such words are some-times necessary and often convenient. Science consists, in recognising, first, that things do not happen by accident, but that everything has its cause—or, in other words, that things happen in a 'necessary, and, orderly sequence, which can, by study, be discovered and understood; and, second, in observing facts, cosuparing them, generalising them, and thus discovering what we call the "law" by which things occur,

the sequence is which they happen. Science is only systematic and accurate study of facts as they are. We showed that this scientific method can be applied to the facts of social life, as well as to the facts of what we call "nature." The only reason why social science is not yet so certain in Its conclusions as are playsics, chemis try, and biology, is that the facts of soery, and mining, M. mar the facts of so-cial life are nuch more complex, and therefore more difficult to observe, compara, and generalize, than are the facts with, which, the other sciences deal. "There is one branch of social science, however,"-we said, "which has heen brought to great perfection, so that it'is almost an exact, a science as physics or 'chemistry. This is scone-mics, the scientific study of the sys-tems by which wealth has been and is now produced and distributed."

In the second article we exhibited

In the second article we explained why workingmen should study eco nonics. The reson was plain and easily stated. The working people who produce, the wealth of the world, live hard through their whole lives while the capitalists live in leisure and luxury. The working people know that this is wrong. They know that the is wrong. They know that their poverty is not caused, as so many "Christian philanthropiats" say, by issinces, drunkenness, and extravagance. It is evident that the poverty of the workers results from the injustice of the system of production and distribution. Equally evident is it then that tion: Equally evident is it, then, that the interest and duty of the workers demand that they should understand the system under which they live, in order that they may abolish ity injus-tices. For, if the injustice is to be re-moved. It must be removed by those who suffer from it. History teaches that masters never willingly emasti-pate their slaves. And it is not enough for the working people to be dissatis-fied. They must know the same of their sufferings in order to destroy that and build up a satisfactory system in the place of the one they overthrow. They must think for ther

in the third, fourth, fifth, and sixth articles, we attempted decertain the fundamental points of Socialist eco-nomics, under the heads of "Vaine." "The Value of Labor Power." "Labor Power as a Commodity," and "Profit, In answering the question: "What Is Value?" we showed that the word value denotes a quality that the uneful products of labor have when they be come commodities, that is to say, when they are commonly produced for sale. The value of such a thing is its puchasing .power. and is fixed by the average amount of labor necessary to produce it by the methods commonly used. The argument by which we sup-ported this statement and the illustra-tions by which we made it clear cannot be repeated here for lack of space.

or repeated here for lack of space.
We then proceeded to show that, in present day society, the labor power of the worker—manual or intellectual—is a commodity as truly as are sugar and sawed tumber. He is sold-by the worker and bought by the amployer, and the price paid for it is called wages. The value of this commodity is fixed, through the workeass of competition in through the workings of competition in the labor market tjust as the value of any other commedity is fixed) by the cost of reproducing it. And the cost ng labor-nower is the

of reproducing labor-power is the cost of living of the worker.

In writing of, "Labor Power as a Commodity" we showed that it differed in those insperiant swepers from other commodities. In the first place, it is sold on a small scale, each worker having control only of his own labor power. The marker, therefore, labors under the disadvantage of being a small sciler, while the capitalist has the advantage of being a larger buyer.

In the second place, labor power cannot be withheld from the market as can other commodities. The farmer who does not sell his wheat this full has two grops to sell hext year. But

who does not sell his wheat this fall has two grops do sell hext year. But the workingman who does not sell his day's labor power to-day has lost it forever. Moreover, the sware of other commodities, by withholding them, may command a higher price. But the workingman who fails to sell his labor power for any great length of time becomes a corpes, with no labor power to sell.

sell.

In the third piace, labor power is the only commodity which, in being used up, produces a value greater than that consumed. The value of the pig from used up reappars in the value of the steel bloops—se greater and so less. But the value of the labor power used in making the ison into steel likewise responses. In the value of the steel likewise.

in making the iron into street likewise reappears in the value of the rised blooms—not the same in quantity, but considerably increased.

The recognition of this fact by Karl Marx readered deer the question which had perplayed all the earlier economists, including even David Hicardo—the question: Where does the profit come from! Many and strange were the "solutions" of this problem offered before the time of Marx, or since his time, by apologists of capitalism. But we have not soon to anamine these alleged seistions, nor do they decrease any answer. Marx estution is so true that it needs only to be understood and it is accepted: Profit—or, more correctly, surplus value, including profit rest, and interest—is the part of the not

eget of labor which remains after, nighing the veloc of the labor power egical twegets. It is the supplies of groduct of labor ever the one of ag. If represents the daily labor formed in excess of the amount repenkimed in excess of the amount re-quired to support the habitation." "And" since the tools and machinery and the materials used, as well as the Jabor, power, is the property of the employer, so let the whole product which results! from the using of that machinery, ma-terial, and labor power. Thus it, is, that

surplus value acrues to the owners of capital.

Bluce surplus value is a residue of the net product remaining in the hands of the expitalist after labor's paid for, it follows that every improvement let machinery or in methods of production and distribution, by increasing the productive power of labor, increases the magnitude of surplus wine. For, so long as the magne of production remagnitude of surplus value. For, so long as the means of, production remain in the hands of the capitalist, improved methods mean more productive labor, but not shorter hours or larger wages. Only by making if collective property will machinery become a means of lighesting labor.

At this point we left the economic theory and took up the history of labor, We showed how. From the activities

We showed how, from the earliest times that written history records (not from the beginning of society, however) there has been a division of people into a preducing class and a ruling and en-joying class. First there were sharted that and share owners; then there were serfs and feudal lords; now there are wage workers and capitalists. The first system gave way to the second, and the second to the third, not because men had grown just and merciful, but because the evolution of methods of production compelled this evolution in the social system. In the Middle Ages It was more profitable to hold serfs on the land than to own #faves;" in 'the nineteenth century it is more profitable to employ "free" wage workers than to hold serfs and slaves.

Each system has given way through revolution—a radical change in the relation of classes, in some places and at some times violent and bloody, el where and at other times quiet and peaceful. And the revolution has not been made by agitators or conspirators. It has grown out of conditions. Each revolution, so far, her unserted an old-master-class, only to put in its place a new class of masters, But the stage has now been trached when the string gle is not between new and old-sorts of axploiters, but between all the ex-

plotted and all the exploiters.
In the tenth article of the series We have set forth our reasons—historically conclusive reasons—for believing that the present capitalist system (to which the previously expounded redlonger; that the coming revolution is already mon mir and that it behooves or the wage workers, to hasten it and guide it stight, that it may come in our time and peaceably, not in storm and

Brother Morgan, explained, that he had many plans in view to win the present steel strike. "My plans," he hald, "may be summrised as follows:

"First. To make,a big blaff through the newspapers to distinction the iron and steel workers. Our friends who are in control of the Associated-Press are stockholders in the United States. Steel Corporation or allied unions of empital.

"Second. To make some of our managers, superintendents and foremen go to work, and to transfer them from piace to place to make it appear that we are doing business, and after the trouble is over some of them can be

fired as incompetents.
"Third. We will threaten to dismanthe mills in the annal tearns, and thus force the 'burshwa' middle class, in creer to save their little capital invested in, a corner greery, 'w withhold credit from the strikers and in turn

We can quietly import men from Europe, and allow them to walk around New York for a while, and then bring thous into the milit and certain influences can prevent the immigration officers from talking. "Seventh. If the wired comes to the worst we can depend on the course to swing injunctions and our state or mational efficers to send the militia. "Supplementary to those plans," does cluded Brother Morgan, "I might add, that I am developing a splendid proficalizing scheme, which aims at a unless of capital and labor and the solution of the so-called labor problem. I am aware that there are still thousands of workingmen in this country who are hungering to get rich, and the question of axploiting their fellowmen doesn't bother those, for I am developing a plan to laws them, and the solution of exploiting their fellowmen doesn't bother them, for I am developing a plan to laws them, and the specific of the tenter of the second of an adventing their fellowmen doesn't bother them, for I am developing a plan to laws them are still thousands of the fellowmen for axional stock, which is well.

Brother Morgan's remarks were greeted with applause throughout.

When he had concluded Brother Rocke-feller took the floor and declared that much of his profits, which were given to him by loyal oil, mining, railway, and other workers, would be cheerfully centriputed to conduct the present bat-tle with the strikers.

Brother Depew told a funny story about an Irishman shooting a wad in the air and hitting nothing, declaring that that was exactly what he shot at, and said that he had anthrances from a certain railway brotherhood chief that he would use his influence to strangle the strike right where it was.

(Great applause.)
Druther televant said that the contest was progressing nicely, and that most of the so-called labor leaders are con-servative men and the strike-would not reach into other trades, which view was also held by Brother Hanns, busi-ness agent of the Politicians, Union,

Brother Vanderbilt started to call a tention to the fact that in certain quar ters the strike was aiding to increase the agitation in favor of Socialism, but he was sharply called down by Presi dent Rockefeller, the chain holding that union." After some further discussion of

minor matters, the delegates accept an invitation to dine with Rusine Agent Morgan on board his yacht, where they met Sir Thomas Lipton, financial secretary and treasurer of the Tea Tasters' Union. The meeting then adjourned to the yacht. There was alcrowd trying to lick Lipton's boots at cuce. Trouble was averted by the pre-ence of mind of Chauncey Depew, o the Railway and Politicians' Union lils long experience in matters of the kind was of great service, and, while of course he got the first crack at the boots, all formed in line and eventually got what they wanted,

"Whereas, In all civilised countries the natural order of economic develop ment has separated society into two antaganistic classes—the capitalistic, a small class, the possessor of all the means of production and distribution, land, mines, machinery, and means of transportation; and the larger and everincreasing class of wage workers, pos sessing no tools of production; and

"The treasurer of the State Trades and Labor Council of Montana shall be the treasurer of the educational board. The fund for carrying on this educational work to be procured by appropriating 10 per cent, of the rever such voluntary contributions as the different unions may donate. No member of this beard of education shall receive compensation for services, and they shall report back to the State Trades and Labor Council at its next annual convention,"

This resolution is a forward step, ment gratifying to Socialists and worthy of imitation by all-labor organi-

(From the St. Louis Globe-Democrat.) "An unusual amount of activity is expected among the Socialists in the next few years. The fact that one of their parties, the one which was led by Debs, polled 85,000 votes last November, and that another of them cast 40(000, ahows that Socialism has grown to be a force with which the leaders of the great parties will have to recaus. Comrade James F. Oarey, one of the two Socialist members of the Massic-chusetts legislature, was the orator at the Labor Day celebration of the organised workingmen of Rochester, N. He said in part: "Mr. Chairman, Men and Women of the Learness and Women of

"In order that you may understand

the duty that devolves upon you, the workers of Rochester, it is first necesmry that you understand that since the days of our fathers, since the days when the Mayflower landed at Plymouth Rock, a change, has come over the dreams of the American people, and that change demands on your part ac-tion consistent with it. Because of that change there is such a thing as the organized labor movement. Now what is this change? It may be to some of you words that you may not care to hear, but, nevertheless some day, soon ar or inter, the truth of that chance of you, when the circumstances press, upon you as they will and force you to see the logic of the statement that, in the name of the labor movement, and in the name of the working class, the mercowned king, the king who wanders like a punper, the king who builds the palaces and does not live in them, the king who clothes the daughters of hing who clothes the daughters of his masters with satiss and slike white his own daughters walk is rage, the hing that dies like a dog, standing in the presence of plenty—I say in the presence of that uncrowned king, drauning away in his want of knowl-edge, is the name of that working class, I say to you that the change that has the many alone since four the fost of white taken place since first the foot of white man pressed the sands of my native state, that change demands of you that you THINK with all of the brain that rou possess, and when you have bought, then ACT in accordance with

"The time was in this republic when the means by which the people pro-vided themselves with food and cloth-ing and shelter, in the days of the early republic, in the days of our fathers. were in the possession of each family. Each family was properly speaking in-dependent. There were no tramps or millionaires. There was no need of nome people asking others for work.
There were no trusts. The tools of production were simple and inexpensive.
But the power of human genius applied But the power of human gunius applied itself to those simple tools, and they grew like a living thing. As the hand hoom by successive steps became the improved Northrup boom, and as the piece of bruben ghass which the absomaker used for scraping the bottom of the sole became transformed into a busing machine, these tools became more and more complex and by degrees they passed out of the peasesnion of the more and more complex and by degrees they passed out of the possession of the possession of the people and into the hands of a small class that is constantly growing smaller. This class has now become the arbitr's of the destiny of these who had formerly owned the tools. The people have become divided into two classes—THOSE WHO OWN THE FACTORY AND THOSE WHO OWN OWN OFTHIS

AND TROSE WHO OWN NOTHING BUT TIERS LABUR POWER The for worken confronted the men who owned the factory, the looms, the mills, etc., they recognized that those

men did not operate them to make shoes or clothes for themselves, for each factory made more than their owners could consume in a lifetime What was the next and logical coactu-sion? The workers realized that the owners of the factories produced shoes, not for his own use, but for cale. Therefore it is to the factory sweets Therefore it is to the actory ower interest to buy the commodities that enter into the production of shoes at the lowest possible price, and to sell the finished product at the highest possible price. They say to the workers "We will organize, we will consolidate and control our commodities and respondents. and control our commodities and reg : late its price, but you workers should not organise. "The reade unions, therefore, attempt

to interfere, demanding that the standard of living of the American workers shall be higher from year to year, but the development of trusts en-ters there and attempts to destroy the unions by open opposition or by the introduction of labor-saving machinery which floods the market with an in creasing amount of labor offered for tween the rocks and the whiripool. Or the one side is the growing concentra tion of wealth-the organized capital fused, to recognize the legitimate ganization of the workers. On the other hand are the workers, displaced by improved machinery, who are ready to take the places of the men who go

LYING ABOUT THE STRIKERS.

President Shaffer the Victim of Venal Capitalist Journalism.

The Old Came of the Copitalists, to Discredit Loaders In Time of Strike by Fabricated Statements and Fake Interviews" - The Highly Meral "Times" and the Seah "Sun" Join

PITTSBURG, Sept. 47-The car PHTTERURG, Sept. 4.—The centum of the daily press in misrepresenting, distorting, and falsifying news regarding the labor movement is an old story to many of us. Socialists understand that in the press the capitalist class possesses its greatest power for perpetiating its domination and that one of the functions of modern journalism is the retailing of half-fruths that will do more injury to the working class cause than the telling of whole lies. We appreciate this power because lies. We appreciate this power because we know how the people are deceived by its exergise and we have felt it in our work.

The mass of workingmen have not understood it, but are learning fast. It is altogether probable that by the tip the steel strike is over the strikers and their leaders will appreciate to what an extent the capitalists will go to maintain their supremacy, and of what vast importance it is to have a press which will be wholly free from capi-talist influence and devoted solely to the interests of the working class.

These remarks are preliminary to another interview which I have held with President Shaffer of the A. A. relating to two articlés which appeared re

"Bun" respectively,

The "Times" published a long and circumstantial stery, evidently concoct ed with the utmost care to make it ap-pear credible, to the effect that the "a Pinte Workers" Protective Association had an old score to pay off against the Annigameted Association of Iron and Steel Workers and phricularly against President Shaffer.

The article closed with the following paragraphs, alleged to be taken from an official statement of the Tin Plate Workers' Ambeigtion:

"Two years ago, while we w "Two years ago, while we were de-cussing scale points with W. H. Gre-ham, vice-president of the American. Tim Pinto Company, that gentlemen showed a commencation from Presi-dent Shaffer, which was sent in reply to a statement by Mr. Graham that if-he granted certain wage advances to the Amalgamated members employed in the hot mills of the company, he would have to grant an advance also to would have to grant an advance also to the tin house men, as the union of the tin house men would undoubtedly de-mand if. Shiller replied:

"The tin house amployees are not entitled to recognition in this discus-nion. They are not skilled man, and should not be organised."

President Shaffer said: "This article was originally sublished in an Anderson, Indiana, paper and is a complete lie. I did not write to Graham on the aubject and I certainly never used the expression credited to me. I wrote to the vice-president of the Tim Plate Workers, contradicting this article still I received a reply from him thanking me for writing to him.

phatic in his repudiation of all aliged interview with him published in the New York "Sun," one portion of which ran as follows:

How long do you think this strike will last?" "Till both sides come to their

senses."
"That is rather a remarkable statement. Are you willing to say that the Annigamated Association has made any mistakes in this matter?

we will run our shops or permit our men to run them."-Warner Arms of the Steel Trust.

Here the leave is squarely presented by the capitalist. His mere statement of the question, he no doubt thinks, will prejudice the public in favor of the trust. He thinks that the idea of the men "running" the shorts is so proposterous that it will meet with ready condemnation. The Socialist Party believe that the man should "run," or. to improve on Mr. Arms' expression. own the shops. What do you think about it, you men who work in the shops?

You made the abops.

You do the work in the shops Your labor makes the steel which esriches the trust owners.

Why don't you OWN the shops, and run them by electing your own man agers and directors? What do the trust owners do? They

"finance" the trust, they work rather hard manipulating the stock market and crushing out competition. ALL
THERE THINGS ARE UNNECESSARY. ALL THESE THINGS
WHICH THE TRUST OWNERS DO SO ENERGETICALLY ARE DONE ONLY FOR THE PURPOSE NOF PUTTING IN THEIR POCKETS THE WEALTH YOU CREATE, ALL POSE OF TAKING FROM: YOU

THAT WHICH YOU PRODUCE. The trust owners hire a few known men on salaries to manage and direct the actual work of production in the shops. This you could do your-selves, electing the managers from your own ranks.

Whi'e the capitalists own the shops, you have to work for just enough rages to support you.
If you oward the shops, you would

get the full product of your labor be-cause you would not be paying onermous dividends to a class which does othing but own you and rob you IT IS LEGAL FOR THEM TO ROB YOU BECAUSE YOU BLECT LAW-MAKERS WHO BELIEVE THEY SHOULD HAVE THAT PRIVILEGE.

The capitalists awa the land. They have no right to the land because na ture leaves it for the use of all. The land'existed thousands of years before the capitalists ever lived. They did not make it. They have no right to fence it off and call it their own, espedally as they don't live on it or work

The capitalists own the steel you make in the mills. They have no right to it. If they furnished capital to start the mills it was capital that wor made for them by your fellow work ingmen. If they pay you wages it is only part of the wealth which you pro-duce that they give you back in wages.

They have no right to the hind nor the mills, and if they did not own the land and the collectivey would not own the steel you make. But they HAVE the steel you make. Occasionally the capitalist or the politician lets slip a saying which is of more import than he dreams. Sometimes his sense of humor forces the truth out of him under the guise of a joke. Of such nature is the famous overtion of Timothy Campbell, "What's the constitution between friends?" and Tom Reed's deeper witticism: "An hunest politician is one who stars bought," At other times rage or the arrogance of power draws an unwise utterance from him, like Vanderbilt's, "The people be damned." The Steel Trust magnates have recently spoken wher than they knew, and we see that even out of the mouths of capitalists may come wisdom, although the capitalist knows it not.

"This is no time for arbitration."-Morgan to Shoffer.

Right. The struggle between working class and the class which owns the capital which the working class has greated; is to be settled, not to be arbitrated. "Nothing is settled motil it is settled right." If you arbitrate now and call a truce, the class struggle will soon break out anew. It will not be downed, and must be settled.

THIS IS NO TIME FOR ARBITRA-TION. THIS IS THE TIME SET THESE OPERATIONS DO. NOT TION. THIS IS THE TIME SET PRODUCE ANYTHING, THEY ARE TOO A TEST OF STRENGTH, AND DONE SOLELY FOR THE PUR. IF THE STRENGTH OF THE WORKERS FAILS IN THE STRIKE, IT CANNOT FAIL AT THE BALLOT BOX.

Let there be no arbitration, conciliation or compromise with the universal evil of capitalism. There can be no permanent arbitration of interests that are as directly opposed as those of the wage slaves and the trust owners. Any truce which may be called is only a full in the widespread conflict, only a breathing spell in the struggle' which must be carried on to the final victory of the workers. There can be no permanent gain except by the abolition of the system of private ownership of iand and capital, and the consequent abolition of injustice and class rule.

THE CAPITALIST, ARROGANT WITH POWER, REFUSES TO AR BITHATE, AND WHEN ELECTION COMES YOU CAN DO THE SAME.

The capitalist has stated the terms of the struggle. No quarter to the capitalist chas until they have been de prived of their stolen privileges and power, and put on a level with the rest of humanity!

The capitalist refuses to arbitrate now because he believes that starvation and want will enforce submisison When election comes the capitalist will tell you that your interests and his are the same. See that your vote is given

WORKINGMEN, YOU CAN DE-CIDE THIS QUESTION, OVER WHICH YOU ARE STRIKING, BY A CROSS MARKED WITH A PEN-CIL ON YOUR BALLOTS AT THE NEXT NATIONAL ELECTION.

Strikers! even though you are forced to patch up a temporary agreement with your masters now, do not forget to carry this question to the ballot-box. WILL YOU MUST VOTE THE TICK-ET OF THE WORKING CLASS, THE SOCIALIST TICKET.

THIS IS NO TIME FOR ARBITRA-TION. TRUE IS THE TIME FOR REVOLUTION—A PEACRFUL REV-OLUTION AT THE BALLOT-BOX.

"The d-d fools dan't know what's good for them."—J. Plorpont Morgan. Perhaps Mr. Morgan is right, although he great something quite dif-

ferent. He memt that the strikers were fools because they rebelled at working for the wages he was willing to pay them, and were ready to stop work to defend themselves against his oppression. Mr. Morgan, this is only oppression. Mr. Morgan, this is only the beginning of the strikers' wisdom. If they are "He-n fools" at all, it is be-cause they did not demand all of their rights instead of a small part of them, and because they did not vote against the interests of your class when they

had the chance.

They permit you to own the mills they were mad pile up millions for you, while they don't get enough to carry them over a few month's idleness. Ferhaps they don't know what is good for them. If they did know,

That is by voting for judges and other public officials who will be pledend to inter pret and administer the law directly in the interest of the working class as against the capitalist class. There is only one party which pledges its candidates to such a course, and that is the Socialist Party. It is "up to" the workingmen to vote as they strike, to boycott all scab tickets on election day.

All those are historic facts; as well attested as Caelgoos act of last week; and we see to reason why we should forgot them now, if we assupe these with him as a toan in mortal pain; we sympathise a thousand times more douply with the fever stricken seldiers in those "hospital" corps, with the maimed and slaughtered ratiway toilers, with the univers bounded from

The New York "Herald" (a paper too evas spinico sa esergia ot vibrario when it is sure of being on the peps inruide) has been toudly demoring for the re-establishment of the tortures of the inquisition; and the gilt-edged "Commercial Advertisor" seconds the demand. Others, while not going to this ridiculous excess, are still demanding the enactment of special laws against "dangerous agitators," like the famous exception laws of Germany.

If they would but have learned from history they would know that ornel punishments never prevent crime, but always provoke it. And the history of the Socialist movement in Germany. growing from year to year in spite of march's "blood and from" policy should teach them the suicidal felly of their plans. But it is always the fate of a ruling class to suffer from its own foolish cowardice. They ass'afraid of free speech; and when they begin to curb free speech their cause for feat is trebled.

If they were wise-if the agents of class rule ever could be wise-instend of talking about repressive laws, they would be asking for the causes of such crimes and trying to remove them.

There is no considerable class of group of the American people that serimaly approves of assaugantion. It is highly improbable that Casigous' act was even the result of a conspiracythough the police will do their best now as in 1985, to prove or to many facture such a completery.

But it is comprisely that even the

sews of the capitalist press shows how little real indignation or norrow ha been stirred among the people. And all over the country, in Massachusetts. Pennsylvania, Ohio, Illinoia, and elec where, fadividuals or groups of thennative Americans, and he no mean revolutioniste -liave | Impulsively expressed joy at the attempt, ...

With balasced "crank" like Caulgous. On the other hand, it has not yet learned to express itself in peaceful, intelligent, and organised action. The Socialist are teaching it that.

But the capitalists cannot or will not learn that such crimes as this always have their cause in justified social unrest-that the real guilt lies finally of the door of those who have distaherited their fellowmen and would make of them more howese of wood and drawors of water.

There is one way and only one of guarding against the repetition of such wild and disastrous outbreaks as this. That way is to establish social justice, to mangurate real freedom and equality, to create genuine social content and fraternity by the overthrow of capitalism and the building up of the Socialist

A MINDONGERYICOF OF TRADE U MECKINE.

En a recent forms of "Comm a'. semi-socialistic , publication in this city, we find an editorial criticism of trade unionism set forth in these

"The trade union principle is veally disuniting one; while it appears the capitalist, it does so with the methods of the capitalist, and its application is strikes is always tutmical to a hody of men equally entitled to work in th economy of the world, but who have not accepted the trade union principle and the strike thus becomes a war of workingmen on workingmen. The card talist always has this weepon to de fend himself with against the strike whether the strikers are wrong or right in their original demands."

Of course, there is a certain amoun of treth in this statement of the case but the element of truth is very small compared to the error. It-is-true that In the struggle between organized in for and capital there is often incidentally involved an antagonism between organised laker and organized-or, to speak more currently-butween class onscious workingmen and those who are not class-conscious. This is the point upon which "Commonwealth" bases its declaration that "the tradunion principie-in really a disuniting one," But the facts by no means jus tify that conclusion.

There are unions, a few outy-the need to be more such-which proceed on the basis of securing a monopoly of employment for their own member and excluding other workson from membership. Such unloss fall in the long run-and deserve to fall. To then the officiem of "Commonwealth" test But the general policy of the trad

unions to-day is to mather into their ranks all the workers of their respec tive trades and to give to all of then whatever benedits their organized of fort may be able to secure. And it is a well-known fact that the benefits of trade union activity extend beyond the membership of the miless. In many trades the neg-union workers are abto command botter wares or twenter better conditions than they otherwise could, simply by reason of the fact that the exception of a very few organize tions, which do not deserve the name of trade unless, it is absolutely fale that the action of the union is injuri ous to those outside its ranks. The veit reverse le the fact.

But it appears from the closing words of the paragraph quoted that the editor of "Commonwealth" has in mind, no simple non-unlocatets, but non-towho offer to take the places of striker in time of trouble. His sympathies are here entifuly misplaced and his ceases ing is false.

There is war between the constant class and the working class. It to t bitter and unreleating war. There is no industrial peace; there are only or casional, incomplete, and insecure in tervals of truce. Hvery strike or bey cast or lockout or blacklist is an act of war. Let us be frank about this, It is est to call things by their right names "Gentlemen ory Teace, peace"-6 there is no peace." That bistoric and ing is so true in this application as in its original one; and orying "Peace" will never bring peace so long as the conditions which produce was one

Moreover, this is a rightness war on Labor's side. It is a war for human omenciontion, a war for human solidar ity, a war for the rights of manhood for the protection of womaniband, for the mivation of childhood.

The cases are quite parallel. The somb may be, in some cases he is, ex-cusable—just as political traitors and ordinary, liars, swindison, thioved, and rebbers are cometimen surrunhla-all the conditions of early training and present temptation being taken into account. But scabbing is not to be defended on that ground, any more than any other crime.

· A great deal of mandlin sympathy is being poured out for the scale just now by the capitalist newspapers. Men who claim to be Socialists, as the editor of "Commonwealth" does, should not told in the crocodile weeping of the "Bun." The service editors who support the capitalists in declaring lockouts and keeping blackilets, in outting fown wages and maintaining decessive hours of labor with periodic shut-downs while thousands are classesing for amployment-these editors are loud in defiof "the right to work," when it is question of bringing men in to break a strike. Men who claim to be half-way Socialists will do well not to join it this hypocritical outery. The editors of the trustified press, while praising capitalists who refuse to allow their emplayees to join unions, who tymenica potty ways, who can go to the extent fas has several times been done in recant years) of forbidding them to take any part in politics—the same linkspit ties who defend these tyrants are now vehemently clamering against the "abridgement of personal liberty" by the unions. BONGOTHA, H. E., August 5 .- The prediction made in my recent letter to you that inhor would soon be given the cold shoulder or "marble heart" by the Liberal or whep-at-a-time "Socialist" tritistry has been fulfilled suich som-er than I suitcipated, and, while I have no library for a long letter, I feel I must when we and the Accession constraints give you and the American comrades a summary of the situation.

The farmers, who are numerically and productively the most important

class in the colony, have recently (with in a few weeks organized a Farmer Union, which is organized avowedly o the basis of class interest. It is ester affily non-partisan, but has a definite legislative program and instate that, no matter what party is in power, its pro gram mint be carried out. It aireads has a membership of 8,000 in this, the North Island, and is growing rapidly. The South Island is to be organised soon. The program has two chief points: 1. The repeal of the labor legislation, on the ground that it he made wages artificially high and thus injured the farmers as employers of ta-bor; 2. The repeal of the protective tacks duties in the interest of the farm-

ers as consumers.

The trade unions here are not class conscious, saif-reliant bedies, but are largely the creation or outgrowth of the so much use of the arbitration act, keeping the conciliation beards shill arhitration court constantly at work over petty disputes that they have allenated any sympathy they made had from eth-er classes. The compulsory arbitration act has festered a dependent spirit in undoubtedly created much friction by the facilities it has offered for siring petty grievances. It MAY have prevented strikes, but this is by no mean certain. It is true no strikes have ecsix years might have rolled by without strikes without the act, for this in soi an industrial cosmiry. There are half a dosan towns (of the second rate) in Ohlo which are searcely known outside the state, any of which is larger than in the wark in saying Daytow has more manufacturing than all New Bealand put together. ************************************ WHAT YOU CAN DO FOR SOCIALISM.

Whenever .. you have an "argument" with an honest workingman and find, as is usually the case, that the only reason that he is not a Socialist is because he knows not what Socialism is, try and get him to subscribe to THE WORKER forthree months. If he cannot or will not subscribe, go down in your own pocket and pay for his subscription to THE WORKER for three months-fifteen cents—if you can possibly spare the money. At the end of three months you will probably have a regular subscriber to THE WORKER and an intelligent and hard-working Socialist comrade, who will do with others as you did with him.

THE LESSON OF THE STEEL STRIKE.

Our readers have no doubt kept themselves informed as to the great strike in the steel industry, so a detailed re-view of the causes leading there to is here unnecessary. 15

Rvery effort consistent with honor has been made by the men involved. Every concession that could safely be made has been granted. Yet so now erful lass capital become and so-strong ly entreached does it, consider itself that pothing short of conditions that eventually and certainly eliminnte the Amaignmeted Association would satisfy its agents, Morgan and Schwah. There is the decisration of the trust And in its fight against organized labor it will receive the support of every employer of labor in the country.

What does this declaration signify's inates the workers, in the steel indus rty will either be free men or slaves It means that they will have the right to bargain for wages, or else that they will be compelled to rely on the philauthropy of the employer to give them whatever reward for their toil he may choose. It means that they will be independent and self-respecting citizens of a great republic, or seris of a most rinding taskmaster—a trust—withou onscience and without soul. It means that the vaunted intelligence and so perior skill of the American worker repudated. It means that capital unat be master—supreme and map-proachable—and that labor must be docile and subscribent, relying entirel upon capital for the right to live. means that labor, the hone and sines of the nation, the bulwark of our inattutions, the relinace of our govern-ment, is no more to be free industrially or politically. For there can be no political freedom where industrial sta-very exists. It means that whatever conditions are forced upon the steel workers as a result of this strike will later, be imposed upon you. It means that men like Morgan and Schwab must be ratired from the management of the steel trust; that the trust must recede from its position, and that the right of labor to organize and treat for conditions of employment must be

For Circulation Among the Go **Speaking Workingmon in This Com**

A very useful pamphlet for circuls tion among the German-speaking voters in this municipal campaign is the "Municipale Forderungen der Bocisidemokratic," by Herman Schlueter, edfor of the "Volkasettung." The readers of that paper have already seen the further in the form of a series of deliforial articles and will recognise the adtimbility of bringing the penaphiet to the attention of the largest possible author of German-American workingmeu in the city between now and sie. tion day. After a general introduction the author takes up successively the subjects of education, public health, Labor taws, and regulations, provision for the unemployed, municipal ownership, the housing of the people, city finances, municipal self-government, etc., show ing what the Bockst Democratic Party proposes to do for the benefit of the working class of New York City, if put in power by the votes of the working

This valuable pamphlet (24 pages) is published by the Socialist Literature Company, and is sold at five cents a copy, putting it within the reach of every workingman who wishes to un derstand the municipal program of the Social Democratic Party. It should be added that, fast from being considered robbers, these people are known as "distinguished gentlemen" and "eminent citizens," and instead of calling the proceeds of their "industry" by the regular name of "awag," is euphoniously termed "profits

. . . . \$ 5 Again, after deducting \$1,920,000 of dividends from the net receipts, we find that the Manhattan paid "fixed charges" to the amount of \$2,677,786. "Fixed charges" generally include tax on, rentals, and interest payments or bonds, the inter item usually being by far the most considerable. With the exception of the sum paid out as taxes which is usually a small part of the whole, "fixed charges" are as much "profits" as are divideleds on the stock. From the above figures you can see the exploitation of one little corpora tion in New York. It is upward of \$4. 000,000 a year. And this town is full of similar corporations, many of them larger and many of them smaller. tional convention assembled, restirms ternational Socialism, and declares its nim to be the organization of the working class, and those in sympathy with It, into a political party, with the object of conquering the powers of government and using them for the purpose of transforming the present system of private ownership of the means of production and distribution into col-lective ownership by the entire people.

Formerly the tools of production worker. To-day the machine which is but an improved and more de-teloped tool of production, is owned by the capitalists and not by the workers. This ownership enables the capitalists to control the product and keep the workers dependent upon them. Private awarenite of the means of

production and distribution is respon-sible for the ever increasing uncertainly of livelihood and the poverty and pleary of the working class, and it divides society into two hostile classes— the capitalists, and wage-workers. The once powerful middle class is rapidly disappearing in the mill of competition. The struggle is now between the capitalist class and the working lass. The possession of the means of livelihood gives to the capitalists the control of the government, the press, the pulpit, and the schools, and enables them to reduce the workingmen to a state of intellectual, physical and social inferiority, political subservience and virtual slavery.

The economic interests of the capttalist class dominate our entire social systèm; the lives of the working class are recklessly sacrificed for profit was a are fomented between nations, indis-criminate slaughter is encouraged and the destruction of whole races is sauctioned in order that the capitalists may extend their commercial dominion alroad and enhance their supremacy

But the same economic causes which developed capitation are leading to Soclalism, which will abolish both the expitalist class and the class of wage workers. And the active force in bringing about this new and higher or der of society is the working class. All other classes, despite their apparent of actual conflicts, are alike interested : the upholding of the system of private ownership of the instruments of wealth production. The Democratic Republican, the bourgeois public own-ership parties, and all other parties which do not stand for the complete overthrow of the capitalist avatem of production, are alike political representatives of the capitalist class.

The workers can most effectively act

As such means we advocate:

1. The public ownership of all means of transposistion, and communication and all other public utilities, as well as of all industries controlled by monopolies, trusts, and combines. No part of the revenue of such industries to be applied to the reduction of taxes or applied to the reduction of taxes or property of the capitalist class, but to be applied wholly to the increme of wages and shortening of the hours of ment of the service and diminishing

the rates to the commons. 2. The progressive reduction of the hours of labor and the increase of wages in order to decrease the share of the capitalist and increase the share of

the worker in the product of labor. State of national insurance of working people in 'case of sections, lack of employment, sickness and want in old age; the funds for this purpose to be collected from the revenue of the capitalist class, and to be administered under the control of the working class

4. The inauguration of a system of used for that purpose in order that the workers be secured the full product of education of all children up

to the age of eighteen years, and state and municipal aid for books, clothing, 6. Equal civil-and political rights for

7. The initiative and referendum proportional representation and the right of 'recall of representatives by

their constituents. But in advocating these measures as steps in the everthrow of endinists and the emisblishment of the Co-operative Commonwealth, we warn the working class against the so-called bupile densembly inchements as un attovernmentall-control of public utili-

And the pro-cession of bishops, priests, parsons, at-torneys, and business men in silent sympathy, smile assent as they pass by while their refined ethical sensibilities rengain serene and undisturbed at this

bold and unadulterated robbery.

As shown by the above table, the total value of the property which these three companies hold is \$372,760,000. Upon this sum the people pay annually \$14,911,000, for which they receive \$362,000. And, ridiculous as it may seem, this small sum which the con panies pay, is a part of the profits which they have already taken from the public. Hence the companies realprivilege. They neither rent nor buy the people, but they insist upon taking annually \$8.458,000, blood money by ly pay nothing. By reversing the statement, it appears that the workers pay these stockholders \$14,912,000 for \$302,000, which in scalify was at all times the property of the workers. financial and political circles, men known as "respectable citizens," who are now conducting a campaign against vice.

long as the people are willing to pay \$14.012,000 for \$362,000 of their own money, is there any one so sim-ple-minded as to think that the recipnts will not continue to accept it? Only a few years ago the Consolidated Gas Company of New York had a paid-up capital amuunting to him was increased. While those companies can get four-teen and, a half millions of dollars a year for nothing, they will not only he willing to accept it, but they will fight to prolong the privileges. They will even divide a large part of this sum with the political bosses in order to retain this privilege—even at the risk of their "respectability." These soentical profits or dividends BECOME A CORRULTION FUND, USED TO FURTHER THE INTEREST OF THE CORPORATIONS AS AGAINST THE INTEREST OF THE WORK

THE BURWAY PRANCHISE.

No more giaring instance of this fact has occurred in the history of New York than that of the subway contract and franchise. This franchise is val-aged at TWO HUNDRED MILLIONS OF DOLLARS. Yet it was given to the national contractor for neventy-five years for the petty consideration of 4 PEB- CENT., OS. THIRTY-FIVE MILLION DOLLARS-plus, of course hush money for "our representatives."

The same individual was presented with a clear \$8,000,000 on the subway It will be observed that \$17,000,000 construction contract. Who is there of the \$28,000,000 capital stock was not invested from the capitalists' original that cannot see and small the corrup in this criminal deal? Who will have the audacity to deny that this recipient and the political bosses are in partners in this theft? Who will eeny that they have joined hands to rob and pillage their constituency, the workers of the city?

New York is not an exception in this respect. Prof. F. Speler tells us that the present market price of all the Philadelphia street car lines is \$120. 000,000; that the actual cost of con of the franchises. CHRECUSATION.

Conxistent with the increase of profits and corruption is the pheno of consolidation. The reason for this is to be found in the fact that greater economy and better service is possil under consolidation than under compe

The advantages to the companies arise from economy in administration by-reducing the number of officials and workmen; by cessing, in part or altorkmen; by ceasing, in part or alto gether, to operate unnecessary lines; by ecuring closer prices on stock because of larger purchases; by avoiding least contests arising out of the conflicting interests of many companies; by main taining one instead of many shops for repairing and manufacturing purposes; by, more substantial construction of by, more substantial construction the main lines, reducing cost of repa ing to a minimum; by systematically distributing rolling-stock, - obtaining solidating power-houses, thereby econ-omizing both in necessary land, build-ings, and power; and, last but not least, by a great economy in the cosruption fund; for where there is but company bidding, only one politi-boss need be dealt with. Although the one boss and his lieutenants may receive far more from the combined companies than each of several bosons and their lieutenants would preceive from several companies, yet the total amount paid by the combination for the same privileges is less. For the same reason the companies favor consolidation.

These pecuniary advantages to the company are incidentally followed by some advantages to their patrons. The roughined companies afford a better trausfor system; run their cars at a higher average speed; dispatch the care from the center of the city to the outskirts on the most direct lines; reduce the number of collisions and other acci-dents to a minimum; altogether result-ing in eafer, service and greater economy in time and cash to the patons. Similar advantages result from tries. For these reasons the people will continue to support consolidation until all municipal industries are brought under one head.

Hence the theory that a solution may be found in combetition is vain, sines competition offers a meximum disage-vantage and a minimum advantage; while combination offers a maximum advantage; and a minimum advantage to all, so far as possible under private

The fact that the patrons receive many benefits under a consolidation of companies which they could not receive from numerous independent companies opens the opportunity for the politician secretly 60 receive large sums of money from the correction sums of money from the corruption fund, side yet escape public censure by justifying his vote or sympathy for the combination on the grounds of the public advantage derived therefrom.

Thus we see the companies, the politicians and the workers all favoring consolidation for satirely different sussions. The companies favor consolidation solely because of the increment.

tion solely because of the increased profits which can only be realized by system and economy. The boss politi-cian favors consolidation because be can secure larger bribes for himself and his lieutemants from one large com-pany than from any one of several small companies, while the working class favor consolidation solely because of the economy and advantages to the community under possible thereby.

The constituents of the politicians and the patrons of the corporations are fur the most part composed of the working class. The profits taken by anies from the workers are m ordinances extending the privileges, of the companies, thereby bluding the workers to surreplier still more profits. From the profits spring the spoils of afoffice, which serve as a cement, hold arions logically follow the industrial combinations, and being comested to gether with profits, they become poli-tically one and the same organization having a mutual interest and 'n. common purpose-namely, to take more profits (or spoils) from the working

THE CAPITALISTS MANIPULATE THE POLITICAL MACHINES FOR PRIVILEGES ' GAINED THROUGH THEM; AND THE POLL RTS FOR THE SPOILS GAINED FROM THEM; WHILE BOTH UNITE IN SUPPLESSING THE WORKERS FOR THE PROPITS FILCHED FROM THEM.

Thus profits lead both to industrial consolidation, to industrial-political combination, and to corruption. The enitalists erstematize their work and to system and economy. It is eacrifieed, by the capitalists an well as by the politicians, wherever greats or spolis are at stake.

are at strike.

The advantages of the application and the politicians are in proportion to the profits taken; while the disadvantage of the workers is in exactly the disadvantage of the workers is in exactly the disadvantage proportion. The daily outrages does mitted upon the New York travelling public are fraught with sordid greed. The downtown morning care on all the lines are like great questioners on wheels, whething to the market. The creating approximate and injured, regardies of countries or health. The more present them.

grandy for profits and indifferent to the confinet and health of their patrons; on the wher are the working class, indif-ferent to profits, for profits are their burden, but sparred on by their isterest in better service and greater

sery of time and labor. PRIVATE OWNERSHIP OT FAULT.

The very purpose of municipal indus ries is defeated by private ownersh and the element of profits. 80 LONG AS PRIVATE OWNERSHIP AND THE PROFIT SYSTEM CONTINUES MUTUAL INTERESTS THE THE CAPITALISTS AND POLITI CIAND MUST CONTINUE TO THOW ANTAGONISTIC TO THE WORK-ING GLASS UPON: WHOM THEY PREY. PUBLIC OWNERSHIP OF MUNICIPAL INDUSTRIES AND FAANCHINES UNDER THE CON-TROL OF THE WORKING CLASS AND THE ABOLITION OF ALL PROFITS, ARE, THEREFORE, ES-SENTIAL TO THE BOLUTION OF THE MUNICIPAL PLATFORMS.

It must be remembered, however, that the capitalist class are aggressively in favor of the profit system, for the reason that the profits which they take are supped from the working class and not from themselves; whereas the working class are baginuing to see that the producers can never receive more than their total product, hence as a class they can never be recipients of profits, and for this reason they are bocoming aggressively opposed to the pro-fit system. The workers are accord-ingly separated by reason of their class interest from the capitalist and their actions are necessarily inspired by dif-

ferent motives.
THOUGH THESE OPPOSING
POWERS MAY BOTH ADVOCATE MUNICIPAL OWNERSHIP. YET WE MAY DEPEND TON IT THAT EACH WILL, SEEK TO CON HERVE THE INTERESTS. OF THEIR CLASS IN THE EXECUTION OF THEIR DESIGNS.

GAPITALIST MUNICIPALIZATION.

Whenever the working class manifeets any desire to organize a working men's political party, the capitalists mediate prevent such action by organis-leg "municipal ownership" and "reform" parties; or they cause one of both of the two old parties to promis municipal ownership, as was done to the name of the subway rapid transit of New York, Whenever, also, the inbetter assved by municipal ownership than by private ownership as effort will be made to sacrifice, in part, a few enpitalists for the benefit of the class. Willeneves the plant will-not pay interest upon both the capital and the watered stock the itbekholders will be suddenly stricken with the "reform" fever, and they will become public benefictors by selling the plant to the municipality, together with the franchise for which they have paid nothing, eschanging their stock at par for manicipal bonds.

in each of the three cases the result to a ways practically the same. The revenues continue to pour into the coffees of the capitalists. In the intercane the revenue finds the way through The channel of interest on the bonds. In each of the other instances they use the revenue with which to reduce the taxwoon the property of the capitalist.

Whatever benefits may arise to the pol ownership arises in spite of the offorts of the capitalist class and not be-cause of them. The workers are there-lure in no way interested either in the capitalist political agitation which leads to such municipal control or in such municipal control tiself. Just as the interest of the capitalist class can be conserved by the capitalist controlling the municipalty owned indus-tries, so also can the interests of the working class be conserved only by the re taking control of public at.

MECHANICAL FORCES OF REVOLUTION.

In the Glasgow-exhibition may be seen many striking illustrations of the growing universality of manufacture. A notable instance is that presented by the Machinery Hall, where some of the intest apeciment of machine and engineering tools are exhibited. There is a very fair display of British-made tools of this class, but they are very far innecessary for producing all kinds of mechanical plants. In the field of socalled inhor-taving machinery there is no doubt that America boids the first place, and the reason for this obviously lies in the high wages which have prevaited in the states. Where puges are high the tendency always is to improve the mechanical appliances so as to do the work with an little inhor as possible; not, of course, in the interest of the laborer, but in the interest of the amployers, who have no particular de sire to save labor but every desire to save the cost of labor, wages. In this exhibition are to be seen pneumatic hammers for fastening rivets, etc. with which it is said one man can do the work ordinarily performed by or more men; automatic machines which reduce the necessary amount of that they increase the rapidity of out put from 20 to 100 per cent. The effect of all these improvements in mechani-cal appliances must be ultimately to reduce the amount of skilled labor to a practically infinitesimal quantity, and to make the workman more than ever the siave of the tools he manipulates

so long as these tools are the properly of the master class. But the result will be also to bring about a greater sense of solidarity among the workers them-

the entitled "The Lemon of the Steel Strike," published in our last leave. We are not pleased when other papers and we greatly regret having fallen into the error, for -which - we hereby toring to our Connecticut contest PREPARE FOR ANOTHER PIGHT.

The ending of the great steel strike by a compromise which, while its bestile are not yet made public, is cormakes it timely for the steel workers and others to begin to think very serpasty about Socialism. EThe steel workers have already recog-

ted that such a strike as theirs was a genuine class battle. They were Egiting the organized capitalist class of the country. The press and other orus of "public opinion" were against thet . The power of government wer ready at the disposal of the masters, had the masters needed to use them. The workers have found that, armed only with the weapons of trade union s, they were as match for the capi-Salist class. It is now time for their ns with which they may be surto win their freedom.

eritta and judges in all the localitice affected by the strike had been been actually chosen by the morkers insted and elected upon a platform swhich pledged them solely and simply o the sarvice of the working class as minet the assistant class. Can there he any doubt of the enermous advantinge that, would have given the steel schoon in their strike?

Puppose the city authorities had been endy to use the police authority to a also in. Suppose the city councile had been ready to appropriate money erts, to bein the strikers in beiding ou erative employment to the men thrown out by the conflict. Suppose the judges said been sundy to insue injunctions

against Mr. Morgan and bis omwd, instead of being ready to leave them at Mr. Morgan's bidding. Would not the Steel Trust have hastened to make an amicable settlement at the very beginning?

These are the very least of the ad vantages that the workers would have gained if they had solidly voted the Secialist ticket at the last election-FOR THE SOCIALIST PARTY ALONS TAKES THE POSITION HERE OUT

But the steel workers and those who sympathised with them in their strike -which is to say, practically the whole working class-were able, had they voted together, to take possess of local governments only, but of the whole machinery of the states of Penasylvania and Ohio. A Socialist state administration would have given the Steel Trust the option: Either settle your troubles promptly or turn over your mills to be run by the public for the public benefit. Would it not have been wise for the workers to vote such an administration into power?

All this is not Socialism. It is only the beginning of the social revolution It is only a suggestion of the advantages that the working class would gain AT ONCE, without waiting for complete victory, once they united in the Socialist Party to use their political power in their own defense.

This is what the steel workers lost by not voting right last time. But they have another chance. THERE IS AN ELECTION IN NOVEMBER, THERE WILL BE MORE STRIKES AFTER THIS ONE. The fight is not actiled. Let the workers remember on Naveteber 5 to prepare themselves for the day of battle by taking possession of the political power.

One of the pleasing features of the steel strike is that a large part of the men' imported to take the strikers' phires refused to go to work as soon as they anticestood the situation Still more encouraging is it that this has been found true of negroes as well as white men. In soite of the incite ments of subsidized minlenders of their mee, the colored workingmen are coming to recognize their identity of interest with white workers; and in spite of ald prejudices, the white workingmen are learning to recognise the universal brotherhood of labor, regardless of race or color,

IN PROPERTY ANGURES

From an editorial of the New York "Journal" of September 18, headed "Prosperity Secure," we take the folowing remarks:

"The return of peace in the steel in dustry is an event that must CAUSE A GLOW OF PLEASURE even at such a time as this. It means the re-newal of the only really serious mea-ning to American prosperity. It means that the country can go forward un-checked IN ITS SPLENDID CAREER

"The actilement of the steel strike OUGHT TO REASSURE THOSE TIMID INVESTORS who have feared that business would go to smash as the result of the terrible event for which the nation is mourning. The murder of President McKinley was shocking horrifying, but it save less, substantial cause for a hustares pagic than the authencite strike, the failure of the cars evolt or any one of half a dozen untoward influences which the national prospecty has friumphantly ourthird. As a factor in the market

the settlement of the steel strike she far more than counterbalance it. "Of course if the death of the into "Or course it the death of the late Provident meant a departure into un-known pithis the timidity of capital might be expected to manifast finelf in a shrinkage of speculative invest-ments. But President illoconveit has promptly aunounced his intention to follow the lines latif down by his prefer-ments. The exhibit will remain in ac-

country. The cabinet will remain in of-ore. McKinley is dead, but in all elem-tial resource the McKinley administra-tion still lives. "All the spiredid foundations of American prosperity tymnia IN UNmillion of the most enterprising, industrious and resourceful people on earth are continuing THE CREATION OF WEALTH ON A SCALE UNPRECE-DENTED IN HISTORY."

We not the steel workers and other workingmen to consider that and say what they think of it. Are those the words of a real friend of Labor? In Millionaire Bearst, the owner of the New York "Journal" and various other paners, voicing the sentiments of the working class in publishing that editor ial? In the Democratic party, which Hearnt supports, to be trusted by theworking class, when its hading organ expresses such opinions?

OUR CAUSE.

Its Economic Philosophy and its Ethical Inspiration.

BY PETER K.: BURBOWES.

Our cause rests squarety upon and is the direct expression of the one great tuester-face of this human world. This master-fact may properly be regarded as the peculiar revolution of socialism and it is in this source and in the im of it, only, that we speak of our floci lom na acientific. A LETTER ON THE STEEL STRIKE.

communication from a Social Dome arat, Suppressed by the Baston "Morald,"

The following letter was sent to the Beston "Herald." Of course it was suppressed. Pass it around in Bolton as a specimen of the opinions the ulitaligue "Horald"

have its readers hear:
"To the Editor of the Boston 'Herald." "In your editorials of August 2 enti-tled Compulsory Arbitration and Labor Contracts' and Bhaffer Incidenting Dishonor,' you approve of the attitude taken by the United States Steel Corporation in declaring That they will enter into no negotiations with the Annigamated Association for a settle-ment of the strike until the latter or gaulzation shull have been incorne ited.' The reason for this approval you give in a fengthy and sequingly logi-cal argument, which in substance amounts to this:

"The steel corporation is a person known to the law, and limbs to an awer to the law for any branch of curirant,' while 'The Amalgamated Ass ciation, unincorporated, is an organiza-tion without legally representative offcials, and without legal responsibility which can be enforced by law."
"In your second editorial you re-proach the Joliet and Milwaukes steel

workers for breaking their contract. Now, Mr. Editor, in regard to your first editorial, let me state, that were the Amalgamated Association an incopornied hody, it would not be able to hold out the strike for over a few days Where the judges do the bidding of the corporations and trusts, where it junctions are given so liberally and where they go so far as to forbid work-ingmen to tax themselves to help their rother workingman in need (rame) ber Judge Freedman's far-maching in junction) under such circumstances, easy it is the only solution for working men's organizations NOT to be inporated. Suppose for one moment that the Amaignmented Association were an incorporated body. Do you think that under this or other pretext the smart attorneys of the Trust would not atsuch immediately the fund of the As sociation, and seise, so to say, the lifartery of the whole organization, And J. P. Morgan knows it very well. That is the feason he insists to treat with the Association only when it shall be ome incorporated.
"In regard to your second editorial

You say, They (Jolie and Milwaukee strikers) went out, or the call of a person who has never given them a dollar's worth of work, and never can give them any.' I beg to liffer. . AS TO PERSONAL LIBERTY.

The writers of editorial cant for the fally papers are working overtime in their efforts to impress on the public that the "personal liberty" of a scale is something sacred, such a hely of hilles that no person must even whisper the

scathing depunciation from the same papers. Take the Tampa kideapping case. The members of the eigenmakers' union went on strike. That was not violating any law. They established houses where their needy could be fed. They put up such a vigorous and such an orderly fight that they norsivaed the clear making business did not violate any of the eld common lawn against labor demonstrations. Had they even committed the elightest infraction of the law they would have been raffrended to the jath. In prior to break the strike, some self-styled "leading and prominent citizens" of Tamps formed themselves into a "committee kidnapped the leaders of the union and inaugurated a reign of terror in the name of "law and order." This outresponse violation of the "personal Hi-erty" of orderly and well-behaved men receives no condemnation from the shrickers for "personal liberty" for the acab, It is conveniently overlooked. Yet there was never on American soil such an atroctous and flagmant crime against the written and unwritten human rights as this kidnapping case. The kidnapping of the Cutahy child created a storm of indirantion, Every-

thing that a vigilant and sensational press could to was done to find the whereabouts of the boy. Reams of good paper were blackened in order to conray to the public the enormity of the of kidaapping -a' millionnire's critis of whosping a minimizer that and then and the pleace they adopt now are grotesque in their difference. When I rend it I was much clatedhere was that for which we had been looking for lo! these many years. To see how it would work out I turned to a recent report of the United States census and figured a little. The report the Standard Oil business first struck my attention, and this is the result: During the year 1900 the Standard Oil Company employed 12. 000 people, whom it paid \$6,747,087, an average weakly wage for each man of about 511. Now any man with a family of five ought to be able to live like a prince on a salary of \$6. This would leave him \$5 as a sinking fund. Twelve thousand men saving \$5 per week each would have at the end of the year \$3,120,000. The stock of the Standard Oil Company in the open Standard Oil Company in the open market is worth something over \$800, 100,000. By a simple mathematical proposition we find then that it would require but 25d years for the workingnen employed by the Standard Oll Company to save money enough to buy out that concern. As they would want but one-half the stock to give them control, the time could be cut down to a little more than 128 years! Gee! how easy. \$\$ Gross earnings of the Thire Avenue Railroad for the last fiscal year were \$2,242,635, and the operating expenses were for the same period \$1,005,500, tenving net earnings of £1,147,075. . . .

\$\$ The operating expenses were lasyear \$219,864 less than the year before, and the gross earnings were \$118,801 more than for the proceding year.

. . .

A decrease in the operating expenses of a railway is simost invariably a decrease in the number of em ployees and the amount paid them. In the case of the Third Avanue the de crease is principally brought about through the absorption of this read-by the same financial interests that control the Metropolitan Traction, and the docrease of \$219.886 is principally fected through the "saving" of the wages of employees eliminated by the change from competition to consolida-

\$\$ In addition to its gross receipts of \$2.242.635 in its capacity as a street railway, the Third Avenue had "other income" of \$413.080. "Other income" income" of \$413.090. "Other income" in a railway report means simply addi-tional "graft." In this case it probably includes payments for street car adver-tissing, etc., or it may be that the Third Avenue Company is the owner of the bonds of some minor striet rallways operated in connection with or by it. 5 5 5

. \$ & In looking up railway reports one must not be surprised or disap-pointed because such items as "other income" appear from time to time leaving one entirely in the dark as to that these reports are made only nom inally to comply with the law, and their real purpose is usually to affect the market, a good report sending the stock up a few points and an adverse sending it down. Aside from this feature the very purpose of the published report of the fluances of a cornoration is not to inform people re carding its affairs, but to deceive

\$\$ Notwithstanding the fact that the Third Avenue last year, had net earnings of \$1,147,075 and "other income" of \$413.090, making a total ne \$1.500.165, the annual statement of the read shows a "deficit" of \$208,129. This does not mean that the road was operated at a loss, or that some good capt talist went down in his sock and due up \$263,129. Nothing of the sort. If it had depended upon some capitalist or enpitalists giving up their good dough, not a wheel would have been the Third Avenue. It sin to many honds cittetanding that it can but her the interest on them, and so the stockholders get nothing—except where the stockholder is also a bondholder, which is often the cause. Bu as shown last week both are "graft cin." get profits, semething for nothing and only differ from common pickpock cts in that they do their "work" legally

. . . .

\$5 The daily papers report that severely. The colonel is a liberal man however, and out of his millions gave the boy \$15. .8 8 8

\$\$ The "business men" in Wall Street peeded money. So Secretary of the United States Treasury Gage bought \$20,000,000, of government bonds of them before they were due in order to keep the business interestprosperous. But if a workingman or a million workingmen were starving for want of work the government could not employ one of them. Car you see any difference? Do you think capitalists?

\$\$. If you want to understand just how much patriotism some people have just watch the bills presented by the late President's phyricians and all the connected with his illness is any way.

\$\$ "Working for my own pocket al of the time" is back in town. If you've got a dollar, look out for it.

. . . .

\$\$ At a cost of \$6.500, Frank J. Gould has recently imported from Eng land a St. Bernard dog named Baron Sundridge. It would seem from this that English barons were cheaper than French counts. And it is two to one that the baron's pedigree is no bler than the count's.

THE WORKER CONFESENCE.

At the last meeting of The Worker Conference two new delegates were seated—Fred Bauer of the 15th and 17th A. D. and Comrade Bernstein of the 4th A. D. The financial secretary's report showed receipts from circular letters and other sources to date of 138.85. The treasurer's report showed 1106.76 on hand. It was decided to send \$100.74 on hand. It was decided to send a list to every assembly district of expiring subscriptions to The Worker and that the delegates to the "Genference look up these subscribers and secure their renewals.

BURE THE BEST RESULTS.

Comrades must remember that the t those present to come and bring their should be, only a small part of the activity of such a party as ours. The work of the editors will not do much good if the comrades who count themelves as the "rank and file" do not get subscribers for the party press. The work of the writers will be thrown away if their books and pamphists and leaflets are not brought to the attention of the public. The work of the sprakers will be of no use if the comrades do not see to it that strangers attend our meetings.

It is the hard, quiet, unremitting work of the whole body of party members that counts. Unfortunately, this most useful work is generally unionored and unrewarded. But fortunate ly, on the other hand, the Socialists are nspired with such a love for the cause that they are willing to work for it without honor or reward, when they

see that their services are needed.

The petty troubles of the past two
or three years, now so happily settled, lave interrupted the general activity that so distinguished the comrades of Greater New York before that. Meny of our old workers have not yet fallen back into the good old habits, while many of the new recruits have not yet learned them. It is important, if we are to make a creditable abowing this year, that all should begin to "hustle" right now, and keep it up thil the end; and we take this occasion to make some practical suggestions on the mat

HOUSE-TO-HOUSE WORK.

First, as to house-to-house propaganda. This is inquestionably one of the hardest and most impleasant forms of work. But it is also one of the most effective.

Every strong assembly district organ ystematically and do it thoroughly Assign each comrade a certain block to cover. When he has finished that block, let him take another. Let him leave leaders and party namers at each house on his first trip. Then let hu of the house to the meetings held by the party, informing them about on methods and physics and, if possible ecuring his subscription to a party pa-

Where the organization is too weak in numbers to attempt to cover the whole district in this monner. IT SHOULD AT LEAST REE THAT ALL REGISTERED SOCIALIST VOTERS ARE PERSONALLY VISITED. Three-fourths of our voter Three-fourths of our voters know little or nothing of our organiza tion and have never seen our party pa-pers. But nine out of ten would, if personally solicited, show their interout in the movement by taking litera ture to distribute among their neigh-bors and friends; and the majority would enroll themselves in our organi antion and subscribe for our papers.

In some places the comrades who do
this work will have a cold reception or an unpleasantly hot one. But in most cases, if they use proper tact, they will be conrecously received and will be able to accomplish much good.

At to party literature, it should be nderstood that PAPERS AND LEAF-LETS DO NOT CIRCULATE THEM-SELVES. It is hardly worth while to publish a paper for the use of conpublish a paper for the use of con-vinced Socialists only. But each read-

BISTRIBUTION OF LITERATURE

er can, if he will, get new renders for the paper; and when these become con vinced of the rightness of our principles they will bring yet others under per tory with thing yet daries the influence of our press. IF EACH PARTY MEMBER IN NEW YORK CITY WOULD GET ONE NEW SUBSCRIBER FOR THE WORKER EACH MONTH, IT WOULD NOT TAKE US VERY LONG TO BEACH THE WHOLE LABORING POPULA-TION OF THE CITY. Some are already doing much more than this, while many are doing absolutely nothing.

To print a hundred thousand leaders and have them in the Organizor's office is to throw away a lot of money. But If these leaflets are properly circulated they will bring us votes—maybe a thousand, maybe ten thousand—that we would not otherwise have bad. Landers should be handed out at meetings, of course, and comrades should supply them to their fellow-workers in also or factors. But we can reach only a small part of the people in this way: and, moreover, many of the leaflet distributed at meetings will be thrown away without reading.

It is necessary to do more than this. f these leaffets are properly circulated

It is necessary to do more than this LEAFLETS SHOULD BE PUT INTO EVERY HOUSE IN THE CITY, Even where it is not practicable to make a the request that she show it to him. And in most cases it will be read.

REGULAR HALL MEETINGS.

Next in importance to the circulation of Socialist literature is the boiding of effective public meetings, both indoors

ONE PHASE OF THE NEGRO QUESTION.

of the recent agricult convention of the Bodalist Party was the presence of three perro delegates and the position they took upon the resolutions dealing with the negro question. "I AM NOT HERE AS A NEGRO," said one of "I AM HERE'AS A WORKING-I do not speak for my race, but for my class; and I hope this convention will not recognize any race divisone within the ranks of the working class.

A PROFESSIONAL NEGRO MISLEADER.

In striking contrast to this admirable utterance is an editorial in the "Colored American," which has just been called to our attention. This is a paper whose whole policy consists in fostering race celing among the colored people, in endying to politicians who appoint feeling am colored men to petty offices, and in what is simplify described as "knocking" and "fanning"-that is, personal made with purely personal and considerations-carried to an extent that would chagrin the worst of those 'leg-pulling" papers that, in some quar ters, still disgrace the labor movement.

INCITING TO SCABBERY.

The editor of this paper devotes nearly a column to an editorial on the steel strike. We quote in part:

strike. We quote in part:

"Providence never creates a vain thing. The great steel strike is not without divine purpose." It is serving a mission, the ration of which a not now perceptible the hour of trial, the negro is the sale at an erican, lie is always on the side of law and order, and is the handinsideh of the standard later-ests of the country. The mischlef makers, waiking delegates, uniton tyrants, anarchistas, Rocialists and enemies to the paice and dignity of society are invariably which are constraints in the sacroins of the right as as owners, desire to fill contracts for their arrana and when agistore great them."

our The entering wedge is sinking deep. If the labering unions are so besetten that they cannot see their city in ignoring the skilled negative that is rapidly extrained them. If we see he considered that is rapidly extrained them. If we see he will be remarked to make common cause with the middle releases, we must, in the light of the preservation, cast our allegiance with

the rich.

"The steel strike is a boon to the black people. It may mean an alliance of the enginists and negro North and South against the reactionary forces that would govern intelligence and wealth by merenchers and disregard of law. The hand of field is in all."

Let us say nothing of the blasphemy of a Chedulan or preferabil ("Victorian").

of a Christian, or pretended Christian who sees"the hand of God" in the ty-ramy of capital, in the oppression of tens of thousands of workingmen, in the wide-spread suffering which every creat strike involves. We make no re ligious professions ourselves and may, leave this man to slander the God he worships ht his own sweet will.

But on the human aspect of the mat-ter we have something to say, both to the black workers and to the white.

We know no more contemptible type of man than the penny politician whose stock in trade is his race or his nationality. TO US THE WORKING MEN OF WHATEVER COLOR AND WHATEVER NATIVITY IS A BROTHER, AND THE CAPITALIST OF EVERY RACE OF NATION 18 AN ENEMY. And the professional ticrman, the professional Irishman, the professional Jew, the professional ne-gro-the man who trades upon the prejudices of his race to make political rapital for himself, is at once the most despicable and one of the most danger-cus tools of corrupt and insolent misrule.

A RACE OF WORKINGMEN.

With comparatively few exceptions. the colored people of this country are workingman-tim vast majority them unakilled latiorers in field, mine, or factory, overworked and underpuld. After centuries of slavery; they were given personal freedom by form of law; but without land, without tools, without industrial training, they were care-fully kept in industrial bondage to their former masters. All the odds were against them and they deserve all praise for the advance they have made in the last forty years. But the fact re mains that, in general, they are still ewers of wood and drawers of water And in this they are at one with the .white workingmen. The 'latte have the advantage of a larger experience of political liberty; but they, too, are exploited and oppressed. Black or white, the majority of us are born to toll and to be lawfully robbed of the fruits of our labor.

INTERESTS IDENTICAL: The wages and hours and condition

of labor are fixed by the same law for black and white. If the wages of the workingmen of one race are forced down, then, through the workings of competition, the other race must also suffer. If the workers of one race suc ceed in improving their condition, then by the same law of competition, the other race will share in the gain. Our masters are the same, our wrongs are the same, our emancipation must come by the same process, and it must come to both races pgether. But old prejudices still linger upon

both edges unhappily, they are still harbored in the breasts of workingmen as well as of the master class. There is no denying that most trade unions have been in the past, and that some

have been in the past, and that some still are, influenced by these unworthy febtings and have done cruel injustice to their colored fellow workingmen; and in so doing they have done grave injury to their own cause). But they are bearing. Some have already learned. In one trade after another we hear that the color line has been wriped out and that streament efforts are being made to correct past mistakes of both races, and io, bring them together upon a footing of equality and contradeship for the remmon good of the working class. Agreepes of the

One of the most encouraging features | reference to "Socialists and enemies of coclety" it may be remarked that so-cialists have been foremost in advocating this change of policy in the trade

They never associate with the men who ere ate their profits. Wealth colored from the awent and blood of negroes is an aweet to them as though it had been wrung from white slaves.

They are willing to pay good wagre-for a time—to colored meh, who will help them to crush the resistance of the strikers. Andelf they should succeed, and if, in after years, their negro em-ployees should resist a cut in wages, they would welcome in the same way an) white man who might be found foolish enough and shameless enough to scab against the blacks.

IP THEY WOULD HAVE OTHERS TREAT THEM AS MEN. REGARD-REGARDLESS OF THEIR COLOR.

The white workingmen are learning must be drawn in the labor movement. Let the thinking colored men all over the land greet them and encourage them in this movement and hasten the day of liberty and equality for all,

The Trust is planning, not only to get The Trust is panning, not only to get control of the English tobacco industry, as it already has complete control of the industry in this country, but also to extend the operations to the continent of Europe. Of its success there can be little doubt.

Now does any intelligent man resity think that an international combination

think that an international combination such as this can be controlled by such measures as are proposed by the re-formers—by Mr. Hadley's method of social ostrucium, by President Roose velt's schame of publicity, by Mr. Bry-au's plan of licensing the trusts, or by the repeal of the tariff, as advocated by some others? As well try to sweep

ack the tide with a broom.
Only one measure can touch thes giant combinations: Public ownership of the means of production. And pub-lic ownership can be of henefit to the workers, the producers, only if inan-gurated by the action of a class-conections party of the working people.
That is Socialism.
It is coming, somer or later. The only question is: Do TOU want to on-

joy it in YOUR life, instead of leaving it to another generation? Will YOU help to bring it soon?

STREET-CAR PROFITS.

George F. Harding of Chicago has made the city two offers for the street railway franchises which expire in

He offers to take the franchises run the street railways on a three-cent fare, with universal trinsfers, and pay the city 20 per cent, of his net profits, As an alternative offer he says be

will pay the city \$5,000,000 a year rental, healdes 20 per cent, of his net profit, charging five cents fare, but giving universal transfers.
In either case he asks for a twentyyear lease, terminable by the city on

six months' potice, Such an offer as that shows what profits the street railway capitalists are making at the people's expense. For Mr. Harding is not proposing to go into the business for his health, but because he knows that, upon the conditions offered, he can still make fat profits.

It is not likely that his offer will be accepted. The Republican and Demo-cratic politicians who govern the city would prefer to have the street railway ungnates make atill higger profits, be cause they, the politicians, are virtually

the working people would gain n thing by it. The new lesses would try to make up for the increased rental by cutting down "operating expenses"— that is, by making the employees do more work for less wages. And the money turned in to the city treasury would be used to reddee the taxes upon capitalist property, which would not benefit the workers in the least,

If the working people of Chicago will put the Socialist Party in power, the question will be settled in quite a dif-ferent way. The city itself will operate the roads. Its first care will be to establish the eight-hour, day for the employees and to pay them decent employees and to pay them be-mages. Its next care will be to inprove and extend the service. After that, the surplus that still remains will be applied to reducing fares.

That is a program that the working people may sensibly support. The So-cislist Party is the only one that will carry it out in Chicago or anywhere

BUX UNION LABEL GOODS.

SOCIALISM vs. ANARCHISM.

The People Are Learning That the Two Are Diametrically Opposed.

Admitting the Difference.

Socialism and Amerchy are as far apart as the poles. The Socialist would enlarge the operations of government so as to include most of the great ac-livities 'now under private direction. The Anarchist aims to abolish all gov that "an intelligent ballot is the only hope of society."—St. Louis Globesocrat.

There is such a popular misconcep-tion of the differences between Au-archy and Socialism that a brief definition is given of each. Socialism: A theory of civil polity that aims to serum the recoustruction of society, increase the wealth and more equal distribution of the products of labor through the public; collective ownership of the means of production and distribution. Anarchy: The theory that all forms of government are wrong and unnecessary,-Philadelphia North American.

Because a man is a Socialist or an Anarchist, it by no means follows that he should be dispossessed of the rights of citizenship. The looseness of a great deal of the comment on this subject is made evident by the fact that there critics class Socialists and Anarchists in one category, when, as a matter of fact, they are as wide spart in their ideas as black is from white or night from day.-Boston Herald,

The argument that because Anarchy equally trrational and dangerous with Anarchy is put forward by those who assume that in addressing the American people they are speaking to fools. Only a very extraordinary kind of fool can be made to believe that because murderous wretch has attempted the ife of the President it becomes everybody's patriotic duty to cease criticus ing the trusts, cease discussing the ing the trusts, cease discussing the problem of poverty and the dengers threatening the republic through the rapid growth, of enormous fortunes which have their roots in munocity. Solwithstanding the equally silly and repulsive efforts of the organs of a mindless variety of monared conserver. mindless variety of moneyed conservatism to turn Choineas' crime into an agreement against all reforms, all pre-serom the American people will still discuss questions which involve the equinon welfare. And men who love Use republic will continue to "speak evil of dignities" while any of the dig-situries whem it has pleased Providunce to set in authority over us do evil things.-Philadelphia North Ame

If the question must be discusse what causes and elements are working lujo the inmis of Anarchisan we do not heritate a moment to denounce the "dium" and its followers as the most deagerous of these elements. Their nemesting cynicism, their derision of at nobler sentiments, their support of all meet corrupted elements, now on this side and new on the other, their unlimited advocacy of capitalism, based on the principle of "might in right," on the other—these are meth-ofs of warfare which, silied to calum-mid-distortion of the columnyl distortion of the truth, are, even barefored untruthfulness, breed hatred among the classes, act as irritants, and coljurer up BLIND FURY against their own pompous insolence. We are convinced, that a single one of those cantemptible articles on the problems of labor, as they are to be found frequently in the "Sun." does more mischief than all the sunff, thus sharply riticlesd by the "Bun." that other papers are emitting for the "benefit of Anarchisus."—N. Showing Capitalism to be the Mether w of Anarohy. Anarchy will not disappear until the

risting sun of Socialism dispose to darkness in which Amerchy thrives,-Missouri Socialist.

In this country the intense exploit tion, the growth of the trusts and the upstarting of a haughty plutocracy breed Anarchism and Anarchy. The existence of Anarchism and Anarchist propaganda is, therefore, a sure sign of unbealthy social conditions. It is a high social fever and is naturally connected with feverish and manne acts.-Social Democratic Herald. We have the assassin who attempt

to strike down his fellowman in an un-guarded moment, and the malicious assassin who attempts to besmireh or destroy the good standing and character of others either personally or collectively. It is hard to determine lectively. It is hard to determine which is the worsi or more despicable: • • • Now we shall proceed to review the history of Anarchy and as sausins in the United States. Booth the great actor who shot, President Lincoln, was an Democrat. Guiteau. who shot Garfield, was a Republican Was it not Republican Pinkerton An archists who shot down workingmen at Carpegie's steel works? Was it no Beckefeller Republican Amerikate who set fire to their own property as a preject for martial law in Idaho, and was it not a Republican administra-tion that sent negro saddiers and assas ring to shoot down the poor miner confined in a bull-pen? Was it not Republicans who defied the law and consulted together for the assassination of Governor Goebel, of Kentucky, and was not ex-Governor Taylor, the arch conspirator, cuddled slad protected from arrest by Republican officials in the adjoining states, and was it not a Republican national convention which received the cowardly assassin and cheered him, as a hero as he went for ward to occupy whilece of bonor upor the speakers' stand?

It is not Ansrehists and not Social lefe who take the new in their own hinds and burn colored people at the stake all over the country without trial or jury. After all of these infamore obtrages it comes with poor Socialism with Anarchy, Socialists adhere strictly to the relicion of Democracy. Majority rule is the only hone. PUT THE CAPITALISTS

ON THE DEFENSIVE.

Says the "Iron Age," an organ of the ron and steel manufacturers:

"An attempt which originated in the West is now being made to unite em-ployers in all branches of industry in a compact organization, not only to combat the demands of labor organi-ENTLOYEES FROM BECOMING
MEMBERS OF LABOR ORGANIZA-TIONS.

"Then (the employers) believe that the time has come when WAR SHOULD BE DECLARED ON THE WHOLE RCHEME OF ORGANIZING WORKINGMEN INTO UNIONS."

Says the New York "Times:" "There is probably NOT A LARGE EMPLOYER OF LABOR IN THE COUNTRY WHO WOULD NOT JOIN A MOVEMENT TO BREAK UP THE EXISTIMI TRADE UNION SYSTEM. They do not share the popular idea that the trade union principle is something sacred which must not be assailed. For the labor vote they care very little, and for such reprisals as it is in the power of the wage-tarners to attempt they care even less."

Workingmen, in these quotations from capitalist papers you can see the spirit and purpose of the "captains of Industry." What will you do about it? Will you sit supine while your organinations are emissculated or destroyed? Do you union men realize that the only force which has stood between your standard of living and wages and that "enjoyed" by the Chinese workingmen s your trade unions? Do you realise that up to this time the only real battion that have been fought against the great capitalists have been fought by the trade unions?

Now, the great capitalists propose MAKE WAR UPON THE VERY PRINCIPLE OF TRADE UNIONISM -upon the right of workingmen to ORGANIZE, except in such way as employers deem good; and a labor or ganization that is satisfactory to capitalists will be uncless to wage-workers. "For the labor vote they care very

little," says the "Times," and endorses the action of the American Street Steel Company in tearing down its mills at McKeesport because the Steel Trust did not own the Mayor of the town. Workingmen, union men, the capitalists will "care very little for the labor vote" ONLY 80 LONG AS THE LA-BOR VOTE 18 LITTLE. Se long as one-half of the workingmen vote the Republican ticket and the other half vote the Democratic ticket, "Times" and the "Iron Age" will not worry over the "labor vote." Whichever of the two capitalist parties wins, the bess is safe. When the real labor vote is large, the capitalist will cease to "care very little" for it,

These great employers "believe that the time has come when war should be declared on the whole scheme of organising workingmen into unions," says the "Iron Age." The large employers of labor in this country do not believe that the trade union principle is comething which must not be assailed." Do you union men know how you should reply to that? The capitalists propose to attack a principle which is vital to your liberty and welfare, and YOU SHOULD RESPOND BY MAKING AN ATTACK WITH YOUR BAL-LOTS UPON THE VERY PRINCI-PLE OF CAPITALIST PRIVATE PROPERTY. Aim at the very heart and citadel of capitalist power. Keep the capitalist so busy defending himself that he will have neither time nor power to attack you.

Stick to your unions, by all means, Get all workingmen-and women-to organise. But in your fight with the capitalist do not limit your weapons to the strike and the boycott. Those are fights between your dollars and his dollars, and he has a hundred or & thousand dollars to your one.

You have the choice of ground and of weapons in the fight. FIGHT THE CAPITALIST AT THE POLLS AND WITH THE BALLOT, and the victory will be on the side of Labor, You workingmen have NINai votes for every ONE the capitalist has. He can win only when you cast your votes for him. Should you trade unionists spend one-quarter the effort fighting the empitalist on the political field. where you have HIIM at a disadvaninge that you do fighting him on the economic field, where he has YOU at a disadvantage, victory and its fruits would soon bu' yours, and capitalism would flied an early and unhonored DOM:

Union men, meet the capitalist astacks on your organizations by attacking the whole capitalist system with a straight vote for the working-class ticket of the Social Democratic Party,

The way to keep the capitalist from attacking you is for you to attack him. Workingmen, cease to act on the defensive. Take the offensive. Challenge the capitalist to meet you at the polls, ADMATTACK AND ATTACK AGAIN, and FOREVER ATTACK!

DEFEND THE RIGHT OF PARE SPEECH.

In a number of the smaller cities and towns of the country the police bave taken the assausination of President McKinley on a pretext to suppress the open air mortings of the Socialist Party. They know well enough-if they did not know it otherwise the most respectable portion of the daily proon has told them-that there is no the Socialist and Anarchist move ments. They cannot point to a single Socialist speaker or, writer who has counselled assumination, and they know that the party has consistently

appound the "propaganda of deed." All this maken no difference, how over, where the capitalists and their police agents think it safe to undertake the appropried of Socialist agitation Neither expitalists nor politicians are amenable to reason on such matters They prefend to believe that class aptagonism, instead of being due to the fact of class rule and exploitation, h created by labor shitstors; and on this ground they proceed as far as they dare in abridging the right of fre ech as exercised by the Socialists

It is significant that nothing of the port has been attempted in New York City. In a few subdivisions our cos rades voluntarily postponed their meetings during the few days immedi ately following the assumination, be Beying that the state of public feeling was such that little good could then be accomplished. Even this was prob nisty a mistake, for in other districts the regular meetings were hold and no

disorder occurred. And in pa case, so far as we know, has the police York tried to interfere with our street or hall meetings or with the distribu tion of our literature.

This is not to be put down to the good feeling of the police authorities of New York or of the capitalists who stand back of them. It is due rather to their good sense; for they knew that the Socialists of this city would brook no such interference. They are sensible enough to avoid a conflict in which they know they would-meet sturdy restatunce, and by which the Socialis movement would be sure to gain.

It is necessary, for our commutes it other cities to take a similar position and to teach the local authorities that Socialists know, their rights and know how to maintain thum. Timidity is always a inistake in a movement like ours. We have had experienced in past years, here in New York, in Boston, in Chicago, in San Francisco, Los Anguies, than Jose, and many other places. Wherever we have buildly defended our rights from the start we have suc cooled in establishing them and have made fruitful propaganda out of the confilet. Wherever the police are now forbid

ding the holding of Socialist meeting our advice to the comrades is this Give public notice that the unlawful paurpation of power will be resisted have a clear understanding among the members that there is to be no waver ing in the ranks; let each one know his part and be prepared for it; hold your meeting. Be careful not to give any reasonable excuse for interference by any abusive innguage or disorderly conduct, but conduct the affair with firminess and dignity. If the first simaker is arrested, let another follow him, and another and another. Then fight the case in the courts; and at the same time tight the case in the court of public opinion, by giving the widest publicity, through the party press and the local papers and through the distribution of leaflets, to the Socialist side of the conflict.

By such a course as this, and only by such a course, shall we be able to es tablish our right to peaceable and or derly stritation and checkmate the planof suppression new advocated by such papers as the "Sun"-a plan which, if constul, would be the direct means of breeding riot and assessmation. Moreuver, by such a course as this we shall attract public attention to our movement, make clear in the public mind our antagonism both to lawiese Anarchism and to lawless Capitalism. and gain the aympathy and respect of real lovers of liberty and fult play.

Since the recent amassination many nonths have been opened not wisely but too well. There has been an inkspithing, breath wasting, deafening whirlyind of words and all who thought the world was waiting for their wisdom have poured forth a torrent of opinion, interview, invective and advice, Amid this amazing abundance of surplus sapience from the mif-sufficient the utterance of the Liou. Joseph H. Maniey of Maine, stands forth, as might be expected, a gemulat literary gem. CMurder, violence, and such sudden deaths must 'cease," says this estious congrussman. We také it that a campaign against beart disease in called for.

IT PAYS TO BE HONEST.

If may seem to some a curious thing for us to institute a comparison bi ween the experiences of the New York "Journal" and those of The Worker in the hast three weeks. It is, of course comparison of small things with great, for, much as we regret 'it, it true that the "Journal" reaction fifthe people every day where The Worker reaches one every week. Neverthless the comparison is interesting and in

been playing the part of an organ of ocial discontent. Recause it has visorously and, up to a certain point, intelligently volced the wide-spread and growing diamtisfaction of the people. it became immensely popular.

But the "Journal" has never been guided by any bougst intellectual con viction nor has it had the moral cournur to carry out logically any concess that it had choson, once that course be come a dangerous or a difficult one. For this reason it has never been a

real leader of public apinion. It has tried aiways to be at the bead of the ression, but it has never dared to lend the procession. Its method bas heen first to find out what the masses were thinking and then to shoul ou their thoughts through a megaphone and claim the credit for originating them. But it has nover ventured to try to educate its constituency, to our rect their errors, or to give an intelligent direction to their protests again,

nocial wrongs.

As is usually the case with those wh. are really cowards, the "Journal" has been very violent in its language While the attempts of the "Sun" and other papers to fix spon it the responsi bility of inciting the late assumination are very strained and epidently inspir ed by jeniousy, it is nevertheless a fact that the "Journal" has talked freely of traching and assembation as possiblremedies, and that it has not consistty connected any when course for the righting of the wrongs it as religional

The Worker, on the other hand, has never tried to be with the majority. It

has never desired to ride in the band wagen. It is published to advocate co tain definite principles and to support a certain declaite movement. Instead of trying to piease all who were dis entished, to poor as the spokestnam of all wastie discontent, it has simility endeavored to instruct the discontented, to educate them, to give their discor tent an intelligent purpose and form,

Both papers had criticised the late President. Buth had characterized him as the agent of a tyraunical ruling class. But whereas the "Journal" had done this in the form of an abusive and rulgar personal attack, The Worker had shown the reasons for it and had shown that the cure for existing evils was not to be found in attacks upon individuals, but in a radical change of the social system.

Then caine the atenasination. The contrast between the two policies became still clearer. The "Journal," forgetting or seeming to forget its violent denunciations of McKiuley's personal Character and conduct, began at once to publish the most fulsome enlogies upon ian. To match every derogatory api that that it had applied to him before it now found some word of extravagant praise. This exhibition of the cowardce and insincarity of the "Journal" urpassed everything in the history of the venal capitalist press.

The Worker, on the contrary, reiterted, in its issue following the attempt, the decided and unfavorable oninions of McKluloy's public enreer that it had previously expressed, While- condenining this assausination is fact as we had previously condemned all assaashation in theory, and while expreming human sympathy with the viclim as a man, we did not retract one word of our condemnation of the president

That is the difference between a saper devoted to principle and a paper whose stock in trade is sensation and whose object is notoriety. And what ly the result?

The result is that while the "Journal," in spite of its abject apologies and penance, has lost tens of thousands of its readers, just two persons have stormed their anbegriptions to Tite Worker.

We are satisfied. Nothing could bet ter confirm the wisdom of our golicywhich is the policy of the Socialist movement. It pays to be honest.

In another column we print the adlress of the British Social Democratic Federation to the trade unions upon the recent decisions of the courts and the Liouse of Lords, making union funds attachable for damages in suits brought by capitalists against unions which injure their business by striking, hoycotting, picketing, etc. The matter is of interest to working men here, as well as in England Here, ton, an attack upon the unions is being made and the practises of law are being modified by the courts to aid that attack.' Not only the funds of the unions, but even the personal property of individual members are likely, with in the next few years, to lie at the mercy of the capitalists, abetted by the Injunction-issuing courts, We can sea but one means of safety for the workers-political action on class lines, at set furth in the platform and followed in the unilley of the Socialist Parir.

A MISCONCEPTION OF TRADE UNDERTRIES.

Trade unionism in all its phases is ecoming a leading topic of discussion nowadays. It is hard to say whether its defenders or its assailants oftener show their ignorance; not only of the problems with which the trade unions have to deal, but even of the actual facts of the union movement as it now exists. Certainly the hmount of ignor ance shown by otherwise well informed men, upon both sides of the quesand upon both subjects, is amas ing. It goes to show the truth of the old saying, "One-half of the world does not know how the other half lives " Evelpoon man, professional men, literary men, politicians, even professed students of secial affairs make fhe most flagrant errors in dealing with this question, simply because they live in quite a different world from that in which the members of the unions dwell, do not know how the working people live and cannot, there fore, understand how they think and

In a recent article in the New York "Journal" Mr. Ambrose Blerce, who often says a witty thing and some times a wise one, declares that the fundamental weakness of the trade union movement is that it assumes a higher degree of morality in the mans of the people than actually exists; that it depends too much on an appeal to moral sentiments, which seldes control man whon opposed to their per-

onal interests. A first-hand knowledge of the labor payament would have taught Mr Hierce that this judgment of his-a very popular one among mere the -is entirely false. The facts contradict it, for trade unionism is actually strong just in proportion as it aronees a moral outhuniases for its

Mr. Bierce is wrong in saving that the majority of mon are in most matbers controlled by considerations of personal interest; The exact opposite in the truth. If Mr. Bleven were right liked society to-day-ney, we should

should still be living the life of wild beasts. The average man does not: beat his wife when she displaness hifu; he does not match the food from hischildren's hands if he happens to belungry; he does not gratify every Appotte or whim regardious of the effect of his acts upon other people. Why does be refrain from doing these things? . Because he is afraid of being punished? Certainly not, except in the case of abhormal men or in very namenal . circumstances. He refrains from such acts because he really like better to live a decent, civilized, haman life-that is, because, in the long course of human evolution, certain moral feelings have become ingrained in man and have become as much a part of his nature as his simply physical appetites. Most men have certain ideas of right and wrong and really prefer to-do right, quite regardless of any question of punishment or even of

disapprobation. Of course this evolution is not con plete, but it is still going on 'There are will many matters of conduct that we do not regard as either right or wrong; and, what is more to our pres ent purpose, there is a large field, of buman conduct in which, while most of us recognize one course to be right and the opposite one wrong, the moral feeling is not yet so highly developed that even the average man is sure to do right when assailed by ordinary temptation.

The evolution is still going on. 'Not only are the moral feelings growing stronger in the course of the general nocial evolution, but, in the workings of the class struggle the moral ideas of different clauses are being changed. People of the "upper classes," for instance, consider certain things quite right which their grandfathers comidered disgraceful. On the other hand, working people are coming to consider certain things shameful which their grandfathers did not so regard; and it is of working class morality that we now speak.

Anyone who has lived in the working class and thoughtfully observed it even through the past ten years must we that the moral sentiment of lovalty to the class is rapidly gaining in atrength. Perhaps the scab may not be so violently denounced by the active representatives of the trade unjons now as he was then. But that is at least partly because the general feeling against scabbery has become stronger and the expression of it is

anturally calmer. The old idea of a trade union, in this country, at least, was that it was purely a business enterprise. Individunis might here and there hold a different view, but that was the idea upon which the movement was founded. That conception of the movement is what is rightly comprised and justly condemned under the name of "pure-and-simpledom." No higher ideal was offered to the worker, no loftier or more far reaching motive was stirred in him, than the desire to get certain personal benefits from nembership in the union.

A union based on this conception might succeed very well for a time, usder favorable circumstances. So long as it could assure its members of employment rather steadler than that of outsiders, at better wages or for fewer hours, and could pay its sick and outof-work benefits, it would hold its members. But let it meet a defeat; let a time come when membership in the union imposed burdens without offering a reasonably certain prospect of personal benefit in the present or the near future—then the very motives which had prompted men to join the cision prompted them to leave it. Unlouism based on business principles? merely, and not on class-consciousness, has always been dedelent in cohesive, to assemble. But here comes the chief power and endurance.

But of late years there has grown up new force in the labor movement--a force which is spreading and growing with increasing rapidity—the feeling of levelty to one's class, of obligation to one's fellow workers of all crafts, which prompts workingmen and working women-and even, as has recently been demonstrated, working childrento conduce great present hardships, even with very little hope of personal lament. In order to be true to their class and in the certainty that some time, if not now, good will come of it.

It is this splendid new marality, this sentiment of solidarity, this class-consciousness, this which we may call the germ of the religion of the future-it is this which gives us hope for the future of the labor movement. It is this which carries labor engants offices through long and often disastrom struggles and turns their defeats into the stepping-stones to new victories. It is this which brings working people to extend their sympathy and give of their small earnings and, if, necessary, to engage in sympathetic strikes and poyrotts in order to aid fellow workers of other trades and of distant places. It is this which prompts then sands of men in the ranks of labor'to devote all their leisure, without reward and often without recognition, to the service of the cause-which makes many willing even to yield their lives when occasion demands. It is this, shove all, which inspires the Socialist movement throughout the world, which supports it in a clow-and, to the judgment of the outsider, a hopeless-battle against oppression, and

Mr. Bleron, who is in general a very acuse observer, has utterly misma coived the nature of the labor move most. That which be regards as its futal 'weakness is, indeed, the vital strength. Because trade unions in the first have depended too little on their moral strength and too much on 'bus ness methods" and motives of persons interest, they have been timid, often reactionary, and unstable. As they be cume inspired with the ideal of the solidarity of labor, they look forward to greater ends, undertake larger tasks with higher courage, meet heavier de feats with increased resolution, and grew more and more assured of pres ent gain and ultimate success.

SOCIALISTS ANSWER IMPUDENT POLICEMEN

The press committee of Local Hudson County, N. J., has published a re-ply to the attack on Socialism made by P. Ree Chief McAnley of West Hoboken, who assumed to forbid the hold ing of Sprinist street meetings in that rity. This policeman showed his igorance by enying that "the Socialists preach sedition, heap ridicule and cor tempt upon our constitution, laws, and government," and that "Rocialism is the training school for the Anarch

that you do not know where to find

him; only that you may, be sure he is

sumewhere just under the surface of the social stream and ready to pop up when his peoper meat comes; for the new-line crank is upon a strictly burdness basis. You will find him alike in Hopeblean and Demberatic waters, as the same thing may happen to be denontinated in the different states, his gives him the right and title of crank) always to swim up the stream in the direction of the greatest of our great great great great from a hronological and social point of view When the times call for public think-.ug, the new crank puts binnelf forth in alarmingly menacing and noisy numbers. 'He fides people who differ from him on the rail of vilinge scorn. He expels his bosom friend from his breast plate and his club for saying something untory. He goes to church and con duction he service as if Jesus Christ and religion had gone on a long vaca tion, leaving the president and friends to take their places; and all other politicians from Bryan and Croker to the Socialists are permitted to fill the bill of "the world, the fiesh,

and the devil" in the exercises. His crankism is chiefly evidenced from his fidelity to the principle of government by two parties, notwith standing his miemp belief that one of these parties is damped; and yet if third party heaves in night it is hurle back to Hades by the canon law of two parties only, and rather than have any sort of a third party, the Demo-crats, in spite of the brimatone on

their garments, most remain. The new tory crank overshadows all ther cranks in the United States, and he stands at the gafes of the cities forbidding all other men to think, save on the pennity of going craismad like himself. He stands, as it were, a sol emp warning against the further us of the human understanding; a bired raven, never fitting, always sitting the lust of Pallas, croaking his "No ermore."

The species crank may be divided into 'three', groups, viz.; the original, natural-born crank, who is greerally honest and always barmies the initative-voluntary, and self-made crank; and the anti-crank crank; both of which latter belong to the group

now under consideration.

The first, or original crank, used formerly to own a local newspaper, but of late rears that business has gone to the trusts and our primitive crank

I want to call your attention to the school, I naw a plansible argument hately, intended to prove that the rea-son there are 20,000 children out of school in San Prancisco is not because of any perfect by organized authority. The argument was somewhat as fol-lows. The school age is between five and seventeen, but children are not ad-mitted to school until dis, which would secount for neveral thousand; and that the average child quits school at four-tien, and goes to work, which would necessat for several thousand more (in this case \$5,000) between fourteen and severteen who are at work. However, the main point of interest to jon in the argument was covered up, vis.; that the of San Francisco children is true also of the millions of children out of school in the United States -M. W. of Lords has made it possible to attach the funds of trade unions for damages awarded by the courts in cales brought by the capitalists against unions for setivity injurious to their business inter esta—such as boycotting, pickuting, etc. This severe blow to the British labor movement has called forth the following manifesto from the executive coun-ril of the Social Democratic Federa

Britain and Ireland.
"Fellow Workers:-The Trades Pa-ion Congress which meets at Swansen finds itself face to face with a crists in the history of trade unionism such as it has not had to meet for the past thirty years. A generation ago trade unions were practically under the han of the law, but by the parliamentary legisla, tion of 1977 to 1970 it was foodly hoped by the older trade unionists that their organizations had been placed upon an unassatistile basis, and that in future no real labor persecution was possible. The repeal of the old Combination Laws and of the Criminal Law Amend ment Act, followed by the passage of the act of 1876, were supposed to have given to workmen an impregnable right to combine and agitate in their own interests—outside of actual intimi-dation and violence—not only against employers, but, 'if need be, against those of their own class who, as blacklegs and scale, sold their maulfood to the capitalists whose object it is to break up trade union organization and to foster division and anarchy in the ranks of the workers. The old ideas as to the unburfuiness of workmen com-bining in so-called 'rostraint of trade' were annoused to have vanished, pick eting was believed to have been mad-perfectly legal, trade unions were their own ludges between themselves and their members, and generally trade union effort and combination seemed to be left free to pursue its primary objects— the raising of wages, the reduction of the hours of labor and the improve ment of the sanitary and other condi-tions of workshops and factories-while the sheet anchor of trade unionam, the right of collective bargaining between employers and employed, also seemed to be firmly established, at

"On this understanding and belief the trade unionism of the past generation has proceeded, and what successes it has gained have been won on these lines, asied, by the hitherto faulty collective organization of the employer and capitalist class. But this faulty capitalist organization is ripidly be-coming a thing of the past. The lesson of combination which the workers are often slow to loarn has been effectively grasped by their masters, and every research of so-called usodern civiliantion is now brought into play to best down the jegitimate demands of those who live by their labor. In 1983 it was the rities of Peatherstone under Liber. alism-in 1981 It is the woolench of the House of Loris under Turylsm. Whether Liberal Home Secretary or Tury Lord Chancellor the rank is the same, capital is triumphant and labor

"The recent judements of the House of Lords in the Taff Vale case and in the Irish case of Guine vs. Leathem base practically killed trade uniquiam have practically killed trade amount.
This at any rate is the opinion of the
best middle class friend that trade unionism ever had. Mr. Frederic Harrison. And see long the most sangular
trade unionist will have to acknowledge that Fraderic Harrison is right.

"Into the details of these cases it is

"into the details of these cases it is quite unnecessary for no to enter. They ought to be perfectly familiar to every trade unlocate in the country. Their total effect is that the old theory of trade anionisms, which has served for a generation, is new entirely swept away—that the unions are tied hand and foot both as regards their own members and employers—that all union funds are now at the inserver of cantinities. and employers—that all whom funds are now at the inverse of empiralists, wreakers, and blackless, whose trisspecture in the angle of the property of the results in the results in the second of the results whom utterfor object it is to preserve empiralisms and uphold the classes against the masses, while in the case of a artific or lock-out the very mildest form of permission, even if uped to a follow unionist, to say nothing of monunionists, can be at once ticularly graceful and pretty: We con-gravulate Comrade Selier upon a very successful composition, which we con-disily recommend to our musical com-rades.

The song can be procured of S. Selier. 2287 Mission street. San Francisco. If

picketing will fill up its grave.

"As yet there here been no signs that the leaders of trade unionism, as a whole, have at all appreciated the gravity of the altention. Some, it is true, are despairing, but some are cheerful, looking forward to years of litigation on test cases; but by the time there are over there will be no trade unionism left to litigate about. The capitalist has consta will take care of that. A inw courts will take care of that. A new bill will probably be asked for in parliament, but the povernment will be too busy killing Boers and betting South Africa to have time, even if they wished, to save the life of trade union-ism by 'nertiling' the rights of English workers.' The rank and file of trade workers. The rank and sie of trade unionists, not merely as unionies, but as workers who feel thomselves within the grip of the chass straggle, must take the matter into their own hands; and settle if for themselves, in their own way, in their own interests, and in the telements of the methan at leave.

way, in their own interests, and in the interests of the unition at large.

"Title cannot be done by trade union ism alone, whether if he unionism old or new. Neither the old nor the new unionisms has been able permaneutly to settle any great labor question, meither the wage question, nor the unevaployed question, nor the unevaployed question, nor the reduction of hours, nor strikes and lockests, nor even factory and workshop legislation. If it lind done this there would be little need for trade union congresses. To every mentille worker it must be perfectly evident that same other methods than the trade unionism of the past workingues and women are to pre-

tecising trade unionium. The charge is untrue. We have often attended individual tende unionium, who, so we believed, have showed the universe no traiters to their unionies and their clear; but we have always meet gladly given the greatest crudit to trade the londer as a whole for their organisation, for the personal inertifices they have made, and for the way in which they have stood by each other in times they have stood by each other in times of difficulty, danger, and distress. But we have never hesitated to declare that no inhor question will ever be parama-ently solved by a trade unionism which recognises and uplotts the present se-cial busis of the wage system. The transformation we speak of is the abelition of that system, and is view of the deadly blow—the first of many is fel-lew—which has now been dealt them by the expiralist class, trade unionists as a body must definitely make up their minds that in future their organi antions shall be consciously used for the transformation of our present anarchical social aystem into a convinc

co-sperative commonwealth.
"It is true that this will deman streamoun political action, but in that what is there to be feared? The cry of 'no politics in trade unionism' was proper enough when the introduction of poli-tics would have been the division of unionism into mere Liberal and Commer-ative camps, but the cry of mo political new is only fit for children. Political action is now consciously and contin-ously used by the capitalist class in defence of their own seifish interests; why should the workers be afruid of defending their interests in the same defending their interests in the same-way? The interest of the capitalist is to rob labor, and to this end be used every means in his power—rifles. Fav-liament, and the law courts. The inter-est of the worker is to lead a whole-some, healthy, happy life by labor: to this end he must use ever and always all the political power which he has or can obtain. This, however, does not mean orthogen party notifics. But that mean ordinary party politics, but that social political action which has for its conscious aim the abelition of individ-ual ownership in the necessaries of life and the means of production, and the founding of a new social order which shall have as its basis the common ownership, use and control of all that

makes up the common life.

"By fiself the trade unloaden of the present—even if it lives, of which there is more than reasonable doubt will never attain this, but trade union or ganization can be used to belp it on. We ask thinking trade unionists once for all to make up their minds. Not in Britain alone, is, the capitalist trying to crush unionism. In America the fight is growing even figurer than it is here. In many of the United States governmout by injunction' has taken the place of heliumy law. All over the Enstern states picketing and peaceful persun-sion is being put down by the strong arm of capitalist judge-made law. am opposed," recently said Judge Clark in the Clociumti case, 'to picketing in any form whatever.' Judge Wing of Cleveland declares that 'persussion of ttself, long continued, may become a nuisance and unlawful. And thesalgus of the class was are what really He behind the recent judgments of the House of Lords. Whether in Britain in America, on the continent of Surspe, or-in our colonies, it is the same—the class war is with as and capitalism is girding up its folias for the battle. Col. Drer and the Employers' Pederation, Mr. Lawes and the Shipping Pedera-rion, were the stormy petrels of capitaltat combination. Lord Penritya at Bethesda and J. Pierpont Morgan in Aperica are the decisive answer to those who would delude you with the assertion that the class war does not exist. The class war to here, around you, on every hand. In that war the capitalists have legally won their first battle with trade unionism—by all methods they will continue to win M trade unionists generally do not make up their minds to abandon their old limited ideas and to throw themselves heart and coul, as unionists and men. into that great international Socialist army which alone has within its grasp the hasic principles by which peace and instice can be assured to the

An example of the way the minds f the children are being systematicalby pre-judiced against Socialism and against the labor movement in general cause to light in this city last week. The prompt action of a comrade, whose child was among those practised upon, will no doubt have a good effect and should be imitated wherever such attempts are detected.

tempts are detected.

The reacher in question—we may re-frain from naming her, since we are nformed that she is already in enough trouble over the rffair, and may merly say that she is employed in a pri mary selool in this city—told the chil dren in her room that "All Anarchists and Socialists ought to be driven on of the country." Among the pupils was Brijk Reichenthal, the daughter f our comrade, N. B. Reichenthal of the 24th A. D. Knowing her father t be a Socialist, she naturally reported the teacher's remark to him. Inquiry proved her report to be true. Commad-Reichenthal immediately addressed an emphatic letter of protest to Borough Superintentent Jasper, and gave in ormation of the matter also to the So

cialist press of the city.
Evidently even the school authorities in New York have learned that Socialists are not to be trifled with, for an answer very quickly came from the superintendent, apologising for the teacher's words, admitting that they were wholly unjustified and improp er, and prontising that she should be warned against such errors in the

future.
The incident is an instructive one, for such outrages are of very frequent occurrence. Many of the teachers are honest in their intentions, but utterly gnorant of social and political ques-tions, and blindly believe all that is told them by the second-rate politi-rians whom the Republican and Democratic parties commonly choose to ad ninister the schools and all that the read in the books published (with a dushle purpose) by the School Book Trust, Socialist parents should be on their guard against such abuses of the

RIGHT AND MIGHT.

Alghis that exist only on paper are no rights at all. The capitalists have right on their side today, for there can be no doubt that there is a systematic attempt being consciously made in capitalist circles to use the influence of the schools to injure the labor movement. It is described to the respecting people of the town and the state of the worst enemies of the worst en Delegate Campbell very reasonably suggested in this case, that the parents are to be reached through the children. The plan is more far-reaching than that. The capitalists recognize that the majority of the school children of fo-day will be wage workers ten years from now, and they wish to advent them in a habit of slavish obedience to them is a habit of alavish obedience to capitalist rule and of prejudice against the working class movement. This makes it all the more necessary for workingmon to act at once, to take the governing power out of the hands of the capitalist class, before it is too late.

If we are not all safe, none of us are safe. The questions concerns all. The danger threatens all except that, paling class which ereates the danger.

For it is all a part of the class strugglo. It is not any question of abstract morelity that interests the capitalists: it is a question of holding on to their uncarned profits. They do not really care about the marriage system; if they did they would not furnish so many harems, would not drive women through poverty to promittution and through prostitution to snielde, as they do. They do not really care about the inte President, even, except as his fate makes them fear for their own lives: if they had any desent human regard for him they would not insult his memory by turning their mourning for blus into a accomble for dellers and notoricty, as they all fid-from "Holy John" of Philiphelphia to "Cheap

And what they fear is the labor movement, and especially the Bocislist movement, end that is what they will try to stains out. They cannot succeed; they are fools to think they can: But the reaon they cannot succeed in that the working people, and-superially the Horigitats, will tight and keep on fight ing till the suppressors are suppressed. And we must begin pow. Every time a writte of capitalism passes the punished, unredsted, unrebuked, at much strength has been gained by the enemies of liberty and order and upog-

AMOTHER DEFRAT FOR BERN-STREET, Several of the leading capitalist pa

pers have, of late, given considerable attention to the alleged rapid growth of Bernsteinium in the German Social Democracy-devoting for this purpose far more space than they ever cared to give to explaining the actually accupied principles of the party or to re-cording its brillant, victories. They have been very prodigal of fatherly advice to the Socialists of America, as curing us that if we would follow the example of our German comrades, throw Marx and Engels overboard, forget the class struggle, shandon our rule of "No compromise," and transform our movement into a mere radical reform party, we should be able to accomplish our suds much more sasily. Such advice-especially when offered

by such tried and trusty foes as the "Nun" and the "Journal"-has not been very cordially received by the Social Democratic Party of the United States. Even though it were true that trade union papers for supporting the German Social Democracy had become "Bernsteinized." we said, that should not decide un 'to, follow the same course. But we presumed even to doubt the truth of the news so wide ly published by our advisers, that the party in Germany was actually on the point of abandoning its established course and accepting Bernstein's compromising leadership; the wish, we sald, was father to the thought. And

The discussion of all questions of principle and policy raised by Bern stein, both by word of month in party gatherings and by the circulation of ooks, pamphlets, and articles in the German party press, has been so free, so thorough, and, with slight exceptions, so calm and judicial in its tone that we may rest assured that the votetaken inst week in the congress at Lither very accurately represents the real opinion of the rank and lile of the whole Gorman Bocial Democratic

In the Hanover Congress of 1909 the esolution rejecting Bernstein's theo ries was adopted by a vote of 216 to 21. In the Littie Congress the resolution rejection bis theories and virtual ly censuring him for the offensive namer in which he has been advocat. ing them is passed by a vote of 208 to 31. The severar character of the rebuff now given to the compromisers fully accounts and more than makes up for the slight difference in the vote

The result is most antisfactory to ur Our German comrades stand true alike to the revolutionary traditions of the ovement, and to the present needs of the working chass, in spite of all the alluring promise of immediate success at the price of real ultimate defeat. which a program of compromising reform atways offers. The defeat, th repeated defeat, of the reactionary and impromising elements in the move ment is to be credited, not alone, no chiefly, to the learning and eloquen of Rebel, of Liebknecht, of Kanisky of Singer, but rather to the sturdy common gense, practical knowledge and class feeling of the working people. Resolutions are 'not made: they grow. Revolutionary determination thought and feeling is not created by party Jeaders, but by economic conditions. The Socialist mevernent of the world will remain a revolutionary movement, in apite of Bernstein and his issuer imitators, until it completes its work for the conditions by which war be waged unitedly and unwaverthe capitalists profit and the workers suffer inevitably create and guide tarevolution which is to abulish those

consid I I biomer Hardly loss significant to us then the fact of the defeat of Bernsteinium in the admirable manner in which the controversy has been conducted. We may well observe the methods of the German movement and profit by its experience.

"fiere we have bad a men of bleb standing in the German party inaugurating an attack upon important funda mental potats of Socialist theory as formulated in the party program and upon fundamental points of Socialist policy laid down by the resolutions of its successive congresses. His past pervices command attention, he enter a certain following; his theories excite the interest of the whole party mos bership and are halled with joy by the enemies of Sucislism. A great contro versy arises within the party, lasting now more than three years, and the lines become clearly drawn between tions who hold to the established post tion and those who support his attacks

upon it. Yet there is no attempt on the part of the party organization or of the party press to stide this discussion o to exercise any special censorship grus 12. There is no suggestion that the innovator be expelled or otherwise disrightned. On the other hand, the off-The Miller and the leaders of the party wege the necessity of calm and suspectful consideration for his critcisted. "If we are wrong," they say, "we wish to know it. Let us hear and

ories, is the duty as well as the right of every comrade. Party discipline b to be invoked only when an individual resumes to misrepresent the expanse d opinions of the party or when be acts in violation of its decisions. If he can change the opinion of the party, self and good: If he can show us that pr present course is wrong, we shall change it; so long as he seeks only to persuade the party to his views, not to defy its rules, be in within his right and will have the widest liberty."

What is the result of this same as i Sheral policy? Just the reverse of that produced by the hysterical intolerance of which we had an experience in the American Socialist mevement a few very ago. DeLeonism: with its delfication of discipline and anathema upon all criticism, provoked incessant essions, divisions, and stopped the party's growth in its central stronghold. In Germany the internal differsucce have been far greater; yet not only has the attack been successfully met, but there has been no occession and no desertions worthy of mention and the progress of the party has no been interrupted nor even checked.

We in America do not stand greatly in need of the lesson just now. Since the overthrow of DeLeonism in 1600 is is, perhaps, more important to urge the preservation of discipline willide its proper sphere than to raise a waraing voice against its extension beyond that sphere. Yet we may bear the less son in mind, for occasions will screety arine when we shall again he tempted to confuse criticism with trusson. The ost valuable feature of the Bernstein controversy is the practical demonstration that the widest freedom of discussion within our ganks is perfectly compatible with the most effective party discipline.

A LESSON FOR THE WEAK-WOOD BEING

"The South Chicago steel workers" who feared to violate a contract will Schwab is without fear in that 'bespect," says the "Workers' Call," commenting upon the fact that the South gratulate our cantaukerous contemto go out during the strike, have been put by the Steel Trust in the list of non-union works. Success would Stabl into the places of fee-man Van have benefited them along with the rost, by strengthening the whole craft and the whole labor movement. They chose to betray their fellow workers in order to "stand in" with their bosses-and they are the first sufferers from the defeat they belped to bring about.

The incident points two morals First, capitalists never healtate as instant about breaking a contract with workers, if they can gaid a penny by doing it. It is therefore nonsecond for workingmen to talk about breach of contract in time of labor war.

Becond, the capitalist never gives the alightest consideration to the scab, the strike-breaker, the disloyal or weak kneed unjonist, once that person has served his purposes. Any man respects a brave and consistent chemy more than a cowardly one or a truitor from the opposing side. The Steel Trust magnates may hate the McKeesport nen more than they hate the South Chleago men. But they respect Mc-Keesmort a thopsand times more

In another column we print this adwas of Comrade Quants of Richmend, who appeared before the Countitutional Convention on behalf of the organized working people of the sinte-Rome time since, we called attention to the fact that more than sine-tunits of the spensions of the Convention were lewyers, bankers, manufacturers, or planters, and that there was not one wage-wasker, in the ordinary sense of the word, in the whole number-a few physicians and orbits teachers being the only representatives of the sector's

goes without saying that such a body would pay but little attention to the demands of the working class. Com rade Quantit address in, in effect, a pretent against class rule. It is for the organized workingmen, whom he reresented, to support that protest by independent political action on class lines, in behalf of their class interests as against the interests of the class that ewas the land, the railroads, the factories, and all the means by which the people live. The Socialist Party is in the field for that purpose. It is the party of the working class and vigorous support of its ticket and platform is the only way to check the marpe tion of power by the pessenting class

"THIS MAN OR BARABBAS?"

BY PETER E. BURROWES.

The first lesson ever learned by man in his groping out of the dimness of primaval life was the need of fellow-ship in living and organization in inbor. Without this perception the hu-man creature, or he that is still trying butten, would have remained in he jungles, one of the contending families of predatory beasts and noth-

ing more.

In yielding his willingness to and forming his habits upon, that percuived necessity, by began to endow the race with its greatest possession, tow race with its greatest possession, as some of the other. There and then he began to turn his back upon An archy, and levery step taken by him from that bruse kingdess, evel since, has been a step away from competition and towards Socialism; and when, later on, he joyfully counts the human speed by which he has outrun the anarch madness of private striving, the same measure will tell how for he has left Assrchy, and also the Republicau and Democratic parties behind him. The subordination of lifturelf to the intelligence of another for the purposes of a more effective labor process was really the first true act of the greatly human; and the door of that redenittive act was the worker, so soon, alas, and so long, to be made the slave of

acclety_ It is not easy to see how mankind in his industrial childhood could have escaped this condition of slavery; and it is therefore very easy to see that slavery and the slave, born of human necessity and racial instinct, contained not only the foundation stores of material civilization in labor-nower and skill, but also the only ethical quality by which society could existthe quality of obedience to external hurequirements.

Has it happened that in the broken urse of buman events there appears among us a class of separatiets who refuse to give their life either in labor force or mental activities to the co-operative and organized industry of the whole democracy? Have you seen may of these men? Have they come lute your life? If so, you are up against the world's problem, and it is this: What is mankind going to do with these men, or what are these-men go-ing to do with mankind? If there be a dollar aristocracy in

this land already established, or form which must rule in order to exist whose rule over the workingman is only a transaction in bookkeeping for the maintenance of a perpetual and ever-growing credit on their own aide and the reduction of the laborer to ex-forced payment of that debt by servitude-a debt ever increasing and never to be liquidated. If that debt relation eformry unally filture down to the payment of an entire day's labor-force for the right to live, what are thes men going, to do with mankind? Or what is mankind going to do with these men? The instinct that led, the avage to his first emergence out of the lungle is still ours. This instinct of self-preservation has long ago invested teelf in the family, the tribe, and the nution, and it is now in the birth-throse of a larger sense, by which it is striving to envent itself in the race. To this end it has been feeling about the world these many years for its truical man.' A, long time ago it thought it had found tim in the priest. And how enerously did the social instinct be tow itself through centuries of tr-mendous craving upon the succeeders man, the priest, and the prophet! Then it thought it found him in the patriot And how loyally it poured out itself at the fact of the professional patriot Now the priest and the pairiot are butl absorbed and there remains only thes

two: The capitalist man, who has absorbed the priest and the patriot; and the workingsiam, who he getting his product restly for the same almosphism the proletarian or the capitalist. En which of these shall the lu stinct of self-preservation invest Itself seeking the largest and deepest laisecurity for its interest in the whole of the human race? By choice, I say, Brail-bas stands outside of human, solidarity, in the ranks of the Philistine capitalists. He name of the late gain and lonely pre-terity. His sect is therefore at alle-sect without virtue. If you doubt this giance at the treatises of political poglamen at the treathest of political pol-on prepared for public teaching in our eitheals and called "econology" of glames at the editorials of any "re-spectable" daily on the Hocialist move-ment for a more collective life; and then choose, you who are choosing for the greater life of the world, between the only true typical historical men re-maining, the worker and the awester of those that work, whether it shall be the former or the inter—"the man or. the former or the latter—"this man or Harables." . The half-been demonrates of the

world, in their political efforts after what is colled government, have intro duced nothing more remarkable than these seven lies: First, that govern-ment by parties is necessary and right; second, that politics moves on a different road from and for other purposes than do the footsteps of the world's laborem; third, that it is possible to continue a demorracy (and be free) in which private appropriation is recog-lized to be the business of every citi-nes; fourth, that it is possible to arrive at order and to avoid anarchy m der competition; fifth, that political equality can continue among most b tween whom the relation of slave and master has been established; sixth, fers some of its members to light for bread and others to live upon-all that the fighters lose above bread; seventh that any society can be purely set an l true, which is based, upon any other interest than that of ats downmost

The world question, therefore, which

men are called upon to answer at the great political nasize to be held throughout the city during these coming days and nights of the fall camraige is this: Which is the eriminal class? What, though the choice this time, he not a national one; it is nevertheless the same choice to the classnelons voter. There is not a vilinge election, however indifferent the numinal bisness may appear, and whoever the candidates may be, that does not present to the trained mind of the class-conscious Socialist this must at ternative—the choice between the cause and the friends of the criminal roll-monger, and the came and the riends of the wealth-producers. All othermon have vanished out of political life (and there is no other life now adays but these two; they have been cast in the iron moulds of history; but yet, happily for the hope of the world. caving the mind comparatively free igh at least to make this we vote aright Which shall it be- lianford or the au tomob, Socialism or more capitalism "this man or Barabbas?"

dian Pecialist Leagues in Montreal and Toronto two years ago much good work has been done by pushing forvard the work of organization and bringing the Socialists throughout Canada into touch with each other, bound constitution or platform was adopted by the organizers of the movement, they believing that better work could be done by first building up a movement and then allowing the combined wisdom of the members of the various leagues to take such action as night by horesonry.

In the next local leagues have been as the work of propaganda was conomed, and no charter fees or mem hership dues were drawn into a central fund to sid in the work of the organising secretary, appointed by the Torente league, who has been favorably situated for this work by his counce tion with "Citisen and Country."

Seventeen Socialist lengues have been formed together, with Socialist clubs in Nelson, Vancouver, and Nasalms, B. C., and Brantford, Ontario allina, B. G., and Brantford, Chiario, An Irelandic Secialist club in Winni-peg, Man., and a Fabian' Socialist league in Bt. John, B. E.; are two re-cent additions to the list. Through the aid of this paper \$500 has been pleaked has medium convenient formula in the by various commutes towards paying the expenses of a paid organizer for Socialism. An organizer is working on Munitoulin Island and will do a month's work in Gutarlo, and if is now proposed to guarantee sufficient money from the central fund to allow the British Columbia comrades to place an organizor in the field for three months? vork in Western Canada.

"Citizen and Country" believes that Canadian Ascialism has outgrown its semi-organized condition, and should take another step forward by completing its national organization and cumciating its principles as a political or ganization. In many districts it will be wise to continue an educational campaign, but others are ready to take political action. A national organiza-tion is nected to raise funds for litera-ture and organization work.

The Canandian movement should fol-low the example set by our United States courades at the recent Indianapolla convention, by forming the Canadlan Socialist Party, the branch or gantantions to continue to be called leagues. The recently drafted declaration of principles might be printered by a number of "immediate démands" similar to those adopted by The American Socialists, and a national constitution and by-laws similar to those of the United States Socialist Party, of the Independent Labor Party of England, adopted. A fee of ten cents per member per month would probably supply sufficient funds for the move-ment, although the dues in the United Biates are twenty five cents per month. Provincial organizations should supplement the national body and a national headquarters could be chosen by a referendum vote.

ready called a convention to complete their provincial organization, and the gathering on October 2 in Vancouser will do good work by alding in the work of national organization; Let wise action he taken in Vancouver and a convention of Ontario Socialists will be called to complete the work in the East, to meet on Thankegiving day.

The applyerancy of the revolution of 1808 was celebrated at Madrid and other towns last Sunday. At a meeting of 20,000 Republicans and Socialists at Baresions the crowds proceeded to lay a wreath upon-the manuscent of General Prim, the once famous insuegent leader in Spain. The police interfered and a fight ensued, the crowd using stones and the police firing upon them. Two policemen and three of the demonstrating crowd were wounded.

The Japanese Socialist "Labor

World" contains a pittful account of the system of girl slavery which has followed the introduction of the furinto that country. The writer deals specifically with the case of some 15. ed in the slik industry in the prefecsills. Each fitchery enurges 50 to 500 immis. In order 1, get cheap workers, the masters employ the meanest arti-fices to obtain girls from the rural disreleta. The farmers are deluded by glowing stories of good stages to sign contracts handing over their daugh-ters to the agents. The girls are then shipped in sauge like African slaves, and besoght to the factory to consider the postracts. Brought to the factories, the girls are subjected to horrible conditions. They have to begin work at 4 a. m., and continue till it p. in., seen date a week. From June to be comber the girls are not allowed to lease the fifth foul-aired factory. Inered ble as it may seem the factories are auremented like presunt with femore or disclar to pro-of their re-came. Every liberty is taken away from the girls. They are neither al-h wed to with or ne easy is to a large. ner i in all the toos even when i ing to the water closel and are fined one yes for standing! They are only showed a few minutes to take their attoried in few initiation to take energically which is of theremapped description. No next is excentill the glein investment to extend their nontracts to both appear to extend to nontribe. The best afril workers can even 50 nen requal to 25 centre a day, while inferior waters respected more, than 8 to 10 sen, it is alleged too, that the girlesoness of tender age- are subject to the grossmorally and physically epined for life.

one will dispute that, with the proper amount of effort whely expended, that many workingmen who have ties 'can be brought to see their folly and taught the necessity for supporting the party of their class-the Social Democratic Party.

How this can best be done in the short time intervening between now and Election Day is the problem confronting your Campaign Committee and every active Socialist in Greater New York: As means to solve that problem, your Committee has made ar rangements to carry on the most exten dive campaign for Socialism ever conducted in this city.,

Every workingman voter should reerelye copies of our leaflets advertising our ticket and platform, and fully-explaining the aims and purposes of our party. This means that a vast amount of printing most be done. Many of these leaflets must be folded and placed in envelopes, and three envelopes must be stamped to carry them

In addition to this, leaflets and other literature must be distributed at every meeting held during the campaign. Then there is the great expense in wolved in conducting the campaign. such as printing and sending out subscription lists, paying 'speakers' ex on, advertising meetings, etc.

Many other details unnecessary to mention here must be attended to, and grave necessity of doing your full duty within the next three weeks. During the short time remaining we can do the most effective work in turning our fellow workingmen away from their idole and in bringing them to recognize

We all know that the feeling of discontent with present conditions is growing ever stronger among the workers. We know that this has made them ready listeners to Socialist speak ers, and eager readers of Socialist literature. Everything is favorable for a large increased Socialist vote next month: All that is needed is for us to take twick advantage of the opportuni ties open to us. Sháil we do lí?

The increasing expense of the camnaten demanda an increased campaign fund. MONEY IS NEEDED. It is an old cry, but never did it require speedler response than now. Never was money meeded for worthler cause. Never was money put, to better 'us Socialism, Upon Socialism depends not only the emancipation of the working class, but the welfare of human-

WM. T. BROWN ON THE ASSASSINATION.

revention. Het Punishment, is the Buty of the Hour-Present Crime by Removing Industrial Injustice That Gausen IL

Our comrade, Hev. William T. Brown, of Bochester, in his recent ser-mon on "What Duty Does the Assassination Impose Upon Us?" said in

purpose at all in our action, must it not be to make all life more sacred and invisints juan it has hitherto been? We are not be content ourselves with publishing our belief that life is sacred and inviolate. We have done that arready. Here is an opportunity for government to take unto itself a higher and pobler function than it has thus far assumed. It can, if it will, take some steps toward making human life inviolate.

"Say what we like about it, the fundamental came of the death of William McKinley was the fact that government to-day does not regard nor maintain the sauctity of human life as such. That which has produced men like this assassin is a social and politi cel condition which conveys-broadcast the impression that human life is not a sacred thing. The wonder is not that we have had but one assassination of this nature. The wonder is that crime is not teufold more widespread. Tell me what estimate of human life this commercial and industrial system of ours conveys to the minds of the mili-lons. Does the operation of these great trusts under private ownership tend to create the impression that human life is held as a sacred thing? Indeed, what is there inherent in any indus-trial organization which shows the smallest regard for the sanctity of hu man life? Ask the gians blowers, the miners, the cotton and woolen factory operatives, the dre workers, the thousands of men and women whose em ployment means a distinct shortening of their expectation of life—ask these persons whether their life is made to wem to them a sacred and inviolate

of the most important agencies of allone of the most natural and effective. One method we have not tried: It is to make our institutions, themselves object lessons to teach the social and political ideals which we profess to cherish. The institutions of this co try—its commerce, its industry, its political forms, its shops, its factories, its calroads, its mipss, its legislatures, its courts—must themselves proclaim that human life is facred. That must be the impression they creats. That must be their meaning-a meaning so clear and plain that no one can mis

"And they will do that by making every form of industrial activity di-rectly and immediately promotive of human happiness and well being. They surely cannot do it by maintaining institutions which give the lie to all our cem crude and footleti, It cannot be done by making human , lives seen cheap, by subordinating the interest to the interests of capital-which means material things. That is what we are doing now. That is the exact aning of the whole fabric of our civ

"The theory of Anarchy, as repre sented in this assumin, has grown up and taken root in society, not at all be-cause human nature is evil and bad, but because of the abuses of government and because the lastitutions of civilined life hare everywhere subor-dinated human life to material interests, because government has been I many places nothing but organized faithe. It has precipitated warn len timelf to the achemes of designing men need as a police force to hold one class of people, while another class picked their pockets, and proved itself all that

government ought not to be.
"We cannot cure gualipok by pool-ticing the sures. Nor can we cure the disease of assassination by putting to death the assessing, or by undertakin blood, the vital current. That must be purified. It is also a disease which filthy anvironment fosters. That en-vironment must be changed. Social disease of every sort is not a matter of symptoma, but of blood. Its remedy is not to be found in external applica-tions of force, but in some attention to social environment and institutions principles. The one sure defense against tiolence is justice. There is

The amusing Dr. Parkhurst preact-ed on Amerchism last Sunday. He said a good many things that were quite true. It is rother difficult, in fact for even Dr. Parkhurst to talk for an hour without saying some tree and good things. This time be hit on the fact that the Tanmany politicians are Anarchists I'u practise and breeders of crime and dis-order. This is not new, but it is true, so let us give him credit for it.

He failed to say, however, that the "reformers" whom he is especting are of exactly the same species and case he distinguished from the Tammany sort only by the label and by the fact that they are now out of office

The Reverend Doctor "gave himself away" as a teacher of truth and right-councess, however, when he said; "I do not defend Anarchy, and I do not criticise woulth, but I urge that it tising the economity of their accumula-tions as to accuminate in the mind of the poor man the poverty of his own condition."

ffinas it is all right for the capitalists to fiscee and rob the workers, but that it is criminal foolshmess for the capitalists to let the workers see how badly they are fisceed and robbed. The Reversal Doctor's gaspel of prudent concealment comes a little too late to eave the capitalists.

ILLINOIS CONVENTION.

estion of the United Party i Bligt State Effected at Well-Attended Sathering Hald in Chicago.

The state convention of the Socialist Party of Illinois was called to order in the Socialist Temple, Chicage, on Sun-day, Sept. 22, at 10:55 a.m. J. B. Smiley was elected temporary chairman and Philip S. Brown temporary secretary. A recess was taken until noor to allow the committees on credentials

and rules to perform their work.

The report of the committee on credentials showed one hundred and five delegates present-sixty-three repre senting thirty-four branches forms affiliated with the Springueld N. E. and forty-two representing twenty-five branches formerly affiliated with the Chicago Executive. Comrade Smiley was then chosen as permanent chair-man and Charles H. Kerr as speretary. On motion it was voted that an assistant secretary be selected from the delegates representing the S. D. P. of Chicago. An S. D. P. delegate then responded that there was no desire on the part of his delegation for such a representative and the matter was dropped by common consent.

ommittee on constitution consist a sommittee on constitution consisting of Comrades Smith, Richiter, Wanhape, Brown, Westphal, Kerr, and Sissepan was elected, as also a committee to draft resolutions regarding the arrest of Comrade Welcher for speaking on the street, and exposing the attempt of the "Triburary to conthe attempt of the "Tribune" to cor fuse Hocisilant with Aparchy, and as serting cur right to hold public meet

Comrada Duncan B. Smith called the attention of the convention to the fact that an attempt was being made to organize as "Invisible Army of organise an "Invisible Army of Voters," with headquarters at Girard; Kan, a secret organization outside the control of the Bocinist Party. An informal discussion ensued, in the course of which a delegate stated that he had received a letter from the "Appeal to Reason" office, informing him that theproposed organization had been given Many delegates, however, favored some expression on the subject and Comrada Kerr offered, the following resolution, which was adopted:

"Resolved, That the Socialist Party of Hinels congratulates the editor of the 'Appent to Reason' on his decision to shanden the organization of a se eret political society, and that it calls upon all Socialists to put all their en-ergy into the work of the party itself." The special committee on resolutions reported through Comrade Evans the following:

"In view of the fact that the present hydrerical capitalist press, its organi-nations and monthpieces, are making an open attack upon the rights of feet speech and free press, by which means alone, the minority are safe-"Reshived;"That we the Socialists of Illinois in convention assembled.

sympathiners to contribute to a fund for the purpose of carrying out the fight." Courades Simons, Wanhope, and Mor-ris were elected a committee to receive funds for the purpose stated.
The committee on constitution removied a draft which, atta-discussion.

Organized Labor. Comrade John J. Quanta, one of the tried old soldiers of the Socialist move-ment in Richmond, Va., was the spokesman of a committee chosen by the state Federation of Labor to appear before the Constitutional Conven-tion of the state to present the wishes of the working people. The following is a report of his address to the Cop-

Franchise Committee. "As the duly authorized representatives of the State Federation of Labor, we are before your honorable body to present some important matters for

'Mr. Chairman and Gentlemen of the

our consideration. "It must be evident to gentlemen of your intelligence that under our present aratem of production and distribution, eavi qued by laws that look more to the projection of property than of humanity, the opportunities for the laborer properly to provide for himself and those depending upon him are fast disappearing, and with it be is rapidly declining into a state of hopeless help compess. Refore him he sees no ray of hope for a betterment of his condition nuder a continuance of this present system. It is a fact, sire, that those who have absolute control of our bread have control of our lives. They, by virtue of their power to say when we shall be allowed to work, have the power to say whether we have the right to live or not. If we, depending upon our labor for our living, are denied the right to labor, we are virually

denied the right to live. "This, then, brings us to the declars tion that all men are entitled to 'life' liberty, and the pursuit of happiness, If we are entitled to life, it must neces-sarily follow that we are by nature entitled to the right to do that which is necessary to sustain life; and if this be true, then any and all artificial bartiers preventing men in the exercise this right are wrong, and must b swept aside. 'Any course or practise of government that tends to oppositive divine right to live is and must be productive of oppression, which, is turn must and will be productive of disastisfaction and, eventually, an-

"I'rivate monopoly of the means of production and distribution, which has been fostered and encouraged by laws placing property above humanity in the structure of our government, is neimarily the cause of the present almost helpless condition of the toiler to demand a proper return for the labor he expends in producing wealth of any and all kinds; but the laborer would not be rearly so belpless, despite exleting economic inequalities, were it not for the fact that capitalism has at its beck and call all the powers of gov-ernment, from legislators to the mill-

"In proof of this intervention of goverament in behalf of capitalism in its

conflicts with labor we offer the fol-, lowing: " CHICAGO, Ill., August 29,-Union pickets may be arrested without war-rants, and held to the criminal court for uniawful interference. If they touch a mon-union man, and reques the privilege of a conversation. This was the purport of a decision rendered here to-day by Justice Doyle, when he held to the Criminal Court James Brown and Herman Vogelsanz, two of the strike committee of the Iron Mouliers' Union of North America, who, on August 23d, pulled the sleeve. of Anton Neitson, a monique, and said, "Can I speak with you?" "Here, gentlemen, we have a judicial

act that is destructive not only of our constitutional rights, but annihilates the last vestige of our natural rights; and the worst of it is that this Judge can press into service the police and military powers to enforce this aweep-ing and unjust decree. This is not an inolated case, either. It is but one of miany of a similar nature and purport. "Such tyranay has over been produc-tive of but one result—the making of American. It is the American in high places, who overrides the constitution and the natural rights of the people, who haskes the Asarchiets in the lower walks of life. In the list of Anarchiets in high places we find the legislative Andrebigt, who exacts a law mittee the sum of two cents per month as does, of which five cents shall be remitted to the National Secretary by the State Secretary and five cents shall be retained by the state accretary as state dues.

It is the high pressure of this absolute oligarchy that is mak-ing Anarchists of the hungry working class, and the mills are grinding them fnto shape by the thousands; the thou sands who are dying by inches on half rations; the thousands who stand ready to take the jobs of atrikers en-deavoring to better their condition; the thousands of heads of families who cannot, because of the age limit or the use of machinery, provide for their families and have to call to their aid their wives and children; others still

who are divorced from beloved wives by stern necessity because of inability to provide for them. "This vast and increasing army of the disinherited, discontented, and on pressed of the earth is growing daily, and their discontent is increasing in exact ratio with increasing distress and tyranny. Therefore, we repeat, if you would escape an era of anarchy such as the world never saw from the ranks of the desputled and exploited labor of the country, you must device some means to stamp out anarchy in high places. The Central Federated Valor and the unions represented in it have been begging the Democratic administration, all through the four years, to keep its promise and enforce the laws. HOW MUCH BETTER IT WOULD HAVE BEEN IF THEY HAD VOTED, FOUR YEARS AGO, POR MEN OF THEIR OWN CLASS TO ADMINISTER THE CITY'S AP-FAIRS. Instead of begging from FAIRS. Instead of begging from their enemies and logging in vain. they would then have had only to pre-sent the facts to their chosen servants, and their will would have been done.

They have a chance to right their mistake now. They have a chance to put into the Mayor's chair one of the men against whom Democratic Justice Hookstaver and the "Sun" conspired -- BENJAMIN HANFORD; of the International Typographical Union. They have a chance to elect as Controller and President of the Board of Aldermen two of the men against whom Democratic Justices McAdam and Preeduin and the cigar manufacturers uplred: MORRIS BROWN HENRY STAHL, of the Cigar Makers' futernational Union. These are men whom-they know as brothers and comrades. Do they prefer to have lawyers, brokers, merchants, and landlords to represent them? If so, let them neve

Central Trade and Labor Council Renews by Icoressed Veto Its Demand for Rusignation of Officer Who Trains with Capitalist Politicians.

Three weeks ago we reported the fact, that the fit. Louis Central Trades and Labor Union had, by a vote of 43 to 23, demanded the resignation of its president, George Meinz, because with out authority and against the known wishes of the Council, he had invited a capitalist politician, Governor Dockery,

capital'st politician, dovernor Dockery, to speak at the Labor Day picnic.

Melan refused to consider this action as final, urging that the attendance was light and that it was a "manprote", The matter therefore went back to the affillated unions and at the next meeting of the C. T. & L. T. most of the delegance had instrumental acculier. the delegates had instructions, explicit understood. The attendance was

unusually large.
The question came up on a motion by minutes. On a standing vote the mu-tion was lost and the original resolution nuntuined by M voten to 40 nyes. Meinz' friends were then foolish enough to demand a roll-call, with the result that 114 voted to support the denand for his realguation, while only

Fellow werkingmen, you may think ! hat you could not creditably fill the public offices of this city and this stafe. Marbe you think that you and facmembers of rour class have not the ability required for such important places. It would seem that the worklugmen of this country must have formed such a low estimate of their regularity, with which they elect lawrers, capitalists, and salounkeepers to make and execute laws for them? IT. IS AN UTTERLY PALSE OFINION,

if you set about it deliberately, sleet of usplume, who would govern city, state, and nation in a way more injurious, to rdur interests and more detrimental to social welfare than those at this me ment in office.

But the case is stronger than that, IF YOU WERE TO CHOOSE MEST BY LOT OUT OF YOUR OWN CLASS, YOU COULD HARDRY FAIL TO GET HONESTER, AND ABLER MEN than those whom the Republican and Domocratic machine ave accepted.

What sort of ability is it that the you want in public officials?

A ABILITY. Do you think the working countries as a result of the explosion. Ever occur to you that when a work class lacks such men? On the conion. Saturday evening. October 12. Come and HRING others with you to hear the workingmona's candidate for Mayor of New York. Come early, or Mayor of New York.

in finding men IN YOUR CLASS competent to fill such places. Mast you In the first phice, you could hardly, want to choose farming for these hig workshops of city, state, and hatfer set of men from any class outside the and you will have no trouble in finding competent men in your own chase,

Did it ever beenr to you that IT IS A MUCH HARDER JOB TO BE AN OFFICIAL OF 'A BIG UNIOIN THAN TO BE AN OFFICIAL OF A BIG CITY? It is the plainest proposition in th

world. A union is a voluntary organi ration. The obedience of the members depends salely upon their knowing or feeling that the laws of the unions are good and wise ones. There is no power save nominated for you and whom you in the hands of the officials to correct dissatisfied members. Success depends on so conducting the affairs of the union that everymember shall be that its rules are right, that its assessment, ought to be paid, that its acts are beneficial to him. The successful union to hide a great deal of real stupidity less policial is the one who accomplished this and holds the members together ir know low to frame laws that seem to spite of differences of opinion within cay one thing and that really say sense had in spite of attacks of superior force from without. All this has to be accomplished by reason, by the use of knowledge and good judgment, with out any resort to force.

The officials of a city have a far enler task, in the first place, because the city is hot attacked by any anch organ with have the power and authority of untury assessments which citizens may refuse to pay. They lavy taxes: and have authority to collect them. They do not have to depend solely ok reason to secure obedience to law. They have the police to corres citizens who rebet against the public will.

You always find men in your own ranks to act as presidents, organisers perfetation, shop chairmen, and stelled ammitteemen for your unions. MEN WHO SUCCEED IN SUCH WORK AS THAT HAVE JUST THE SORT OF ABILITY REQUIRED TO MAKE GOOD PUBLIC OFFICIALS.

You would not think of asking you beeses to draw up constitutions and by-laws for your unions, or to decide the cases of discipline that arise there. You know that you are quite com petent to do that for yourselves, either directly or through officers and costs mitteen elected by and from your own

The comrades of the Fourth Assem hly District have fallen to work in the compaign with all their old-time en-thusiasm. They propose to make this a memorable campaign and to pile up an unprecedented vote for the ticket of the Rocial Democratic Party. Morris Hillquit is the candidate for

Assemblyman and Dr. Julius Halperu for Alderman. Both are well-known in the district, and will take an active part in the campaign. A great ratifica-tion meeting will be held Thursday evening, Oct. 17, at Pythagoras Hall, 177 E. Broadway, which will be ad-dressed by the district candidates as well as by Bonfanta Manfact. well as by Benjamin Hauford, candidate for Mayor. At the last meeting of the district ar-

One thousand copies of the present issue of The Worker were ordered, as well as 20,000 cards bearing the party's emblem and ticket, and 25,000 copies of leafets in English and Jewish especially adapted to the district. A large-transparency was ordered and a wagon with signs showing the emblem and ticket was secured for the use of speakers at street meetings. Morris Hillauit has signified his no

'Gentlemen:—L accept your communion for the office of member of the Assembly from your district with a full appreciation of the honor it Implies and the duties it Involves.

"The Fourth Assembly District is one of the most typical workingmen's districts in the city of New York, and presents all the deplorable features of such districts. Its neglected and dirty streets are lined with rows of luge, rgly tenement houses, and within those are crowded tens of thousands of poverty-stricken slaves of the awest-shops, with their overworked wives and sickly, rugged, and neglected chil-

It lies within the powers of the municipal government to provide clean streets, sanitary dwellings, and plenty of playgrounds, parks, numeries, and schools within the work-ingmen's districts, and it lies within the power of the state legislature to improve the conditions of labor and existence of the workingmen. talking "economy" and "business-like government" just now, This is because election is at hand and they think this

a gool way to catch votes.

When Tanumany promises to practise economy. Tanumany ites. Tanumany is business is to make all sorts of promises in order to get its men into office, and then to loot the city treasury to re-word its heelers. That is what Tammany niwnys has done and always

may se expected to do.

The "reformers" are a little more sincers when they occlare for economy.

The "anti" combination represents the port of people who like to call themselves "respectable citizens" that is, the merchants, manufacturers, and real catate rwners, who do not want to pay high taxes.

But what difference does it make to
the working-man whether the city gov-

erunient is economical or not? difference does it make to the working whether the capitalists have to pay high taxes or not? Almost all the taxes are levied either

upon rest estate—land and buildings— or upon "securities"—bonds, stocks, and the like.

You laborers, mechanics, factory workers, clerks-all you wage workers, -do you count yourself in the same class with the property owners? You don't own your home, do you? You don't own any stocks or honds, do you? How will it benefit you to lower the taxes on other people's property?

If there were more houses than the papulation of the city nouled—if bundheris were rompering to get tenant—the lowering of taxes might possibly lower relate a little. But that is not the case. New York City is crowded. The population is growing faster than the population is growing faster than the housing facilities. The landlord has you light, and he will squeeze you for

all the can get. In such a city as this, at least, rents are fixed, not by the needs of the land-lords, but by the general ability of the people to pay. If taxes are lowered, the landlord will continue to get just as much out of you as he can-just as much as he gets now-but he will gain by hot having to pay so much over to the city. He will be richer and you will be just as poor. Why should you vote for his interest? He never votes

reduce the tax rate. What would be the result? They would have to cut down expenditures, would they not?

ECONUMY AND SCHOOLS.

The largest item of city expenditures is for public education. It takes near-ly one-quarter of the whole revenue. Even now, there are 65,000 children either shut out of the schools or put in part-time classes, for lack of funds to build and equip schools. Do you think that the "reform" administration could or would increase the school appropriations while it was cutting down the

tons while it was cutting down the tax rate?
Renomber, it is YOUR children, the oblidren of the working claus, who are shut out of fite achools. The "respect-able citizens," as they call themselves, would prefer to send their children to private schools, and let yours grow up in temperature.

The passectors would do their duty, because they would be chosen, not from among the broken-down pen-ny politicians, but from the ranks of the working class itself—the class that has an interest in enforcing the law, as the capitalists have an interest in

breaking it. If you vote the S. D. P. into power, the rapid transit companies will be corrected to obey the ten-hour law, which they now violate openly. How? Let Mayor Hanford appoint on the detective force a few old-conductors and motorum—man who the someonies have discharged for trying to organize 4 union; let them get the evidence and bring it before n Strini Democratic judge. It is easy to balones the law, if you have a party in power that wants to enforce it.

If you vote the S. D. P. into power, the dark, foul, unante tenements that now exist in definee of law will be condemned and destroyed. In their places will be erected modern and fre-proof dwellings, to be let to workingmen at cost of care and maintenance They will be paid for out of taxes lev-led on the men who have grown rich from the rent-rolls of the old rocker-les. And no contractor will make a fortune on their erection, either; for they will be built by union labor—weil paid, eight-hour labor—under the direct supervision of officials appointed RIGHT FROM THE RANKS OF THE BUILDING TRADES,

THE SPOKEN WORD AND THE EDITORED WHEEL

The age of oratory is passing capidly away. In politics of all hisdes, as in all other phases of social life, the speaker counts for much less than bedid fifty years or, even twenty-five years ago. It is the printed, rather than, the spoken word that now influences great masses of mon. The brassu of this fact for me-in this rampaign as m our ordinary party work, is that, while we should by no means neglect the holding of public meetings, we should depend chiefly upon the distrijustion of insticte, the sale of books and pamphlets, and the circulation of the party prime to disseminate our principles and win supporters for our cause.

Judge Bockstaver, who fessed an ininnetion against the "Bun" strikers, is apperting Shenard. So is Judge Preedman, who issued an injunction against the speked-out cigarmakers. VOTE AS YOU STRIKE.

Voting Is Easier Than Striking and Will Accomplish More for the Good of the Working CERAS.

Workingmen often have to strike against capitalists - sometimes, for larger wages or a shorter workda, sometimes against a reduction of wages or a lengthening of the workday or intolerable "driving," sometimes against (yrannical rules and the abuse and insults of foremen and superintendents.

Workingmen show great herolem in these strikes. They recognize that the interest of one is the interest of all. go out to prevent injuntice to one of their number. That is admirable, More real courage and manly devotion to duty is shown in the average strike than in the average battle.

INCOME-TAX FIGURES.

English Returns Show Greet Inequality of Weelth-Conitalists Object to " inquisition into Private Affairs."

One of the objections most strongly urged against the income tax is that it would involve an impertinant inquisition into the citizens' private affairs," Perhaps this is the very airongest reaon why workingmen should favor an income tax under the present system-because it would bring to light the real facts of the distribution of wealth. Workingmen have nothing to concest n this matter. All his friends and ac qualitances know what wages he gets and he has no objection to their know ing. It is the capitalist who objects to letting the public know how great is his income and where he gets it; and he has good reason for objecting—just as good reason as any plain burglar or rofessional "enkl-belek man."

The fact that the income tax is in vogue in Britain brings to light some very instructive figures, which are pub lished in a recent issue of "Justice, the organ of the Social Democrati

All incomes of under \$750 a year are there, exempt. Out of a population of forty-four militons—about sine militon families—there are only 736,231 persons who have a yearly income large

enough to figure on the tax rolls.
Of those who pay an income tar,
DB1,051 are employees of some sort baving wages or salaries of over \$750 r year. The other 346,580 are capitalists landlords, manufacturers, mechants, bakers, etc.-having annual profits from other people's labor, rang ing from \$750 up to many utillions. There thus remains more than 8,000, 1980 fonds of families whose wages are below the very moderate exception-

Of the 380,651 who pay a tax on their salaries or wages, 142.239- more than one-third-bave incomes between \$750 and \$900 a pear; 10,000 more have be-tween \$900 and \$1,000 a year; more than \$6,000 between \$1,000 and \$1,500; and nearly 31,000 between \$1,500 and \$2,000. Only 40,000 persons, out of the whole wage-working class of the United Kingdom, receive salaries of more than \$2,000 a year,

These figures do not go very far to support the theories of those opponent of Socialism, who claim that wealth becoming more widely distributed. It is really a pity that we have not an income tax in this country, if only for the sake of getting at the facts and showing by official figures how un-equally the product of labor is distrib-

The once powerful middle claim is ray tily disappearing in the mill of com-petition. The struggle is now between the cantinint; glass and; the working class. The possession of the means of livelihood gives to the capitalists the coatrel of the government, the press, the pulpit, and the schools, and enables them to reduce the workingmen to a state of intellectual, physical and social inferfority, political subservience and virtual slavery.

The economic interests of the capt talist class dominate our entire social system; the lives of the working class are recklessly sacrificed for profit.wags are fomested between nations, indis-criminate slaughter is encouraged and the destruction of whole races is sancloned in order that the capitalists may extend their commercial dos abroad and enhance their supremacy

But the same economic causes which developed capitalism are leading to the claims, which will abolish both the upitallat class and the class of wage workers. And the active force in bringing about this new and higher or-der of society is the working class. All other classes, despite their apparent or actual conflicts, are alike interested in the upholding of the system of private ownership of the instruments of wealth production. The Democratic, Republican, the bourgeois public own-Republican, the lourgeous public own-ership parties, and all other parties which do not stand for the complete overthrow of the capitalist system of production, are allke political representatives of the capitalist class

party, distinct from and opposed to all parties formed by the propertied

While we declare that the development of economic conditions tends to the overthrow of the capitalist system. we recognize that the time and manner of the transition, to Socialism also de-pend upon the stage of development reached by the proletariat. We, therefore, consider it of the utmost imporance for the Socialist Party () support all active efforts of the working class to better its condition and to elect & cinitate to political offices, in order to facilitate the attainment of this end, As such means we advocate:

1. The public ownership of all means of iransportation and communication and all other public utilities, as well us of all industries controlled by mon opolles, trusts, find combines. No part of the revenue of such industries to be applied to the reduction of taxes or property of the capitalist class, but to be applied wholly to the increase of wages and shortening of the hours of later of the employees, to the improve ment of the service and diminishing

The second resolution covers an important question of trade-union policy. In spite of the old rule of "No politics in the unioh "-or, more properly speaking. Just on account of that mistakes rule—if is a notorious and unfortunite fact that a large part of the labor acgar-izations all over the land are rusued with corrupt capitalist politics, peyed nent union leaders being seduced by the professional politicians of the parties dominated by the employing chas and becoming mere passive tools of the worst energies of the labor movement. To put a stop to this lamentable condi-tion the Michigan Federation, besides recommending the study of politics by the leaders, as shown above, has adopted the following resolution:

This capitalist class is more tribution. This capitains class is more truly a ruling class than was ever any titled aristocracy or acaptered despot; with-all their powers these have had accidl responsibilities and have acknowledged public duties. But dominant capitains has no other law than its own private profit interests, and is absolutely without duty mergity as absolutely without duty, morality or mercy. Capitalish rule because they have the poyer to say to every worker in the land: "You shall not be pagmitted to work and produce year liv ing unless at the same time you pro-duce profits for us." They use this power more ruthlessly, treacherously, vulgariy' and murderously than, any vulgarly and murderously than any other ruling class that has ever de-spoiled, diagraced and degraded the human race. The black lexicon of in-fany contains no words which carry to the understanding mind any such horrors all and expressed by "divi-dunds" on stocks and "interest" on

HANFORD'S ADDRESS OF ACCEPTANCE

THE ROOT OF CORRUPTION.

Memeri. Low and Shepard protest against corruption in city politics, But while they denounce the evil fruits of the capitalist tree, they industriously the capitalist tree, they 'industriously water its roots, Neither the promises of the Republican and Democratic platforms, nor the protests of Messus. Low and Bicpard, are entitled to receive the slighest respect from workingmen. Both platforms are the work of capitalist parties. Both candidates are capitalists and agents of their class. If any man anspects that there is any element of honesty in capitalists, he has only to read a New York "Times" (Morgan's own phonograph and mega-(Morgan's own phonograph and mega-phone) editorial of Sept. 7, 1901, which declares that the personal property owned in New York is worth more than the real estate, and then points out that only 12 per cent, of that personn) property page taxes. That personal property is capitalist property, and such is the honor of our great capitains of industry, that 88 per cent. of them would rather perjure their most Christian souls than pay their taxes. And the New York "Journal" of March 21, 1900, declared that "among the whole fot of our high-minded business men there is not enough common honesty to fit out a reformed burghar." Honesty is impossible of coincidence with busi-ness success. The honest business insu iq a hankrupt business man. The blacking who welches is ruled off the track, nover to be reinstated. The business man who welches goes through the bankrupley court and is given a license to welch again. Seeing the business character in this its true light, only fools can be deceived by platforms put forth by business men's political parties. Whether these busi-ness mea be the thieres, thurs, and divekeepers of Tammany Hall, who are working for their own pockets ait of the time, or the high-minded, emi-nent and respectable gentlemen who

own our rallways and spin the roulette wheel in Wall Streat—all alike are but 1.1 per-cept, true and 88 per cent, false, Look at Tammany's platform of four years ago, which then as now, prom-led home rale in New York by Klug Creker, of Wantage, England; de-nounced trusts, and has been for and to every trust that would pay a price; declared for municipal ownership and control of all municipal francisies, and has turned over public franchises to private contractors and corporations whenever it has had the power; declared for adequate a hoot accommodation, and puts more than 50,000 children on

These abuses are not Demogratic OR Republican; they are Democratic AND Republican, and ALWAYS CAPITAL. Republican an Arva government of Philadelphia is as thoroughly corrupt as the Democratic government of New York. Effects common to both cities must have a common cause, and that common cause is to be found in capitalism.

I have no personal quarrel with Mesers. Low and Shepard so long as they stand before this community as capitalists. They are capitalists, and they have the same right to stand for capitalism that I have to stand for Se-cialism. But when they claim to stand for the interests of the working class. their own words brand them as liars and hypocrites. In the face of 30,000 children reduced to likif-time in our public schools, Tammany brazenly asks for a continuance of its public power. Had each of those children had one hand cut off by Hichard Croker it would have been no greater crime then hand of politicians who cut down half the school time of these children of the working class. Regarding the school mestion Mr. Low's Republican plat form in a lie on its face; it declares for MORE and better schools and LEES taxes. More schools will cost ore money, and cannot be had by relucing taxes.

But why consider further capitalist

promises? They can only deceive italist class and its political benchmen stand before the world to-day openly and avowedly the most monstrously wicked and merciless economic and no litten rulers that history records. Each year our steam rallways c unt their 2,000 killed and 85,000 wounded emplayees. We per cent, of them the vic-tims of overwork, under pay, and lack of safety appliances: victims of a sys-tem which makes capitalist dividends more important than the lives of work-ingmen. And in this city the fatalities and cripples of our capitalist industry would show a like record, but that capitalist agents with villainous industry keep them obscured. Nor-will Messrs Low or Shepard, should either b elected, do anything to save the lives and limbs of the working people in any natiface where it would reduce capi talist profits.

The sum of fainity and bentality for

which Mesers. Low and Shepard stand is written in that statute of the state of New York which makes suicide a crime, and they aid in the perpetuation of a society which produces pausers and would compel them to seek a po-litical pull to enter the poorhouse.

CLASS POLITICS.

sed to all this, the Social Demo eratic Party purposes that the government shall be adminatered by the Working Class and in the interest of the Working Class. We propose that the political powers shall be used to social property of the mesns to

of streets, and the Socialist proposes to extend that principle of public ownership to mike, nill, factory, and store. Of course, some of our little business

men are alarmed lest the Socialist lubia conquest of capitalism about injure them. I bid them fear not. Morgan is busy to-day with great capitalist cutes prises. But he will neither overlook nor neglect the middle class. Were this earth one selld ball of gold and all Mor gap's, this industrial Alexander would inger and sigh for more worlds to This one man has only to demand payment of his call loans stop half the wheels of industry in the United States. He may do it because his dinner disagrees with him; he may do it for fun, but he surely will do it sooner or later to make more money for himself by putting the small busi-ness man out of business and buying him in at shoriff's sale. With Morgan It is not a crose for wealth, for he has already more than he can throw away. It is mad lust for power. With him every added dollar is another soldier for a day. The small business men would do well to understand that in the chemistry of capitalism there is an such thing as bonesty, and in the crucible of competition there is no ele-ment of mercy. The Socialist tells the man in the middle class that his house is aftre and, advises him to insure by hastening the coming of Socialism be-fore the flames shall have destroyed

THE RULERS' FOLLY.

And this capitalist class? What would be 'the wise course to them? What noe to tell them? A ruling class at the height of its power becomes in-evitable a fool class, and goes mad on its own specess. Looking backward one can plainly see that Charles L. Louis XVL, were little other than suf-cides. It seems to be a wise provision of nature that tyrannies feed on their own venom and aid in their own de-struction. But an individual capitalist may due above his class. To such it will be plain that swift progress of the part of the organized Socialist and trade union movement gives the great-iest prunise of peaceful change. Let this ruling capitalist class deprive, Socialism of the hower to appeal to the ballot, let them succeed in destroying the trade union movement, and one fine day they will awake to find this comtry is the hands of a mol, who, not knowing justice, will have no other mo-tive than revenge, and who, though without benefit to themselves, will get what they go after. And all the his-tory of the world shows that a city full of soldiers and police either would not or could not prevent such a catastro

prophecy nor desire, but of knowledge, on the part of a man who area the passing show and knows what is to happen in a country where human beings starve and seven-course luncheons ara given to pet dogs. Capitalists who value their necks as well as their bonds and stocks would do well to think twice before they destroy trade un-lons, kidnap their officials, dismantic mills to best strikers, and import the at a temporary loss in order to defeat a labor organisation. Let Messra, Capitalists rise to power: it easily may be they ascend the scaffold; and the more rapid their ascent the quicker their fall, and the higher the greater. They lack 16 per cept, of being honest; they lie in their prayers and expect God is believe them. They have divorced law from equity, the church from religion, courts from justice, and the worker from the implements of labor; but while the world holds a wage-slave who aspires to freedom there will be no seenciliation between laborers and ikts read their cure destruction. every drop of blood drawn by the lash of chattel blavery there was another drawn by the sword. PUBLIC OWNERSKIP.

Edward M. Grout, fusion candidate for Controller of New York City, has views on public ownership that are cortaluly "childlike and bland," life be fleves in public ewacrship with several large sfrings to H, as might be expected of a wire-puller. When he says he believes in public ownership because it would "cave money for the people," he means that it would save money for the capitalists by reducing their taxes on ascount of the new source of reve nue to the city. He believes in publi ownership, but he thinks the wested rights of "impocent purchasers of pub-lic franchises" should be held sacred." For ways that are dark and for tricks that are vain" the empitalist candidate is peculiar,

The "innocent purchasers of public franchises" secured for almost nothing. by bribery and corruption, that which a corrupt legislature had no right to sell. They have already received in profits an amount many times greater than what they paid for the franchises. The working class has no share in these vested rights and there is no reson why it should respect the nefarious rested rights of the capitalists wh have stolen our public highways. Un-'der capitalist officials like Mr. Grout public ownership would be designed to make prefits and thus decrease the tuzes on the rick. The workingmen would still be exploited. Under a Secivilist working class administration we would have public ownership for the purpose of raising wages, lowering fares, and bettering the service, and the capitalist class would be taxed more unmercifully than ever.

Public ownership, of itself, would be of an handle to the workers unless inaugurated by a working class party with the avowed intention of counides ing nothing but the interests of the working class. Such a party is the 80cial Democratic Party and such is the unblic ownership which Socialists ad

FOR THE UNEMPLOYED.

In another column we print an artiele on the outrageous practises of the private employment agencies, comnumbrated to us out of the personal experience of one of the myriads who know what it is to "hunt for a job,"

The story is a simple one and a commen one. It does not need to be elaborsted. It does not call for much com It is the well known story of systematic fraud of the meanest kind, perpetrated upon the most wretched and defenseless portion of the people, and committed under the protection and with the anaction of the law us made by Kepublican majorities at Al bany and administered by Democratic officials of City Hall.

The public free employment bureaus established by the state as a concessful the demands of the organized working people are organized on so small a scale that they do almost nothing to mitigate this crying evil. The capitalist papers are jubilan ever the fact that the excess of our exports over our imports is constantly increasing. This simply means that the American workingman is doing the dirty work of the world for the profit of the American capitalist, and tha the wealth which the working class creates is being shipped out of the country because American workingmen, who need to use it, are too post

The paternalism of capitalism is complete and the only forms of individuality capitalism produces are bad ones.

Rishop Potter says the solution of the labor problem depends upon the working class understanding that their interests are identical with those of the men who pick their puckets, No doubt this ,"solution" would be very entistactory to the empitalists, but the Socialists have quite another solution in store for them.

The poor capitalists camot atford to build hig ships for trade unless they receive financial aid from the public treasury-but they can always afford to spend hundreds of thousands of dollars to build little yachts for a few days' racing.

ROBBING THE UNEMPLOYED.

Notes of a Workingman's Experience in Hunting a Job.

The Jumigraph's Bream of Ameri Justice and the Sad Awakening-Systematic Fraud on Poor Working man Boss Unrobuked, While "Re formers" How! Shout Vice.

There is hardly another situation There is airray mainter imation which, in regard to its misery, can be compared with that of the unemployed. Looking on the matter in this light. it is the more proveking that there are people presting through the misery of the unemployed, and some literally making their living by robbing these unfortunates of the last cents that may be left in their pockets.

One may think, I am speaking o highwaynien, or men of that soit.
Don't be slarmed, I am speaking of men doing legitimate business in com-fortable, open offices.

About ten years ago, when I first prey of the employment bureaus, ages rios, sad under whatever name may nivie themselves, I paid my dollars faithfully, attributing failure to my bad luck, never suspecting any thing wrong. It is easy pect anything wrong," and where? In this great country which seemed to me so much greater then. How equid such a suspicion enter the mind full of ad-miration, respect, and love for the democratic free institutions of this country.

It was absolutely impossible for me to reconcile the conception of the atrong republican government, protect ing the people so fully, as I then imag-ined, against all abuses, with the conception that such nice looking, poligentlemen spolite even to us green borns) having offices on such fin streets, could do anything but good to us, fools like me, unable to find work, where work is so plentiful,

I tell you that no such a cochicion ver crossed my mind. It would have object of so many enthusiastic discussions—dryams I should eay—of the young men on the other side of the great achievaments of the creaters o the American Republic, seeing the great model in its commitmion, always think of crookedness?

Many years have passed; I have learned many things; I have learned to know that even the most polite and most respectable looking goutlemen du most respectable booking gentlemen du most contemptible things, even in this land so eagerly sought by all liberty-loving people. I have learned a great lesson, is in true. But I still continue to contribute in the welfare of those gentlemen whom I now so despite

At this juncture I can bear my surprised reader call my persistence in supporting those intablishments; a foolish one; if so, rebuke is entirely undeserved.

There are thousands who are syntematically victimized by so-called em-pleyment offices. But fools are so plentiful nowadays, may say my sar-castio reader, and it would not be, very far from the trait, I admit. Let us, however, carry this little disputto its end. Since it became altogether a fuelish thing to apply for employ hat step jp, and take the licenses, away from them? Julius Granzig, for ineay years asdetant editor and dramatic the "New Yorker Volkstsitung," died the German Hospital at 4:30 p. m. lest Saturday, Oct. 12. He had suffer ed for some time from heart trouble and in August last he had an apoplect stroke from which he never renovered. It was at last decided that the only hope of saving his life, and that a very slight one, lay in a surgical operation. This was performed on Friday, and, as

was feared, falled of its purpose.

Julius Grannig was born of wealth;
parents in Berlin, March 31, 1855. At parents in serial, Marce 31, 1933. At an early age, and much against his father's: will, he became connected with the Socialist inovement. He was one of the first to suffer under the "Exception Laws," and already in 1878 his Socialist writings won him a sentence of three months' imprisonment from the Permain control flags. from the Prassian courts. Such experi-onces did not, however, discourage his enthusiasse for the cause. In 1860 be went to Paris, but return-

d to Berlin in 1882 to study economic and political science in the University. Continued conflicts with the police and with the university authorities, on account of his political convictions, de-cided him at last to emigrate to Amer-ica. He came to New York in 1893 and was at first editor of the theatrical pa per "Figure." In the following yea he joined the staff of the "Volkesse tung" and continued in this work till the end of his life; from July, 1890, to January, 1892, he acted as editor-is

Comrade Grunzig's ability as a jour natist, and sepecially as a dramatic critic, was universally admitted and his personal character was most highly teemed by those who knew him heat The funeral took place last Tuesday . FOR THE CAMPAIGN FUNG.

To All Comrades, Friends, and Sym-pathizers of the Socialist Movement in New York and Vicinity:

Our municipal campaign is under way. We have a strong ticket. The names of Hanford, Brewn, and Stabil ommand the respect of the workers Our platform appeals to the working class. What we now have to do is to nake a vigorous campaign for this plat form and ticket, so as to get an many otes as possible on Nevember 5 und

the Arm and Torch.

The Campaign Committee has al easily started on the publication of nearly a million places of campaign literature. It will arrange hundreds of nectings in halls and on the streets.

We'are to carry on war from now illi election day. In order to do that we need money and again money and more money. We need it now. Don't wait. Hush in your dimes, quarters, dollars fivers-and we shall not object if yo

ple of the absolutely unprincipled nature of capitalist journalist and politics will be afforded anyone who will take the trouble to turn ever the files of the New York "film" of the month of October, 1897, when Low first ran for Mayor of New York. At that Hime no epithet was too harsh for the "Sun" or the Republican party to apply to him. Now, through the ups and downs of boodle politics, the "Bun" and the Liepublicans are loudest in sounding his praises. Their first or timate of Low, when he was a political opponent, seems to have been the cor-rect one. We quote a few-choice ediorial opinions of the "Sun:"

"In the matter of platforms there is no material difference between Seth Low may accomplish will be for Tam-many's service."—Sun. Oct. 2, 1897. "For him (Low) to secret hostility to lammany Hall is pretense of the

fallerst kind."—Sun. Oct. 2, 1807.
"He (Low) tabooed the name of Tamman; for the reason that his agents had been cutering to the grown and Tammany following."—Suz., Oct. 8, "Low represents nothing but the illu-

sions of a handful of Mugwumps and his own ambition for a distinction to which his falents do not entitle him." -Sun, Oct. 4: 1997. "The length, to which a reputable man may be carried by the last for

public office has never been exhibited more strikingly than it is by the com-bination into which Mr. Low has al-lowed himself to drift."—Sun, Oct. 21,

"The ' selfish, disintegrating, un-American sentiment that emanates from the Low movement was exuded contonely in the extraordinary words of Mr. Low at his Brooklyn meeting of Thursday night."—Sun, Oct. 29, 1897.

"LOOK AT MR. LOW. "This non-partizan campaign of aleged superior political purity and deality in candidates will go down to history as the first to produce a candi-date for Mayor, whose weak campaign dresses, gave to himself a character,

not only of a weak wanderer from the path of public duty marked out by blusself, but the smirch of false smilabsolutely unverselous statements.
"Mr. Low and his party will, be put down perhaps first, upon a certain un-fragrant list of warnings to straightorward men and of examples for

avoldance by every rising generation." -Sup. Oct. 18, 1807 now Mr. Low, this same "false Pretender." this same "dangerous" and "suveracious" and "ambitious" man, is the caudidate for Mayor supported by the "Sun" and by Platt, who de-

WALT FOR THE WARDS.

The good old party wagons in which we must to ride.

must to ride.

must be seen and Democrat, must over be thrown adde:

They have too many treats absent and soon 'thought he a treat;

and automaty we're asking what wagon shall me take?

Then wat for the wagen. The horizintic wagen: -Wait for the wagen. And we'll all take a ride.

Note under far phitoconta alone but all can get inside:
We'll nor enoperation and theore competitions We're done with robber systems; we know, what we're about.

Then wait for the wagon, The Socialistic wagon; Wait for the wagon, And we'll all take a ride.

If you don't get in our wagon the trusts will get you serve.
But If you do yeal're ands enough, for we have got the cure.
The raly thing we'll do to them will be to take them in.
And own the trusts, not live on crusts and give the plates our th.

Then wair for the wagon, The Socialistic wagon; Wait for the wagon, And we'll all take a ride.

Fe'll find a job for Morgan and for Bosho folior, tuo.

For they must do some market work instead of sitemity you:

We'll change the social spirous the old way we have Iried.

After a general introduction the author takes up successively the subjects of edization, public health, he nutjects of estimation, public health, Is-bor laws, and regulations, provision for the unemployed, municipal ownershy, the housing of the people, city famores, funnicipal self-government, etc., show-ing what the Social Democratic Party proposes to do for the benefit of the

weaking class of New York City, if put in power by the votes of the working class. This valuable pamphlet (24 pages) is published by the Bortalist Literatus Campany, and is self at five cents a copy, pating it within the reach of every workingman who wishes to understand the municipal program of the meets Democratic Party, 'In order that subdivisions of the marty, educational stubs, and other organisations may be able to circulate it entensively, atili-lawez prices are offered for quantities: Ten copies will cost 25 cents; fifty cop-ses, \$1; one hundred copies, \$4.50.

Every Socialist organization in the city which is able to reach the German-speaking population should at once buy a hundred or a few hundred copies and push its eleculation. It will mean votes for our ticket in November.

VOTE OR BEG.

Workingmen of New York, according as you vote on the fifth of November will be your lot for the next two years. Cast your votes for Shepard or Low, and then for the two years sollowing cool your heels in the antechambers of the City Hall, waiting an apportunity to beg as a façor that which is yours in justice. Your song will be, "Please, Mr. Mayor, onforce this labor in't," "Flease, Mr. Mayor, do not allow the police to arrest our strike pickets," "Please, Mr. Mayor, the tenhour law relating to street railway em ployers is being violated." But begging never gets more than waste crumbs of number. New York capitalists will not Four years ago the criminal gauge have to hank around the City Hail begging interviews or favors from Low or Shepard. Both are champions of their class and will look out for their kind. In every dispute between labor-ers and capitalists, you workingmen will get their damed sanctimonious and hypocritical sympathy, but the boss will bet their help; they will WISH they could assist you, but they WILL assist your enemy; they will love you, but they will help the other

Look at the other side of the picture Suppose you elect the ticket of the So-cial Hemocratic Party—and you have the votes to do it, and plenty to spare. President Greatsinger, of the Brooklyn Rapid Transit; and his hind would be the ones to beg favors in the City Hall. And they would appeal to deaf ears. The discharge of mea for organizing their fellows of the street railways into labor unions would be met by placing them on the city detective force, and street railway officials would be too busy keeping themselves out of fail for actual violations of the law to devote their attention to the arrest of working men for alleged violations. The election of the ticket of the Social Democratic Party would reverse the present posttion of laborers and capitalists. It would mean that the master class would be put on the defensive. But whether that tie bet is or is not successful, every vote for it will benefit labor. The empitalist politician cares nothing for the votes that he has. It is the you If Benjamin Hanford is our next, and show the working class in the great of their election will be in proportion, not to the number of working-men who vote for either of them, but in proportion to the number who leave both their capitalist parties and vote

ATTACK ON LABOR PRESS.

The withdrawal of newspaper, mail \$ 96 and not known from the start that rates from two Sprintlet napers, the "Chailenge" of New York and the "Budecourrent" of Redlands, Cal., is followed up by a railing denying such privileges to all trade union papers that audited airy advastinements other than those directly pertaining to their own organisations.

This is a body-blow at trade unionism, dealt straight from the shoulder by the Republican national administration. J. P. Morgan and John D. Rocko feller could expinia its motive, if workingmen do not understand.

The order is a most infamous perrection of the law, made in direct an taxonism to the interests of Laber, and explainable only as being directly in the interest of union-smashing capitallets. The only way to parry such a blow is to east a straight Socialist bal

Value of Franchises Created by Growth of City's Life-Siven Away by False Public Servants-Enermous Annual Ransom Extorted by Legal Means-Social Democratic Party Alon Offers Relief.

The greatest source of public cor- ; the union of the Standard Off ring York especially is undoubtedly the pri vate dwneralip of franchises for street railways, lighting and beating plents, telephone systems, and similar public services. So long as these industries are left in private hands, it will be idle to protest against corruption in mun

cipal government. This is only our of the reasons who the Social Democratic Party demands public ownership of such industries as one of the necessary measures of immediate relief. Another reason is that the private ownership of franchises represent an enermous plunde of the public which is compelled to make use of the transportation and lighting systems and which gets very had and madequate service for its money. And the greatest reason of all is that public awaership upon Socialist lines would put su end to the shame ful exploitation and oppression prac-tised by the franchise companies upon

THREE GOOD REASONS.

In the interest of good government in the interest of the public service and especially in the interest of the overworked and underpaid employees, the Bocial Democratic Party declares the immediate municipalisation of all these so-called "nublic utilities." and pledges its capilidates to carry out such municipalization whenever the voters of the city shall give them now-

It is necessary to consider the pecul character of these industries and the enormous and increasing value of their frarchless before one will under-stand how fruitful a source of corrup tion they must everywhere, be,

The services they render are indis-New York could no more exist without her street railways, eas and electric plants, and telephone system than a human body could exist with out veins and arteries.

The nature of their operations is anch, requiring certain special privi-leges and powers (of using public streets, taking needful private propout-special authorization from the This special authorization is that is called a "franchise.

For this reason, and also on account of the great cost of countruction, the laws of competition do not apply to these industries as they do to other In general, there is and can be no rea free competition in such services Wherever separate systems do for a time partially compete, combination haveful or unlawful, is immediately of ected; and competition of any sort be omes more and more difficult as thi initistry becomes greater. The charac-ter of the service given and the price-charged is therefore almost arbitrarily fixed by the owners, except as certain onditions are imposed by the terms f the franchise or by law.

All must use these "public utilities" and the individual is absolutely help-less before their owners. We may sweer when we find "standing room only" in a street car or receive an ex-orbitant gas bill; but as individuals we can do nothing more than swear The company has us by the threat and only through woing the public power can we defend ourselves.

The wealth of any company in such interprises does not consist chiefly in the actual material equipment-in the tracks and ease of a street railway o tion given by the public, the franchise

As the city grows in extent and dention to the increased cost of operation The growing value of a franchise depends solely upon the growth of the population; it is a direct product of the lattice hours when working people city's life, and at all a product of these hours when working people have to go to said from their work. who hold the franchise.

In the large and growing value of franchises lies the great cause of corruption. A franchise in the sure source of ever increasing grofit to its, owners and the company which asks for a franchise is always willing to give lib ral bribes to the public officials who have the power to grant it in the first place and to coutling to pay liberally for protection as it grows more and more valuable.

SOURCE OF CORRUPTION.

There is not a city in the United States which has not had its "boodle" seandals, over and over again; and NINE TIMES OUT OF TEN THESE SCANDALS ARE CONNECTED WITH THE GRANTING OF FUS-LIC FRANCHISKS. No concetyable maledministration under a system public ownership, even without a "civ il service" rule, could dural the malign effects of private ownership. Not only do these great mehopolies regularly and systematically current individual officials; they regularly and systemati-cally corrupt political parties; their so-cret contributions to campaign funds are bribes given to the whole political are better given to the whose posterior machine as a body; and in giving em-plopment to inhorare and mechanics and elerits they who the name "spoils system" into prevails in capitaint pair-ties, using their "patronage" as a means of rewarding those who support the political parties that perfect them in their uncorned incomes.

The value of the transit and lighting franchises which have been given away by the successive aid-party administrations in New York is so vanith it almost surpasses comprehensive almost surpasses comprehensive almost surpasses comprehensive and the injustice they suffer in punished by instant discharge and blacklisting. THE ISSUE OF THE CAMPAIGN.

omnise only one insue in this or, in any political contest; Our party stands for the emancipation of. the working class and the only issue we know, the only impe worthy of the attention of the workingmen to whom "suppress" vice by penal laws. It has we appeal, is the issue of Labor against Capital, of Socialism against gree. And it does not really want to

All other issues which the capitalist parties may advance are either quarrels between different sections of the nounces as in the part of society master clean, in which the wage-work- which does not claim to be respectable. ers have no interest, or one they are questions which brise out of the system of wage slavery and class rule and which cannot be settled until wage alavery and class rule are done away

The question of corruption and extravagnace in public administration is an example of the first class. It is a estion upon which two sets of paraettes are opposed; but the working class has nothing to gain by the vic

This is the principal one of the false suce in the present municipal campaign in New York City. On the one hand is the gigantic army of Tammany office-holders, with their imagers-on of all sorts. These men profit by extravseemt and corrupt use of public funds. It is their interest to levy heavy taxes upon the property owners of the cityexcept those individuals or corporations that are willing to pay bribes in order to get out of paying faxes-and to spend the money so raised in such ways as will give the largest possible amount of "boodie"-high salaries, fees, fat contracts, and stealings-to the city officials and their friends.

On the other hand there are the prop erty owners of the city, the majority of whom are dit directly thterested in politics, and upon whom falls the bur den of taxation. It is their interest to have a "pure" and economical administration of public affairs, because that will mean lower taxes, and lower taxes means higher net profits for them in their private business.

Both of these sets of people, whose interests are opposed on this particular question, are parasites upon the working class-they are people who do no useful work and who, in one way or another, get a good living out of the product of labor. To speak more correctly, the capitalists are parasites upon the workers and the politicians are parasites upon the capitalists-"Big Sens have little Seas spot their backs to bite 'em.

"And these again have tesser ones, and

eo ad infinitum." The capitalists, owning the shops and factories, raffronds and other means of production with which the producers producers live, levy upon the workers a tribute of profit, interest, and rent. The politicians having control of the powers of government, levy upon the espitalists a tribute of taxation and of "necessomy and pure government" is empitalist parasites who bleed the workers and the politician parasites who bleed the capitalists. But just as the workers have nothing to gain by the victory of the corruptionists who blood the capitalists, so they have nothing to gain by the victory of the property owners who bleed the working class. The working people of New Tammedy has added to the yearly budget of the city; it is spent in increaned salaries for political hecters get no benefit if the taxes were to be reduced to the old rate; the inadjords would not reduce rents, the employer homes of labor: they would take fast all much as ever from the workers in the form of profit, interest, and rent, and would be the richer by the amount

The Tammany policy of corruptio and extravagance is good for the poll tician and had for the capitalists who are not in politics.

saved in taxation.

The "referm" policy of "econ and pure government" would be bad for the Tunniany besters and good for the capitalists who are not in politica. Neither policy is good for the work

The policy which would be good fo the working people is the policy of the Social Democratic Party-heavy taxe to be levied upon the capitalists and the city moneye to be spent for the service of the working class population -in schools, parks in the poorer quar ters of the city, the destruction of disonse-breeding firetrap tenements and the grection of medern areproof dwelllars in their stend, abolition of th contract system on all public works and shortening of hours and raising of wages for all mechanics and laborers ment of all laws for the protection of labor and of the public health, etc. That policy would be bad for the beelins and their friends; it would be bufor the capitalists; but it would be good for the working people-and that and Odell did, the Democratic nellst. is all the Sorial Dismocratic Party

We are hearing a great deal about | false touces in the "vice question." This is a question of real importance to the working people, but M is a question that cannot be settled until wage slavery and class rule are everthrown.

So-called "respectable" society has always made a pretense of trying to never succeeded in the alightest desucceed. Every one knows that "respectable" society is just as 'much given to the vicious practices it de-"Respectable" society drinks champagne instead of beer and employs acryants to take it home when it gets drunk, instead of falling into the gutter. Itespectable society keeps its barems in luxurious Harlem spartments, instead of visiting vulgar Allen street. That is the difference.

The "reformers" accuse Tammany of 'protecting" vice-the cheap, vulgar vice of the streets-and getting rich on blackmall. The accusation is true. But what do the "reformers" propose to

They admit that they do not expect to abolish prostitution. But they say they do not want it to be flaunted so openly as it now is. They want to persecute the women of the street, to drive their into hiding, to conceal the vice that exists, not so prevent it nor to renove Its cause:

And what is the cause of vice? What is it that has well-nigh destroyed the old healthy family life? What is it that perverts human feelings and cre ates a commercial demand for prostitutes? What is it that drives womy into a life of missey and shame? The answer is, It is capitalism which does this-expitalism, with its accompant ments of idle luxury, chilous contempt of rulers for workers, wretched pov erty, and uncertainty of employment.

Capitalism destroys the home by cutting down wages so that great nummurry, and so that those who, have families have to send their wives and children out to work in order to make

Capitalism perpetuates ignorance, both by refusing to build schools for the people, by making it necessary for children to work for a living even when there are schools, by compelling men and women to work so hard and so long that they have no lelaure or energy for reading and thinking.

Capitalism makes one class of people rich without work and educates them in the idea that they have st, right to gratify every whim. It makes another class so poor that dissipation is the only refuge from their sufferings.

Capitalism makes, it necessary for the daughters of the working class to rk and the tenements in which the leave the home and the school and exposes them to all the hardships and tempfations of the shop and factory. Then it makes their work so hard and their wages so small that they grow wild for anything to relieve the barren monotony of their lives. Then it throws them out of work and offers only a question of interest between the them, the alternative of pauperium, suicide, or prostitution. Then, if they choose this last alternative, it takes a percentage on their shame and sets policemen and Comptock sneaks to hound them to the grave. The owners of the world profit by all

the conditions, that drive women into prostitution and so long as we have a class of capitalists and a class of wage York City get ne benefit from the slaves, so long we will have prostitution with all the horrible suffering and degradation it implies.

The question of vice is a question, which cannot be settled-which, as and in jobs that give big profits to com Benjamin Hanford has said, cannot stand in" with the heal- rightly be considered, even-

which the capitalist parties want us vote-either questions in which the working class has no interest, such as the question of "economy," or ques lous which cannot be settled by capt talist methods, such as the "vice que tion." Upon such issues the working people cannot rightly or intelligently

Bitterly as Republicans and Den crate may fight over questions of taxe tion or over the distribution of public patronage, they are always united on the Labor Question whenever it come into politics.

The Social Democratic Party says that the powers of government oughs ing class alone. It nominates for public office men out of the ranks of the working class, tried in its battles and found true, and pledged to a platform drawn solely in the interest of the working chass-men who, when elected, will consider it their official duty to assist the workers in all their strugthe workers from capitalist imposi tions, to check capitalist oppression and restrict the exploitation of labor wherever possible, to hmellorate "the sufferings which capitalism inficts upon-the working class, and to prepare the way for the Co-operative Commonwealth, in which all shall be workers and none shall be exploited or op

BLACKMAIL ON LAW-BREAKERS.

The "Reformers" Show Us Only One Side of the Picture.

Tribute Paid by Lawless Corporations a Greater Evil Than "Protection" of Petty Griminals -- "Reformers" Do Not Discuss This, for a Very Good Bearing.

The "reformers" are making a great recurrent out of the systematic blackmail levied by the Tammany adminis-tration upon anionkeepers who violate the excise laws, upon gambling-house keepers, and upon disorderly women. No one has any doubt of the truth of their charges, and no decent man hesi-tates to condemn the criminal prac-

tices they have exp. sed.

But there is a worse form of official blackmail and of protection to law-breakers, a form far more corrupting and far more dangerous to the public interest than this—and the "reform-ers" have not a word to say about it.

No man is compelled to frequent sa-loons, gambling bouses, or disorderly, resorts unless he wishes to. But the majority of the people are compelled to work in shops and factories, to live in rented houses, to buy the food effer-ed for asle by the merchants, and to ride every day on the street cars. If we are subjected to discomforts and dangers to health and life in these matters-as we are, every day-and i the employers and landicrds and fran-chise companies who thus impose upon us do so in violation of law—as they do all the time-and if the public officials fail to enforce the law against these men-as they do and long have done both Republicans and Democrats-we have here a form of election to law-breakers far more injurious and injuri-ous to a far greater number of persons than the protection given to the petty. criminals of the slume. We have certain factory laws on the

statute books-law's restricting and regulating the employment of women and children, laws specifying certain sanitary conditions in shops and fac-tories and prescribing the use of certain devices to protect workmen from injury to life or limb.

It is the business of certain Republi-can state officials and certain Democratic city officials to enforce these laws. They are paid for enforcing them. But they do not do it.

It is more profitable for the employ-er to violate the law than to obey it. Children are cheaper than men. Safety appliances on dangerous machinery and proper lighting and ventilation in workshops cost money—and the lowe the expenses, the higher the profits. S the employer violates these laws and "squares himself" with the party in power by contributions to its, cam-paign fund-and by occasional bribes to ndividual officials.

We have certain laws in regard to the construction of tenement bouses They are very mild laws—not one tenth as vigorous as they ought to be But they are openly violated. The lamilords and building contractors laugh at the laws except just before election time, when the officials make a little show of enforcing them. One result of the violation of these laws is that a good many working people are intraced to death every year, because the houses are built of combustible materials, and have narrow, enoked halls and steep stairs and few or na fire-escapes. It is cheaper to build halls and steep stairs and few or no fire-escapes. It is cheaper to build houses that way. Another result is that a shocking proportion of the children of the working class die in infancy, and that consumption and other contagious and fatal discusses are spreading with alarming rapidity among the working people, because the rooms are too small and the windown and nif-shafts too few and fresh air and sunlight cannot get in.

It is cheaper to build houses that way. The contractors' profits and the landfords' net rentals are increased by the violation of these laws. Bo the contractors and landlords also con-tribute to the old-party campaign funds and bribe some of the officials

and the laws are forgotten. We have certain laws forbidding the We have certain laws ferbidding the asie of adulterated foods or of foods that are partly spoiled. But they are little rold, in suite of the law. Every little sold, in spite of the law. Every little while we read how milk is "doctored" with injurious compounds so that it will appear sweet when it is really unfit to drink, how half-spoiled most is chemically treated to conceal itsputridity, how prepared foods of all sorts are adulterated, often with actually poisonous ingredients.

These unwholesome or poleoubth foods are sold cheap. Common people have no means of testing the food they buy; to see whether it is pure or not. Thele wages are so, low and their needs so many that they have to buy the charpest goods they can get. So the working class by systematically It pays to poison the people-making

them pay for the goison. That is why merchants do it, in defiance of the inw. It is sometimes the small merchant that is to blame, but often a rich corporation. This terperation also con-tributes to campaign funds and bribes officials and the laws are forgotten. We have some laws-yvery mild ones, indeed—ostensibly designed for the protection of employees and passen-gers on the street rallways. The street railway companies find it cheaper to violate these lawe—to work their men beyond the legal limit, to the injury of their health and efficiency and to the and of public of the public to jan the passengers like sardines, instead of providing plenty of cars for them; to maintain dangerous grade crossings and dispense with fenders.

Republican and Democratic candidates are not auxitus to meet repre-sentatives of the Social Democratic Party. That has been abundantly Party. That ha proven this week. The Central Fe

The Central Federated Union, two weeks ago, voted to invite the three candidates for Mayor to address the delegates at the following meeting, Sunday, Oct. 27, and explain their re-spective positions in relation to the inerests of the working class.

When the time came, Mr. Low was not there, Mr Shepard was not there, Moth sent used worded letters expressing their extreme regret at no being able to accept the invitation of the C. F. U. and making the usual cam-paign promises to enforce the inva-

Benjamin Hanford, candidate of the Social Democratic Party, was there in person. Whether the other two feared to appear on the same platform with to invite comparison between themselves as capitalist "friends of labor" and a genuine workingman nominated by workingmen, and to expose their ignorance of the labor ques tion before a working class midlenes; or whether they were both inspired with such contempt for the desires of the working class as to think it not worth while to give one afternoon to explain their position before a body of dilegates representing nearly one hundred thousand wage workers of the city-whichever was the reason for their action, they did not gain anything by their refusal to appear in person.

The hall was crowded, at least five undred delegates and visitors being present. Hanford spoke as a working carn to his fellows, a candidate who and nothing to conceal from his constituency, no tricke to play, no double purposes to serve, but only a certain plain duty to do an the chosen representative of working-class interests

against the interests of the expiditors He spoke in his usual frank and un compromising manner, showing how the capitalist class lives at the expense workers; how it sets up falor sames to divide the votes of the working class between its two sets of po-litical instruments, the Republican and Democratic parties; how it violates all laws in order to increase its profits; how the working class is compelled to fight, the year round, to defend itself against 'capitalist aggressions. He pointed out that the Democratic party has nominated Shepard broken every promise it made to the working class in the last city cam taim, and that the Republican party which has nominated Low, has at all times and places been at one with the nocrata in allowing labor laws to he violated, using police and utility against trade unions, and in every way using the powers of government to help the capitalists against the work-

Hanford made no appeal for perso al support. He called upon the wori ingues to vote the Social Democrati ticket only if they really wanted to have the city adminstered for the honeat of their class, regardless of the de-sires of landlords, factory awners and street railway corporations.

He was fistened to with close attention and frequent applause greeted his declaration of the purposes of the S. D. P. If anything can be inferred from the enthusiasm of the audience, both Low and Shepard will have reason to regret their failure to honor the lavi-

About two weeks ago Morris Hillquit, our candidate for Assembly, is-sued a challenge to William H. Burnes and Max Brown, the Democratic and Republican candidates, to meet hin: in debute at American Star Hall, last Fuerday evening. The challenge was lelivered to both of these gentlemen personally and was widely published in

The meeting was held, and many dutes. But neither Mr. Burnes nor Mr. Brown had the courage to appear or the grace to send an apology.

Comrade Hillquit spoke, arraigning the two old parties for their utter neg-lect of the interests of the wage work-ers of the district and of the city and ers of the district and of the city and country at large, and setting forth the position of the Borial Democratic Party as standing for government by and for the working class alone. Dr. Julius-Halpern, our candidate for Al-derman, presided and spoke briefly, as did also Algernon Lee. A great overfor w meeting on the neighboring cor-ner was addressed by Jacob Panken, candidate for Assembly in the Eighth, B. Feigenbaum, Havidon, and Lee.

The size of the andiences in the East Side districts, especially the Fourth and Bighth, and the respectful atten-tion always given to our speakers, seem to promite an unwinnpied in-crease in the Social Democratic vote

Voters in New York, put nothing on your bullot but a cross in the circle under the Arm and Torch. Any mark except those prescribed by law will give the officers a pretext for throwing your ballot out. If you try to "split" or "scratch" your ticket, you increase the chances of spoiling it. You have plenty of time in the booth to find the right ticket, mark in the cross, and fold the bullot. Don't take any chances on split tickets:

WHY THEY DODGE.

The Jersey City "Advertiser and Engle" says that "if the platform of the Socialist Party held the guarantee of public confidence its nominees would certain of election." That they deserve public confidence it virtually admits when it says, speaking of the challenges issued by Charles H. Vall, our candidate for Governor, and Frederick Krafft, candidate for Mayor of Jersey City, inviting their opponents to meet them in debate: "The challenges sent out by these nominees are ignored by the others FOR PEAR OF THE OP-PORTUNITY SUCH DEBATES AF-FORD TO SPREAD THE SOCIALIST DOUTRINE."

The Republicans and Democrats are indeed wise to dodge and speak rather than try to meet Socialists with argument. They do the same in New York and elsewhere, because they know that a fair argument would "spread the Rocialist doctrine."

Mr. Morgan's Bishop Potter says that is has not made any such "grotesque demand", as the complete suppression of vice. Of course he hasn't, for the complete suppression of rice depends upon the total abolition of poverty and to abolish powerty would interfere with the "business interests" of those who are the pillars of Bishop Potter's church. Bishop Potter is doing some remarkable things in his effort to play the double rôle of the Man of Morgan and the Man of God.

The New York "Sun" of Oct. 25 announced that a large faction of the Bocialists would endorse the candidacy of Justice Jerome at a meeting to be held that evening at Avenue C and Fifth strict. The meeting mentioned was a regular Seth Low meeting in which no Socialist took part and at which nothing occurred- but the customary attempt of the fusionists to boodwink the public and get the vote of the work ing class. "THE LAW'S DELAY."

It is now nearly eleven months since the capitalists of the Tarrant Drug | bad men in politics. It is parties, not Company, by their criminal negligence and violation of law, in their desire to save a little expense and make larger prefits for themselves, became respon sible for the death of several workingmen and working firls, through the ex ploston and fire in their factory. Cardiner, a Tammany hosalium in good deter some other Tammany official clother, was then District Attorney. from repeating Van Wach's crime. It Phillin, reported to be a "reformer" of was not. He did not do it. sympathy with him, to belp him in his His successor, Odell, has not done it And as for the courts, the case has had postponement after portponement, delay after delay, and there is no hope that Van Wyck will over be brought to

When a workingman is arrested for contempt of court, for "conspiracy," for picketing, for maying "scat," it never takes a Republican or Democentic district attorney ten months to being him before the judge; it never takes the courts a year to get around to sentence him.

Why this difference? An easy question. The district attorneys and the judges are the admissors of the capital int cians, and they are true to their BRIGHTENTER.

Put Henry L. Slobodia in the place of Philbin, put Boudin, Malkiel, Bauer, and Dressler in the places of Lawrence. () Brien, Blanchard, and Clarke on the Supercase Court-thon you will have capitalist criminals presecuted as vigorously as penalicus workingmen now are, and labor laws will be sustained instead of being declared "unconstitutional."

If our capitalists really had any refor private profit, to which the capital- gard for law or expected to be centron- I equally impossible; the party knows its

If confidence-man siller goes to jail, the Wall Street crowd, to be consistent, ought to be sent to keep him company. Some day the inflated confidence game of capitalism will collapse, just as the Franklin Syndicate collapsed.

DEATH PENALTY FOR STRIKES.

One of Seth Low's most faithful sup porters is the "Evening Post"-a scab paper, by the way. Commenting on the proposed miners' strike in France last week, the "Post" said:

"The action of the government yes torday in warning each member of the Miners' Committee that HE WOULD HE LIARLE TO DEATH FOR IN-CITING CIVIL WAR IN CARE THE STRIKE SHOULD OOCUR, is as comageons as it is unprecedented. If such a prophylactic measure could some m propayarctic measure could some-times have been employed IN THE UNITED STATES, some disgraceful scenes during the past twelve-month night have been averted."

A United States judge out in Wisconsin said hast week that interference with scabs in time of strike ought to be punished AS TREASON.

That is what we are coming to, fcilow workingmen-not fine and impriscament only, but the gallows, for strikers-unless you checkmate such plans by your political action.

Every vote cast for Socialism next Tuesday will help to frighten the candtalists who are thus conspiring against your liberties. The Boriniist candidates stand for Labor in all its battles, just as the Republican and Democratic politirings stand for Capital. Vot rigit this time and your strikes will have a better chance of auccess all through the coming year.

American capital is steadily flowing into Mexico, and the organization of new companies formed to "operate" Mexican mines is frequently reported. This means that idle capitalists in New York who have never seen the mines they own, who have never been in Mexico, will draw enormens profits from the life-shattering labor of thousauds of wage-slaves buried in the pit of a Mexican mine, which the American espitable has bought with the money made for him by his American workingmen; and the wage-slaves of the Maxican mines will-be expected to thank the dear good American capitalists for providing them with killing work at starvation wages.

Mr. American Workingman, don't. think this Mexican business is nothing to you-for by just this same system of enpitalism the Rothschilds and other European capitalists, without ever seeing the American properties they own, without ever attending the directorn' meetings of the American companies in which they own stocks, continue to draw fortunes from the labor of their American wage-slaves. Capitalism "works in mysterious ways, its wonders to perform."

VOTING "STRAIGHT.".

Anyone who thinks he votes wisely when he splits his ticket and votes for a "good man" here and scratches a "had man" there makes a serious mistake. There are no good men and no men, that count. Good parties nominate good men, and had parties nominate had men. The party-controls the man even more completely after he is in office than before

To scratch Van Wyck and vote the rest of the Tablmany ticket will not ven months neither tiardiner was Tammany Hall, Tammany Hall for Hanford—or for the Socialist canhas assumed the real inating Van Wyck for the Supreme Court.

If you are disgusted with the proven deplicity of both Low and Shepard, it will not do much good to scratch them If Hanford is a good man for Mayor. be should have a controller and aldermen and judges and other officials is

The Seventeenth Ward of Rochester will probably elect Frank A. Siever man as Alderman. That will be a good thing. Even though alone in the City Council, he will do good service to the working class. But he does not want to be elected by a "personal" vote. He rants every man who votes for him to vote also for Gad Martindale for Mayor and all his other colleagues on the ticket. Then he will know-and the capitalists will know it, too-that he actually represents the honest though and feeling of the working people of his ward, and that will double his use-

The same thing is true everywhere it is the party that counts. It is the straight vote that counts. Vote for the right party and vote it straight. Yas Wyck can be no spore corrupt thus Tammany Hall, Low can be no more hypocritical than the Republican party Hanford can be no better than the Se cial Democratic Party. good party chooses men it can trust.

We want votes for Socialism, no

The mest foolish reason anyone can give for not voting for Becialism is that he is afraid the Socialist ticket is not going to be elected this time, and he does not want to "throw his vote

The idea geems to lie that the ballot is given us, not in order that we may express our principles or our desires, but that we may have a chauce to join in a parada, after election and throw our hats in the air and boast that we were on the winning side.

If this is the correct view, the only sensible thing would be for us all to toln in one party, so that none of the should throw our votes away. In the New York city election of 1807, according to this idea, the great majority of the non-Socialists threw their votes away--150,000 on Low, 100,000 on Trucy, and 20,000 on theorge. In last fall's national election, according to this idea, the 6,000,000 or more men who voted for Bryan throw their votes away just as badly as the hundred bousand Socialists who voted for Debs. In fact, about a half of all the citizens throw their votes away every year, if the votes cast for candidates who, as it finally appears, had 'no chance of election are votes thrown

But this is an utterly faine and foolinh view. The object of voting is not to be with the winning party, but to make the right party win. THE ONLY VOTE THAT IS REALLY THROWN that they cannot be honest and cannot away is the vote that is desire bonest government.

Elect either Mr. Low or Mr 'Shepard' this fall by a unanimous vote, and be would feel entirely independent of the people through his whole term of office But cast a large vote for Hauford, even though you do not elect him-crust a vote that proves the steady growth of a determined opposition to capitalist rule-than, whichever capitalist candidate may with he will remember and fear and respect all those Hauford rotes; he will be afraid they may be doubled next time; he will try to bon dues bimself he as to give the least noselble offense to the working class.

That is why it is worth while to vote didate in any other city or state-even though you do not expect him to be elected. But, indeed, there is no reason why the Socialist candidates should not be elected this full-no reason except the stupidity and cowardice of a great-part of the voters. The working ciass is the majority. Numbers count on election day. The Socialist candidates represent the working class, while the other candidates do not even pretend to represent it. If the working class chooses, it can at once put an end to injunctions against unions, the use of police and militia against strikes and all the other iniquities of Republican and Domocratic rule, by putting its own party in power.

And YOU-every individual voterby making up your mind NOW to von right, regardies of what others may do, and by openly expressing your intention to cast your vote for Socialism, may be ours, not only, of adding one vote to the right side, but of influencing others, of encouraging the timid and awakening the spathetic to follow the same course. Last fall we had 167 votes for Debs and Harriman. This is a gain of 25 per cent—and the Social-ists of Indianapolis prepose to gain a still larger percentage on this new record at the next election.

BY COURTENAY LEMON.

ownership of land, machinery, facto-ries, mines, railroads, and other means of producing wealth, the working class does not get the wealth it creates because the things the working class must-work with are in the hands of capitalists. The capitalists give back to the workers as wages a small part of the wealth which the workers create—the rest remains in the hands of the capitalists as profits. The capitalists receive profits without 'working' because they own the means of life and will give the workers access to the tools of production only on condition that they work for wages, the value of which is much less than that which they produce, and leave the product of their labor in the hands of the capi-

The result of this condition is that there is a constant struggle between the workers and the capitalists for the product of labor. The capitalist tries to force wages down; if he ever pays high wages it is because he thinks a well-paid worker will profince more it proportion or because he is forced to do so by the organization of the work-ers. The working class struction to get more of the product of their labor as wages and the capitalist class trice to retain it as profits. struggle can be seen in every strike called the "class struggle. cialists therefore call upon all working men to realize that their interests a opposed to the interests of the capital-lat-class. When a workingular recog-nizes this fact he is said to be "classrofiscious," that is he has become clous of the interests of his own class as opposed to the capitalist class. The action of Socialists in regard to

any political or industrial problem i always determined from the standpole of the class struggle. The class strug gle is the c mpass which should direct the movements of the working class. He the light of the class struggle ight road for the working class to take through the lativiniths of any given situation may be found. Whatever is to the interests of the working class and consequently whatever is opposed to the interest of the capitalist class, it what class-conscious Socialists will al ways advocate. The capitalist class retains.

supremacy and maintains the capital ist system by ruling politically, which it is cantiled to do through its economic ower, and because the workers ar ot all aufficiently claim-conscious t realise the necessity of combining po-literally as a class. The platform of Socialism is everywhere and at all sociation in every more than the same-for the working class to combine politically to overthrow the empiralist class, and bring about the rommon ownership of capital by the people so that all will receive the full product of their labor.

But before this program can be car-ried out there will be many local con-tests to go through. Before Socialism arries the nation it must carry many cities. There is every reason why, the working class should take a very active part in municipal politics. then should be the attitude of Social-ists toward numicipal problems? What would Socialists do if they won in this

The answer is determined by the fact of the class struggle, here as everythe same old struggle between the Winterer, will enable the working class to get back directly or indirectly a larger share of its product: its atrustic against the capitalist class; whatever will have the way for the prerthraw of capitalism and the final ciration of labor-will be what emancipation of misor municipal gov-ernment. And it is with these ends in view and from the standpoint of the class atrusple that the Socialist "imme-diate detrands" are made. When numerical issues are taken up, one by one, they are all found to spring from the one issue—the one issue—the struggle between the classes for the product of labor.

TAXATION.

Almost every problem of municipal government depends in some degree birut affairs binge upon taxation, so our attitude towards taxation binges upon the class struggle. It is often aserted that the working class pays the taxes-not directly, but that they pay them in reat and in the price of com-modifies. This statement is a cieve deception, a sophistry worthy of thos whose business it is to decrive and mis lead the workers. In one sense, indeed, the working class does pay the taxes; it pays them just as it pays the bills or the centralists and the dividends their stocks. That is, taxes, like every-thing else, are paid out of the product of labor, but they are, in the end, paid or more, our may are, in the code paid out of that part of the product of labor which goes to the capitallists. Coured-ing that low taxes ground mean re-duced rest and low prices—which under the present conditions of monop is not at all likely-the working class would not be benefited by them. If lov taxes reduced rent and prices the would also reduce wages. Wages are in general, determined by the cost of living. A workingman is paid just what it will cost him to live. He must what it will cost him to live. He must accept these vages on account of the competition for john. If he refuses a job at wages only sufficient to cover the cost of living, it will be gladly, talons by some other member of the army of the unemployed who have been thrown out of work by the introduction, of machinery and the consell-dation of industries into trusts. That dution of industries late treats. the tendency of wages is siways to go down to the mere cost of living is wit-nessed by the common phrase "to make a living." A reduction in the make h Rving." A reduction in the average cost of living is of no benefit to the working class. If the cost of living is lowered, wages, being de-termined by the cost of living, will also be lowered in propertion. Chongasses of living may temporarily benefit the workers until wages have been adjusted in accordance with the new conditions but in the end they conditions, but in the end they |

Under our present system of private | Under present conditions al reduction in taxes would not mean a reduction in rents and prices, because rents and prices are now mainly controlled by monopolies, and not being subject to competition are determined by the extreme limit of what the public can be made to pay. As an illustration take the famous statement of a railroad magnate that his company would charge "all that the traffic could bear." And, at any rate, a reduction in rents and prices would be followed by a reduction in wages. Low taxes, therefore, cannot be of any possible benefit to workingmen, as they would get no larger share of the product of their in-

SCHOOLS, PUBLIC IMPROVEMENTS. ETC.

On the other hand a great man nunicipal institutions which are useful and necessary to the working class, such as sobools, parity, and general public improvements, are supported by taxation. Under a working class administration the revenue from taxes could be used for purposes even more beneficial to the working claim, such as the starting of public works for the unemployed, the operation of "public-utilities" for the benefit of the public-not for profit, and the feeding of school children whose parents could not af-ford to support them while in school. A working class administration by taxing the capitalist class and using the money thus obtained to the benefit of the working class would thus be indirectly getting back for labor a larger share of its product. This demonstrates that a Socialist municipal administra-tion would be able to do very effective work on the lines of the class struggle. A Socialist municipal administration would be as revolutionary in principle and as class-conscious in its immediate action as would a Socialist national administration. The former would of course be restricted in its operation, out by returning to the workers a inrger share of their product, both through taxation and through other nethods to be considered later, it would bring us that much Bearer to the sudition which it would be the husi-ess of a Socialist national administraion to bring about, namely, a coudition where each would receive the full product of his labor, in a co-operative mmen wealth.

The Republican and Democratic parboth allow the capitalists to escape helr fust taxes under the law, and con inually promise low taxes. The So-talist Party, wherever in local power, would tax the capitalists unimercifully and use the revenues for the benefit of the working class.

STRIKES, LABOR LEGISLATION, EVG.

The direct connection with the class truggle of the numicipality's attitud towards strikes and the enforcement of labor laws is much more apparent than is that of the taxation problem. It is obvious that the atti-tude of the city government in regard to strikes and labor igws is now determined by the interests of the espitalist class. Injunctions are issued against strikers, the police power is used against them; scales are protected and encouraged, and labor laws are not enforced. The class rule of the capitalis enforced through the Republican or where, All nuplelial lasues will be the Democratic party. A Socialist found to binge uphn, or arise from the same old struggle between the ly reverse this state of affairs, and his class rule would be for the benoît of the working class, the useful class in society. Socialist officials would bely whatever will better the condition of the their fellow-workingmen wherever poscorking class and thus strengthen it in sible in their strikes, would keep out scales, and would stringently enforce every law against the capitalists. So-cinitat judges, with the power of inter-preting the constitution, would render all labor laws constitutional and better injunctions against the operations of the empiralists, instead of against the trade unions, as at present. The result would be that strikes for higher wages

PUBLIC OWNERSHIP

If the Republican or Democratic party should be forced to bring about public ownership of street railways etc., by popular clamor or the pressure of the middle class, such public owner-ship would be of no besent to the working class, a capitalist administration would operate the atreet railways for profits by continuing to exploit the employees and would use the profits to decrease the taxes of the capitalists. l'ublic ownership and operation of municipal franchises would not benefit by a working class party with nothing but the interests of the working class in view. A Socialist working class administration would bring about public ownership for the purpose of raising wages of amployees, abortening hours of labor, reducing fares and bettering the sexute. The working class would thus receive a larger share of the product of their labor.

PUBLIC WORKS, FOR

. THE UNEMPLOYED. A Borislist municipal administration would mart public works to employ the unemployed. It would raise the capital to do this by using the taxing power. Einployees on public works would receive high wages for short hours of labor. The result would be that indi-vidual capitalists or private corpora tions would have to raise wages could profer to work for the city. The sorking class, would thus receive a arger share of the product of their Labor.

EBUCATION, HOUSING, ETC. It has already been pointed out that

would insure the education of the child-ren of the working class by providing emaigh who ols and by freeding school children whose parents were just of a children whose parents were just of a catenaive entalogue of Sociathit other books, which it is desirable achool. This is now done in the So chilist minicipalities of France. In all 20 civats for tax copies. 65 cents for a fundred, and \$14.00 for a thousand—in order to assure it a

by refusing to tax the capitalists suffi clefitly to provide enough schools and by permitting industrial conditions to exist under watch children are com-pelled to work for a living. In the faare the capitalist politicians may try to disfranchise large numbers of the which they are the cause.

By induring the education of the hildren, by building good Babitations o he let at cost to the people, and by ettering the conditions of the working class by raising wages, a Socialist municipal administration would edu-cate and strengthen the working class and thus prepare it for its national struggle against empiralism, and enable it, to be able to bring in the co-operative commonwealth in which the work ing class will get the full product of

PAUSE ISSUES.

The Republican, Democratic and "reform" parties raise a number of false temper in city politics—feates which are These issues are of three kinds.

Firstly, there are certain evils such

as vice, corruption, .etc., which are periodically made onupaign issues. These evils are all the results of capitalism; they spring from had industrial conditions. The flerce struggle for existence under capitalism is what drives men to crime and corruption and women to prostitution. These evils, being the effects of had industrial con

ditions, can only be removed by femor-ing their cause, which is capitalism. Secondly, the issue is raised that nuntcipal politics should be separated partisan. This is a false cry, because all local cylis and wrongs arise from the national evil of capitalism-the privote ownership of the means of production. Non-partisonship, the election of "good" men, is a falliery of the worst kind. Men are the instruments of the class that is behind them, and gives them power." The interests of the working class can only be served by a political party of the working class, electing men from the ranks of the working class to office. For such par one the Social Democratic Party is in

Thirdly, the propertied classes raise the issue of "economy" which some-times means the reduction of taxes and ometimes stands for the prevention of "boodle" and stealing by the corrupt politicians in office. In the latter case it is a fight between the capitalists and their hirelings, the polkicians—the poli ticians in office are bleeding the capi talists too severely for their services, and the capitalists want a new set who will sell their favors more cheaply Then again the interests of the small cupitalists (the middle class) against the interests of the large capitalists sometimes serve as the issue of the campaign. All these leaves are simply the struggles of the different sections of the parasite capitalist class against each other. These issues, are of no consequence to the working class and they would derive no benefit from the supremacy of either faction.

THE ONE REAL ISSUE.

The one real bane for the working rlass in any and all election receive sclarger share of the product of their labor, for which they have to struggle against the capitalist class is to bring about the common ownship of mills, mines, factories, ratiroads, had and all the means of pro-ducing wealth, so that all will receive the full fruit of their labor, 4But white working for that, the working class by feetively, and, guided atways by the principles of the class struggle. themselves in the position for that vic-tory. When Socialist administrations are elected in the large cities of our country, in a very short time the ma-tion will be carried for Socialism.

The platform of the Socialist Party,

therefore, in municipal campaigns, is the same as it is in all other contests, at all times and all places -namely, the interests of the working class against the interests of the empiralist class, and the one laune an administration by and bor may come into its own and social funtion the outstill shed.

SOME REFLECTIONS ON THE PRESENT CAMPAIGN.

BY LEONARD D. ABBOTT.

The real difference between Tam-many and Republicanism is this: Tam-applying business methods to politics? many stands for a kind of scoundrel-ism that is not "respectable," and that has to be carried on underground. It is a scound-elism that includes rank est political corruption and spoils lift ed from dives and saloons. Republi canism, on the other hand, stands for a kind of scoundrelian that is perfectly respectable, but no loss execuable. It is the scoundrelian of an industrial system based bu pitiless robbery and oppression, the scoundrelism of capitalist greed pursuing its ends amid and fering and poverty at home and amid blood and tears abroad,

The Socialis', varenties that the two old parties are simply the two sides of the same sheek-Tweedledom and Tweedledge-has reldom been strikingly exemplified than in the pres-ent campaign. In their general phil-osophy of life, their avowed principles and ideals iff they can be said to have any ideals at all), the two candidates, Low and Shepand, are almost ideatical. With one a wealthy college president and the other a corporation lawyer what more do you want? The humorous part of the situation is that, at though we are solemnly assured by both parties to the controversy that if the opposing candidate is elected the city will go to the dogs, yet the two men are so much alike that for a long tim Shepard was considered the most likely standard-bearer of, the "Reform" forces. And Color, as was so widely ad vertised, coaly dallied with both nomi nations for weeks. Nor does it require very much imagination to put how a the head of the Tammany ticket. Why not have one great Demo-Republican party and be done with it?

We are told that if Low is elected w shall have municipal "homesty," which is doubtless a very desirable thing. Judging from past experience, how-ever, those who expect to see the fulfil-ment of this prophecy are destined to be grievonaly disappointed. How is it pesable to establish an ossis of politi-cal honesty in the midst of a commer-cial system which is permeated through and through with dishonesty?

The convention was held in a large verbat store room, furnished by a local indge of the Kuights of Pythias. The delegates were cordinly received by the people, and were shown many cour-testes, proving that the Citizens' Allinnes represented nothing but the ig-norance and bigotry of its nemters. IN THE THIRTIETH:

Letter of Asseptance of Algernon Los, Social Democratic Candidate for Assembly in the 30th A. D.

To the Social Demogratic Party of the Thirtieth Assembly District, New York.

Pellow Workingmen:-it is with pleasure that I have accepted your nomination for the office of Assembly-man from the flith A. D., because I know no higher honor than to be chosen as a fit representative of the political movement of the working riam in this, its time of struggle and

my position to the workingmen voters of the district. In accepting your monit nation I accept fully the principles and purposes of the Social Democrafic Party as laid down in its national, state, and city platforms. As your can-didate and, if elected, as your repre-sentative in the Assembly, I shall con sentgive in the Assembly, I same consider myself as the sevent of the working class of the district, chosen in serve their interests abone, and responsible to them slone.

No workingman can afford to shut his eyes to the fact that he belongs to a different class from his employer and his landlord and that his interests are opposed to theirs. The interests of the class which produces all wealth and lives in poverty and the interests of the class which were all wealth while the class which owns all wealth while it is divinces nothing cannot be secon-cited. So long as one class owns the means of production which the other class creates and operates, so long there must be arrogant tyramy and corrupting luxury on one side, degrad-ing poverty and suffering on the other.

This conflict of the classes, this La-bur Question, is concutally a political question. The capitalists never headtate to use the political power to easily to aid one husbands and brothers, for their purposes against the working class. The workingmen must unite to take possession of the political-nower and goe it to resist the attacks of the capitalisis and put an emi to capitalist rule. This is what the Social Demo-eratic Party is in the field for, Socialiam offers the only hope of freedom and justice to the tolling majority of humanity, because Socialism means the ownership of the tools of production by those who make and not then -neate work for all and to each the full fruit of his labor. It is only by the votes of the working class that Socialism can be put into effect.

Until Socialism is established, the working class will have to fight with all the means in its power, day by day and year by year, against capitalist ag-gression. Strikes and boycotts, lockouts and blacklisting will be fiercer is the future than in the past. In order to make our strikes and boycotts successful, in order to defeat the lacksouts and blacklists of our enemies,we must have representatives of the working class, elected by workingment's votes, on a labor platform. In legislative halls and executive chambers and on the bench, In city hall and state-house and nation al capitol. It is for this that the Hos cial Democratic Party duists.

The workingmen of the Thirtieth As-sembly District, who form the majors by of its population, have seed to bear this thought in mind on November 5. this thought in mind on November 5. To have altisraism who will pass ordinances for the protection of the working class against the greed of factory owners, contractors, street railway corporations and landlords; to have assemblymen who will fight for labor laws that cannot be evaded; to have judges who will not lesso injunctions against strikers and who will find labor have constitutional every time; to have a minor who will use the police, not to arrest pickets and "protect" scale, but to execute the law in the interact of the producers—every vote cast for that purpose this fall will help us to win

our strikes and enforce our union regulations against the bossel.

With BENJAMIN HANFORD and MORRIS BROWN and HENRY STAHL at the head of the Social Demoratic ticket, these can be no doubt veratic ticket, there can be no doubt that the Social Democratic Party means every word that it says. In APOLPH GROEHLINGER, the So-cial Democratic candidate for Alder-man, the workingmen of this district have reason to put equal confidence. For myself, I can only thank you for the honor of being made the colleague of such candidates and pledge my in fention of deserving the honor. With the carnest hope that the vote of the Thirtieth Assembly District under the Arm and Torch may be such as to carry warning to the capitalists and encouragement to the working class throughout the city. WHERE THE FURBS COME FROM.

The treasurer of the Citizens' Union stated, the other day, that the organiza-tion needed \$100,000 to carry on its share of the "reform" campaign and that of the \$25,000 so far raised, \$22,000 had been contributed by four men and the other \$3,000 came in sums of from \$3 to \$500. It is very evident what class the Citizens' Fulon fund comes from—the same class that contributes to both the old machines. Most of the capitalist anti-Tammany contributions go, of course, to the Republican organization which is in league with the City-

sens' Union.

Compare this "reform" fund with that of the Social liemocratic Party and you will have an explanation of the difference between the parties. Our total campaign fund will probably not reach campaign into with probability as the \$2,000. But that sum will represent the free contributions—often at considerable personal sacrifice—off hundreds of overly-raid workingmen. No capitalist has offered us \$7,000 (the amount of the largest check in the Citizens' Union list) as even \$500, and we have not so-ficited money, as the Citizens' Union is doing "from business firms"—herause we are not in politics for the benefit of husiness fignis.

There are still FIVE FULL days for distributing campaign literaduty.

"Cleanliness is next to godfiness," is

an old saying and a true one. If it be

not the fact that cleanliness is more

important than godinees, it must at least be admitted that it is a more fundamental virtue. To ask people to

CLEANLINESS

That is an entirely false idea. As Fred Long truly said in addressing the ratification meeting of the Social Dymocratic Party in tine city has mouth, there is, so far as the working class is concerned no such thing as local polities or local issues. The same indus trial conditions everywhere produce the same political results, The same corruption which exists in

The Democratic government of New York is found in the steputitiean gov erament of Philadelphia. Just us atrikers have been clubbed under a Republican mayor in St. Louis, they have been clubbed under a Democratic mayor in San Francisco. Just as injunetions have been issued against trade unions by Republican judges in Ohi; and Connecticut, they have been issued by Democratic Judges in Kentucky and Missouri, "Just as labor laws have been defeated, declared unconstitutionalcor openly violated under Republican state governments in Massachusetts, Pennsylvania, and Illinois, so have they been treated under Democratic state governments in Georgia, Colorado, and Washington. East and West, North and South, in state and city as well us in pational affairs, we find the no far as the working class is concerned-always against the working class in all its conflicts with its musters.

And the reason in that the interests of the workers are everywhere the same and everywhere opposed to the interests of the capitalists; both old parties stand for the continuance of the system of private ownership of the means of production, out of which this class attenuate arises; and that wealth is so far concentrated, the control of industry so centralized, the capitalist ciass so closely organized, that both old parties take their cue, directly or indirectly, in all matters that affect the relations of Labor and Capital, from the same beadquarters from the cabinet of the autocrat of America's ladustry, J. Pierpont Morgan, at the corner of Wall Street and Broad.

l'inder such a condition there can be'

great issue, the same everywhere an all the time—the issue of Labor against Capital. Capitalist politicians of both old parties may hold joint sessions and rack their brains for new fake issues to divert the workingments minds and divide their votes, but this one issue WILL NOT DOWN. It will never cense to trouble them until it is settled right, till the very foundation of their power is everthrown, till the working class triumphs and the Co-operative Communication is not not

no truly local lastes in any campaign

Whether New York shall throw off the rule of Richard Croker, whether Philadelphia shall throw off the rule of Matt Quay, whether Chicago shail throw off the rule-of Carter Harrison -these are questions of absolutely no noment to nine-tenths of the people Whether Labor shall throw off the rule of Capital in all its forms, under all names and disguises—that is the one question.

Whatever we say or have said of New Nork City in this compaign applies to every city where the people are to vote next Tuckday. Philadelphia tenements may not be quite so unhealthful as those of New York; Boston's sweatshop may not be quite so had; the police of Richester may not have been used quite no systematically against the workers; Jersey City's schools may not be quite no inadequate to the needs of the working class population. But all these questions exist in all our cities. and in all they are crying out to the working class for solution. When we denounce the misgovernment of Tammany and the hypocrisy of the "re twofold parties acting in the same way, formers" in New York City and call upon the workingmen of New York tity to vote for Socialisms then we say to the workers of every other city or state, "De te fabula," of voit also are all these things true, to you also is this call made. What Benjamin Hanford stands for in New York, that same thing Gad Martindale stands for in Rochester, and Frederick Krafft in Jersey City, and J. Mablon Barnes in Pennsylvania, and Harry C. Thompson in Ohio, and all the candidates of our party-and that which they stand for everywhere else. GOVERNMENT BY REPRESENTATIVES OF THE WORKING CLASS FOR THE BENE-FIT OF THE WORKING CLASS.
